Hi
I'm trying to fix a broken TH 27A. Can anyone sell me a service manual
or make a copy of the schematic and boad layouts for me?
Thanks
John

Does anyone have advice for a small transmitter that could be used as a
homing device, like the kind they put on animals to track them? I'm
looking for a very small transmitter (and albeit larger receiver) that
could be used to track animals across a range of 5 miles.

I have forsale a Drake TR-4 with the 34pnb noise blanker.front panel looks like a tr-4c with the n.b. switch,also have the RV-4 remote vfo and the AC-4 power supply.this is a very nice looking station with some small scratches on cases.radio works well 80-10 meters with 150w's output.I also have the original manual for the TR-4/34pnb.I am asking $350 picked up in Phila. I really do not want to ship but shipping would probably be about $40 u.p.s.

I have forsale a complete Drake station consisting of a T4X,R4A,MS4 & AC4 power supply.I also have the original manuals and inter-connect cables.this is a nice looking station all but for some cutouts on the bottom cases near rear where the previous owner had rca and bnc jacks so he could run inverters and transverters. I have since removed and restored to original electrical condition. I have also removed front panels ,knobs and cleaned the vfo dials.they do look nice. I am asking $350 picked up in Phila. also when radios are next to each other on table you cannot see the cutouts,I do understand Drake still has bottom cases available. John w3ayt@arrl.net
also, I may ship if I don't get a local buyer but would probably run about $40 u.p.s.

I'ved used the R6000 for about 9 months. When it rains the bandwidth, 2:1 VSWR points, tightens up only on 20 meters. The antenna is tuned for 14200 and remains at 14200, but the vswr increases from 1.3:1 at band edges to about 2:1 at band edges. On occassions I put 1KW into it with no signs of arcing etc.

The performance on 10 through 17 is flawless.

Deacon Dave, W1MCE

Donald Young wrote:

I have a new B&K high voltage probe that I bought years ago and never used. I'm cleaning up the "shack" and this is one of the items to go.

Perfect condition.

I'm looking to buy a desoldering station with the vacuum pump built in.
I'd prefer a Pace or Hokka system but will consider all offers. Please
respond directly to me at ghopper@eskimo.com

Thanks

Good gosh - this is the first reference I've seen to S100 in 15 years!
Is there really S100 kit still in use? I gave all mine away when I
got my first IBM pc (I did keep mu tape drive to use on the pc).

Same here. I gave away my Northstar Horizon almost 20 years ago. Only kept one board stuffed with a gigantic 64K of RAM as a curio.<g>

Fields and Waves in Modern Radio
By Simon Ramo & John R Whinnery

Hard Cover, With jacket, Wiley & Sons, 1953, 576
Book is in good condition, no damage. Jacket is badly worn and brittle.

About the first edition

"It contains a wealth of informa tion in its many formulas and equations that will help
practicing engineers, physicists, industrial radio engineers, and teachers of ultra-high
frequency 'and physics to solve many of their daily problems. Contents of this book proved their
worth in training General Electric engineers in the field of microwaves."
Telegraph and Telephone Age

What's new in the second edition...

Expanded by about 10%, the sec ond edition of this well-known, widely used book contains much
new material designed to keep it the simplest yet most thorough treatment
of the electro magnetic theory essential to a practical understanding of fields and waves in
present day radio. For example:

• New material on horns, slot an tennas, paraboloids, and receiv ing antennas has been added in
the last chapter on radiation.
• New material on slow-wave guid ing structures and other miscel laneous guiding systems has
been added in Chapter 9.
• A new chapter has been added on Microwave Networks.
• New illustrations have been added to accompany new mate rial.
• MKS units have been introduced in Chapter 2; brief mention is made of the classical units for
comparison.
• Additional simple examples have been included in the presentation of the static

field laws in
Chap ter 2.
• The problems (such as the use ful exact-and-approximate meth ods for the calculation of
characteristics of radio system components) have been ex panded and modernized throughout.
• Graphic aids for transmission line calculations are discussed and charts are included.

CONTENTS

1 OSCILLATION AND WAVE FUNDAMENTALS

SIMPLE CIRCUITS AS EXAMPLES OF OSCILLATING SYSTEMS .

USE OP COMPLEX EXPONENTIALS

FOURIER SERIES

UNIFORM TRANSMISSION LINES AS EXAMPLES OF WAVE SYSTEMS

2 THE EQUATIONS OF STATIONARY ELECTRIC AND MAG NETIC FIELDS
STATIC ELECTRIC FIELDS

STATIC MAGNETIC FIELDS

COORDINATE SYSTEMS AND VECTOR RELATIONS

3 SOLUTIONS TO STATIC FIELD PROBLEMS
BASIC CONSIDERATIONS IN SOLVING FIELD PROBLEMS BY DIFFERENTIAL EQUATIONS

GRAPHICAL FIELD MAPPING

METHOD OF CONFORMAL TRANSFORMATIONS

TEE SEPARATION OF VARIABLES TECHNIQUE AND PRODUCT SOLUTIONS IN RECTANGULAR, CYLINDRICAL, AND
SPHERICAL COORDINATES

4 MAXWELL'S EQUATIONS AND HIGH-FREQUENCY POTEN TIAL CONCEPTS
TEE LAWS OF TIME-VARIABLE ELECTRICAL PHENOMENA

BOUNDARY CONDITIONS FOR TIME-VARYING SYSTEMS

POTENTIALS USED WITH VARYING CHARGES AND CURRENTS . .

5 CIRCUIT CONCEPTS AND THEIR DERIVATION FROM THE FIELD EQUATIONS

THE FORMULATION OF A CIRCUIT CONCEPT CONSISTENT WITH MAX WELL'S EQUATIONS

D-C AND LOW-FREQURUCY CIRCUIT CONCEPTS HIGH-FREQUENCY OR LARGE-DIMENSION CIRCUIT CONCEPTS. .

6 SKIN EFFECT AND CIRCUIT IMPEDANCE ELEMENTS

SKIN EFFECT AND TEE INTERNAL IMPEDANCE OF A CONDUCTOR .

CALCULATION OF INDUCTANCE

SELF- AND MUTUAL CAPACITANCES

7 PROPAGATION AND REFLECTION OF ELECTROMAGNETIC
WAVES
WAVES IN UNBOUNDED REGIONS

REFLECTION OF WAVES FROM CONDUCTORS AND DIELECTRICS .

WAVES IN IMPERFECT CONDUCTORS AND DIELECTRICS
8 GUIDED ELECTROMAGNETIC WAVES SIMPLE WAVES GUIDED BY PARALLEL PLANES GENERAL
ANALYSIS of GUIDED
WAVES

9 CHARACTERISTICS OF COMMON WAVE GUIDES AND TRANSMiSSION LINES
COMMON TRANSMISSION LINES COMMON WAVE GUIDES

MISCELLANEOUS WAVE-GUIDING SYSTEMS

10 RESONANT CAVITIES
ELEMENTAL CONCEPTS OF CAVITY RESONATORS

RESONATORS OF SIMPLE SHAPE

SMALL-GAP CAVITIES AND COUPLING

11 MICROWAVE NETWORKS
DEFINITIONS AND NETWORK THEOREMS

WAVE GUIDE JUNCTIONS AND CAVITY COUPLING

SIMPLE DISCONTINUITIES AND ANALYTICAL APPROACHES

12 RADIATION FIELD AND POWER CALCULATIONS WITH CURRENTS ASSUMED ON THE

ANTENNA ARRAYS OF ELEMENTS FIELD AND POWER CALCULATIONS WITH FIELDS ASSUMED OVER A

SURFACE ANTENNA IMPEDANCE BY APPROXIMATE SOLUTION OF THE BOUNDARY VALUE PROBLEM
RECEIVING
ANTENNAS AND RECIPROCITY

 Please check the whereabouts of Christopher Titus located in
Blacksburg Virginia. He opened a museum for older computers, and
I would guess gets calls from folks wanting to donate. He may be
able to 'give' you some of the surplus. He had imsai's, altairs,
intellect's, and almost one of everything with 6800, 8008, 8080,
etc.   best luck.

I have a complete S-100 desktop box.
It has a Z80 processor at 6MHZ and
64K of ram and dual 8 inch floppies.

It worked the last time I plugged it in.
That was about 15 years ago.
I can't remember the brand.
It was not one of the early famous brand names.

Anyone interested?

I'm looking for any mods for a KLM Echo 70cm 432 Transceiver. A friend of my fathers gave it to me years ago and I just now got it all tuned up and working but the receiver isn't very sensitive and it also chirps when transmitting cw. I'm missing the manuals and schematics well so if anyone knows of where i can get them or can copy them and send a copy to me i'd appreciate it.

Thanks,
Dave Erickson

I am looking for the Kenwood UT-10 1.2 GHZ band option for the Kenwood
TS-790 radio. If you have one and willing to part with it, please
respond via email.
Thanks
Greg   KD4LYW

Due to an emergency I must (reluctantly) sell immediately:

Kenwood TS-530sp HF Tranceiver, with manual, and D104 mic.

specs (from manual):

160-10m
220w PEP SSB, 180 CW Final input power
receiver sensitivity 0.25uV @ 10dB S+N/N

features:

-digital freq readout
- tunable notch filter
- IF shift
- narrow/wide selectable bandwidh, 500hz CW filter
- tube finals (6146's), solid state front end.
- variable noise blanker
- speech processing, VOX, adjustable AGC, ALC
- RIT/XIT
- 25 kHz calibrator

Asking $300 for everything. I'm located in southwest PA, abt 25 miles south of Pittsburgh. Local pickup only, I don't want to mess with trying to ship this!!! I'll throw in an 80 meter inverted V Antenna for free if you take it down!!!

please reply by email to:

rcrafton@home.com

thanks & 73,

Bob, WA3SLE

Fields and Waves in Modern Radio
By Simon Ramo & John R Whinnery

Hard Cover, With jacket, Wiley & Sons, 1953, 576
Book is in good condition, no damage. Jacket is badly worn and brittle.

About the first edition

"It contains a wealth of informa tion in its many formulas and equations that will help
practicing engineers, physicists, industrial radio engineers, and teachers of ultra-high
frequency 'and physics to solve many of their daily problems. Contents of this book proved their
worth in training General Electric engineers in the field of microwaves."
Telegraph and Telephone Age

What's new in the second edition...

Expanded by about 10%, the sec ond edition of this well-known, widely used book contains much
new material designed to keep it the simplest yet most thorough treatment
of the electro magnetic theory essential to a practical understanding of fields and waves in
present day radio. For example:

- New material on horns, slot an tennas, paraboloids, and receiv ing antennas has been added in
the last chapter on radiation.
- New material on slow-wave guid ing structures and other miscel laneous guiding systems has
been added in Chapter 9.
- A new chapter has been added on Microwave Networks.
- New illustrations have been added to accompany new mate rial.
- MKS units have been introduced in Chapter 2; brief mention is made of the classical units for
comparison.
- Additional simple examples have been included in the presentation of the static field laws in
Chap ter 2.
- The problems (such as the use ful exact-and-approximate meth ods for the calculation of
characteristics of radio system components) have been ex panded and modernized throughout.
- Graphic aids for transmission line calculations are discussed and charts are included.

CONTENTS

1 OSCILLATION AND WAVE FUNDAMENTALS

SIMPLE CIRCUITS AS EXAMPLES OF OSCILLATING SYSTEMS .

USE OP COMPLEX EXPONENTIALS

FOURIER SERIES

UNIFORM TRANSMISSION LINES AS EXAMPLES OF WAVE SYSTEMS

2 THE EQUATIONS OF STATIONARY ELECTRIC AND MAG NETIC FIELDS
STATIC ELECTRIC FIELDS

STATIC MAGNETIC FIELDS

COORDINATE SYSTEMS AND VECTOR RELATIONS

3 SOLUTIONS TO STATIC FIELD PROBLEMS
BASIC CONSIDERATIONS IN SOLVING FIELD PROBLEMS BY DIFFERENTIAL EQUATIONS

GRAPHICAL FIELD MAPPING

METHOD OF CONFORMAL TRANSFORMATIONS

TEE SEPARATION OF VARIABLES TECHNIQUE AND PRODUCT SOLUTIONS IN RECTANGULAR, CYLINDRICAL, AND
SPHERICAL COORDINATES

4 MAXWELL'S EQUATIONS AND HIGH-FREQUENCY POTEN TIAL CONCEPTS
TEE LAWS OF TIME-VARIABLE ELECTRICAL PHENOMENA

BOUNDARY CONDITIONS FOR TIME-VARYING SYSTEMS

POTENTIALS USED WITH VARYING CHARGES AND CURRENTS . .

5 CIRCUIT CONCEPTS AND THEIR DERIVATION FROM THE FIELD EQUATIONS

THE FORMULATION OF A CIRCUIT CONCEPT CONSISTENT WITH MAX WELL'S EQUATIONS

D-C AND LOW-FREQURUCY CIRCUIT CONCEPTS HIGH-FREQUENCY OR LARGE-DIMENSION CIRCUIT CONCEPTS. .

6 SKIN EFFECT AND CIRCUIT IMPEDANCE ELEMENTS

SKIN EFFECT AND TEE INTERNAL IMPEDANCE OF A CONDUCTOR .

CALCULATION OF INDUCTANCE

SELF- AND MUTUAL CAPACITANCES

7 PROPAGATION AND REFLECTION OF ELECTROMAGNETIC WAVES
WAVES IN UNBOUNDED REGIONS

REFLECTION OF WAVES FROM CONDUCTORS AND DIELECTRICS .

WAVES IN IMPERFECT CONDUCTORS AND DIELECTRICS
8 GUIDED ELECTROMAGNETIC WAVES SIMPLE WAVES GUIDED BY PARALLEL PLANES GENERAL ANALYSIS of GUIDED
WAVES

9 CHARACTERISTICS OF COMMON WAVE GUIDES AND TRANSMiSSION LINES
COMMON TRANSMISSION LINES COMMON WAVE GUIDES

MISCELLANEOUS WAVE-GUIDING SYSTEMS

10 RESONANT CAVITIES
ELEMENTAL CONCEPTS OF CAVITY RESONATORS

RESONATORS OF SIMPLE SHAPE

SMALL-GAP CAVITIES AND COUPLING

11 MICROWAVE NETWORKS
DEFINITIONS AND NETWORK THEOREMS

WAVE GUIDE JUNCTIONS AND CAVITY COUPLING

SIMPLE DISCONTINUITIES AND ANALYTICAL APPROACHES

12 RADIATION FIELD AND POWER CALCULATIONS WITH CURRENTS ASSUMED ON THE

ANTENNA ARRAYS OF ELEMENTS FIELD AND POWER CALCULATIONS WITH FIELDS ASSUMED OVER A

SURFACE ANTENNA IMPEDANCE BY APPROXIMATE SOLUTION OF THE BOUNDARY VALUE PROBLEM
RECEIVING
ANTENNAS AND RECIPROCITY

Limited Quantity! "Grandfathered" in by the FCC, these are the ONLY MOBILE FRS
Radios
available with an external magnetic mount car antenna!

Get up to 50% more range with these radios with the external antenna!

Manufactured by Midland, (Model 75-510XLM), original retail $119. Full logic
control, backlit
LCD display, scan, adjustable squelch, power save, keyboard lockout.

See: http://cgi.ebay.com/aw-cgi/ebayisapi.dll?viewitem&item=242731322

He he - or by looking at it through a pair of CB glasses!

Oh and don't forget to ground it to that bucket of salt water in your
trunk!

Otherwise you will only get 2,800 Watts output to your K-40, good
buddy!

NNTP-Posting-Date: Mon, 13 Dec 1999 21:01:38 EST
Newsgroups: alt.ham-radio.marketplace,ne.forsale,rec.ham-radio.swap,rec.radio.swap

I have for sale a complete matching Yaesu FT-107M station,
```

consisting of:

Yaesu FT-107M, with WARC bands
FC-107 matching external antenna tuner / antenna switch
FV-107 matching external VFO
SP-107 matching external speaker
SP-107P matching external speaker and phone patch
FTV-107 matching external transverter with 2 meter and 440 mhz modules

I also have a Henry 2-KD5 and Heathkit SA 2040 antenna tuner on the same page.

For details and pricing, look here...
http://people.ne.mediaone.net/cmacpherson/index.html

I'd like to sell the entire station (with the possible exception of the Henry linear amp and Heathkit antenna tuner), and preference will be given to those who offer to buy the complete station. That means that I might not accept your offer for a component right away, even if you agree to the asking price.

Sorry about that, but I don't want to get stuck with any of the accessories, especially after the radio is gone.

I have for sale a Henry 2-KD5 liner amplifier. It covers 10-80 meters (no
WARC) at legal limit. It's currently set up for 220 VAC, but can run on 117
VAC if you prefer.

It's in excellent working order and good (not perfect) cosmetic condition.
E-mail photos available, or look at my website at:
http://people.ne.mediaone.net/cmacpherson/Henry%202KD-5.htm If you want
additional photos, contact me through the website.

I will sell this amplifier ONLY to a licensed ham. Sorry CBers, no offense
intended, but don't even bother asking.

Price is $700 + shipping/insurance. I'll bet it's expensive to ship, so
take that into consideration.

Local pickup is available in Scituate, Mass (about 25 miles south of Boston)

Money order or extra time to clear personal check. You get the idea....

I have for sale a Henry 2-KD5 liner amplifier. It covers 10-80 meters (no
WARC) at legal limit. It's currently set up for 220 VAC, but can run on 117
VAC if you prefer.

It's in excellent working order and good (not perfect) cosmetic condition.
E-mail photos available, or look at my website at:
http://people.ne.mediaone.net/cmacpherson/Henry%202KD-5.htm If you want
additional photos, contact me through the website.

I will sell this amplifier ONLY to a licensed ham. Sorry CBers, no offense
intended, but don't even bother asking.

Price is $700 + shipping/insurance. I'll bet it's expensive to ship, so
take that into consideration.

Local pickup is available in Scituate, Mass (about 25 miles south of Boston)

Money order or extra time to clear personal check. You get the idea....

 For sale  : Two Fluke 8060A 4-1/2 Digit True RMS Handheld
             Digital Multimeters with soft cases and probes
 Condition : Excellent, functioning perfectly.
 Reason    : No longer using meters - let them find a new owner

 Retail    : $479 per meter, $22 per case
 Asking    : $225 (single meter with case) or
             $420 (both, with cases)
```

Shipping within contiguous 48 states included.

Please contact
Sean Borman
(s b o r m a n @ n d . e d u)

FEATURES:

True-rms AC voltage and current measurement
Volts to 100 kHz [8060A]
Fast audible-visual continuity tests
Relative Reference (offset): When measuring ohms with the
8060A or 8062A, the relative reference function displays only
the difference between a stored reference value and a
measured value, even if the range was changed between
readings. Relative mode works in all functions and ranges.
Low-power ohms on all resistance ranges, for in-circuit
resistor tests
Constant-current diode test mode
Resistance and conductance measurements
Frequency and dB measurements (8060A). The 8060A's direct
dB readout (referenced to 600Ohms) easily and accurately
measures the dB gain or loss of amplifiers, filters or
attenuators.
Digital Display/Counts: 20000
Resistance to 300 MM

I have for sale a Henry 2-KD5 liner amplifier. It covers 10-80 meters (no WARC) at legal limit. It's currently set up for 220 VAC, but can run on 117 VAC if you prefer.

It's in excellent working order and good (not perfect) cosmetic condition. E-mail photos available, or look at my website at: http://people.ne.mediaone.net/cmacpherson/Henry%202KD-5.htm If you want additional photos, contact me through the website.

I will sell this amplifier ONLY to a licensed ham. Sorry CBers, no offense intended, but don't even bother asking.

Price is $750 + shipping/insurance. I'll bet it's expensive to ship, so take that into consideration.

Local pickup is available in Scituate, Mass (about 25 miles south of Boston)

Money order or extra time to clear personal check. You get the idea....

I have for sale a complete matching Yaesu FT-107M station. This is one of
the classiest-looing stations of all time, with the matching white-faced
equipment, yellow LED readout and pale green meter lamps.

The station consists of:

Yaesu FT-107M, with WARC bands, internal AC supply, 500 HZ CW filter
FC-107 matching external antenna tuner / antenna switch
FV-107 matching external VFO
SP-107 matching external speaker
SP-107P matching external speaker and phone patch
FTV-107 matching external transverter with 2 meter and 440 mhz modules

I also have a Henry 2-KD5 and Heathkit SA 2040 antenna tuner on the same
page.

For details and pricing, look here...
http://people.ne.mediaone.net/cmacpherson/index.html

I'd like to sell the entire station (with the possible exception of the
Henry linear amp and Heathkit antenna tuner), and preference will be given
to those who offer to buy the complete station. That means that I might not
accept your offer for a component right away, even above the
asking price.

Sorry about that, but I don't want to get stuck with any of the accessories,
especially after the radio is gone.

Hey Leo,
if he advertises, in US Dollars, and that's is what he is doing, and I
can buy it for a lot less, "brand new", at the local "candy Store",
then he is not doing it right, is he? Maybe he should advert in Canada
only, or find out the going prices here first.

I have zenith windcharger forsale. Includes, blade(prop), tail section and generator. This is a wind powered generator. Charge a battery. It works, but could use a good cleaning and general restroation work. A perfect acessory for your pre Rural Electrification radio set or as a general battery charger for

the shack. Will sell or trade(full or partial) for one(or more) of the items
below.

Want the following(trades only)

UHF radios. Programable or already have exsisting GMRS freq installed
mobile scanner (30+ channels)
FRS radio's.
2 meter mobile (needs encode pl)
220 mobile
dualband ham radio
solar panels
shortwave receiver (with ssb)
UHF/VHF receiver all mode
mobile HF rig.
Mobile HF antenna system.
30x or faster IDE cdrom
6gb or later IDE harddisk
ritron repeater plus manuals/docs
repeater community panel
book: foxfire 8

Below is a list of items I have forsale. Below this is a list of things I am looking for. WIll consider trades or offers
on all items.

HAVE the following

CDE rotor control box CD-45-II/Ham IV rotor control (control box only) good Workingconditon.

Sun Microsystem Sparcstation classic unix workstation, SCSI, 2 serial, network, color video
card. 32mb ram, 2gb disk, keyboard and mouse. Also Solaris 2.6 cdrom also included
good Working condition.

Telebit netblazer router. Use to route your home/office PC(s) to the internet. Does
modem dialup/ISDN connects automaticly for you. Connect your entire office to a single
dialup line. Supports 1 network interface and two dialout ports. Full documentation (heavy). good
good working conditon

Motorla Bitsurfer Pro ISDN modem (TU). docs and power supply. (can be used with netblazer
listed above for a high speed dialup router. Good working condition.

Exabyte 8200, Removed from service working over a year ago, not tested.

Nokia 5100/6100 external audio handset. Option HSU-1. This allows you to use a "phone" style handset on the
nokia 5100/6100 cell phone for a more "mobile" phone look.
unused.

VDC-3500 digital camera, 640x480, 24bit, includes camera, rs232 interface and software.
used little.

Want the following(trades only)

I have zenith wincharger forsale. Includes, blade(prop), tail section and generator. This is a wind powered
 generator. Charge a battery. It works, but could use a good cleaning and general restroation work. A perfect
 acessory for your pre Rural Electrification radio set or as a general battery charger for the shack. Will sell or
 trade(full or partial) for one(or more) of the items below. Will sell outright for $350 plus shipping.

 Want the following(trades only)

 UHF radios. Programable or already have exsisting GMRS freq installed mobile scanner (30+ channels)
 FRS radio's.
 2 meter mobile (needs encode pl)
 220 mobile
 dualband ham radio
 solar panels
 shortwave receiver (with ssb)
 UHF/VHF receiver all mode
 mobile HF rig.
 Mobile HF antenna system.
 30x or faster IDE cdrom
 6gb or later IDE harddisk
 ritron repeater plus manuals/docs
 repeater community panel
 book: foxfire 8
 interesting radio/ham items (send me your trade list)
 interesting computer items (send me your trade list)

I have a cushcraft A3 triband beam for trade.Beam is in good condition, but a
new hardware set would be advised before putting it back up. Will trade for a
multband HF vertical antenna. 5btv, gap or similar antenna.

Below is a list of items I have forsale. Below this is a list of things I am
looking for. WIll consider trades or offers

on all items.

HAVE the following

CDE rotor control box CD-45-II/Ham IV rotor control (control box only) good Workingconditon.

Sun Microsystem Sparcstation classic unix workstation, SCSI, 2 serial, network, color video
card. 32mb ram, 2gb disk, keyboard and mouse. Also Solaris 2.6 cdrom also included
good Working condition.

Telebit netblazer router. Use to route your home/office PC(s) to the internet. Does modem dialup/ISDN connects automaticly for you. Connect your entire office to a single dialup line. Supports 1 network interface and two dialout ports. Full documentation (heavy). good working conditon

Motorla Bitsurfer Pro ISDN modem (TU). docs and power supply. (can be used with netblazer
listed above for a high speed dialup router. Good working condition.

Exabyte 8200, Removed from service working over a year ago, not tested.

Nokia 5100/6100 external audio handset. Option HSU-1. This allows you to use a "phone" style handset on the
nokia 5100/6100 cell phone for a more "mobile" phone look. unused.

VDC-3500 digital camera, 640x480, 24bit, includes camera, rs232 interface and software.
used little.

Want the following(trades only)

UHF radios. Programable or already have exsisting GMRS freq installed (need pl also).
mobile scanner (30+ channels)
FRS radio's.
2 meter mobile (needs encode pl)
220 mobile
dualband ham radio
solar panels
shortwave receiver (with ssb)
UHF/VHF receiver all mode
30x or faster IDE cdrom
6gb or later IDE harddisk
ritron repeater plus manuals/docs
repeater community panel
book: foxfire 8

I have a used Larsen dual band on glass antenna. It includes the antenna element, mounting base, coupler base and coax, and a new re-mounting kit.

Tinted windows kept me from using it on my new vehicle.

HRO catalog part # KG2/70-CX-PL $84.95

$45 plus shipping. Firm.

X-Complaints-To: abuse@eskimo.com

I bought this antenna when my Larsen on-glass antenna failed to work
properly on my new car. Then I found out that something in the windshield
tint was interfering with the coupling of the two halves of the antenna.
The two antennas went in a drawer for 3 years. Now I'm cleaning up my
"shack". I don't remember what the brand was and a check of catalogs and
receipts reveals no further clues. The antenna is in as near perfect
condition as it can get short of being in the shrinkwrap.

Includes: Antenna element, base plate for element, coupling on the inside
of the car, coax with connectors and a brand new mounting kit.

Picture: http://www.eskimo.com/~ghopper/onglass2.jpg

$45 plus shipping.

I have a HP 95LX Handheld PC in Near perfect condition. Runs on 2x"AA" standard batteries.[illegible] It has Lotus 1-2-3, a HP Advanced Financial Calculator, Appointment and Phone Book, Memo Editor, Data communications capability and a file manager. Features MSDOS Version 3.22, full QWERTY keyboard LCD graphics display - 16 lines by 40 columns. Includes manuals, PC, and whatever else came with the palmtop. Perfect for mobile packet or whatever other cool dos based ideas you can come up with. I had intended to use it to set up a backpack portable packet station. I never found the time.

Also included is the optional communication kit which consists of a cable to connect the HP 95LX to a pc through a serial cable, software and manual. I am willing to sell this seperately once the 95 sells.

$115 including shipping. Firm.

I have a new B&K high voltage probe that I bought years ago and never
used. I'm cleaning up the "shack" and this is one of the items to go.

Perfect condition.

I just installed a 'generic' battery. Something like $3 at RS. I clipped
off the old battery leads, and soldered right to the new one. I just picked one that had about the right voltage and encased it in a piece of heat shrink.

I forget which one I used. I bought my HTX-202 used, and the battery died about a month after I got it. This was about 4 or 5 years ago I think. Anyway, That new battery has been in ever since. Not a single glitch until just last week. And that was when I plugged in this aftermarket 8-cell AA pack that came with another HTX-202 I had picked up. Turned out the alkalines in the pack were quite low, and when I tried to run the radio, it 'glitched' and gave me the dreaded ER1 message. I had to hard reset to get out of it. So maybe my internal is getting low... Maybe time for the SECOND swap.

By the way, does ANYONE know where to get more screws that hold the case together? I suppose I can get more from Maxon, if not RS. RS list a 'screw kit', but I don't know if that's what I need or not.

I would like info on this radio. I have also posted an add to buy one.
I want to know about modification and if its possible on both the
2.5Watt and 5 Watt models. Also want to know about a numeric touch pad
that a co-worker has on one. Can this be added to a radio or do you
have to buy the radio with it already added. Please email me at

rvkeller@iupui.edu and thanks for taking your time to help me out.
Ryan

I am looking to buy a new or used (good condition and working) Yaesu
FT-23R, modified or non-modified. The one a friend has is equiped with
a key pad, I would like this feature or info on how I can equip one with
a keypad if possible. I found a place to buy one that is 5 watts, but
the man said I cannot put a key pad on it. I dunno if he is right or
not. Could you please send me any info about this radio. Thanks ryan

144 to 148 MHz, FM Mobile Transceiver. Maximum of 45 watts output. Hi and low power settings. MC-48B DTMF Microphone and mounting bracket included. Also original box but only a copy of the instruction manual. No DC power cable. Memory, Scan, CTCSS, Tone and more. I always get good reports on it. Excellent audio - always. It probably needs a lithium battery replacement though. One cold morning the information I had stored in memory cleared. It's a good rig, and shows normal wear and tear. $159.00 Buyer pays shipping.

I Have Tried Several Logging Programs And Have Found Short Comings In Them. No Need To Name Them Here. And I Do Not Want To Get Into Programing Disputes Over Which One Is Better Than The Other.

What I Would Like To Here Is What Program You Like Better And Why. And Which Ones You Have Tried.
I Am (((Not))) Looking For A Contesting Software But A Logging Program For Logging Normal QSO With The Ability To Quickly Recall Duplicate QSO's With The Notes About The Previous Contact.
Also One That Interfaces With My KW 950 For Frequency & Mode Logging Along With The Correct UTC Time.

All Comments Will Be Appreciated
I Prefer A Windows 98 Based Program But Dos Can Be Used.

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless" watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

It's mounted on a 6" x 12" (guestimate - it's home on the bench and I'm not)
heat sink, with an aluminum cover. Looks surplus, maybe a medical equipment
pull?, but of unknown origin. With "documentation" (2 xerox pages with
specs and connections).

Fully functioning and overload/overvoltage protected. (Just butt-ugly, hi!)

I have replaced the lithuim battery with a coin cell holder using a #32 coin type. Had to run a small twisted wire back to the board. No problems. Now I just change the coin wafer out of a permanenet holder mounted inside the radio.

I would like to buy a used/new 10M Recieve Pre-Amp. If you have one
that works. Please contact me: thavens (AT) quest-net.com

I would prefer one that with a T/R switch built-in. But will consider any.

I have two motorola MOCAT cb radio's. Motorola quality in a CB radio.

Both are 40 channel units.
     The first model 4000 is a 40 channel with a analog dial. Has Public Address switch (PA). Has top mounted speaker and jack for external speaker. The mic on this unit is a stock motorola mic and is questionable. It sometimes works, sometimes doesnt. With a "GOOD" mic this radio works fine.

     The second is a model 4022, 40 channel with digial display, has PA, local/distance switch an an extend button (audio compression I believe). A motorola mocat power mic is included with this unit. This one also has a top mounted speaker and external speaker jack.

Both units work, however 1 mic is iffy and I have only one power plug. Its a common plug so finding a replacement is not an issue. There is no mounting bracket for either unit.

Asking $125 for the pair. Will consider trades or offers. Looking for GMRS,FRS, ham radios, Also looking for mobile and hand held programmable scanners.

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless"
watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

forsale@ev1.net

Hi -
 I have for sale as a package the following:
Kenwood TS-870S S/N: 70500197

Stock this radio is all filtered up. the Queen of the current line of
Kenwoods.
Learn more about it here:
Kenwood Web site - TS-870S

Kenwood SP-31 matching speaker

Astron Power Supply SS-30 M

All the above are in cosmetically and functionally perfect.

Also included is the package beside the hand mic. is a Heil HM-10 Dual
(#4
DX and #5 Reg. Elements) Mic. with the kenwood cord. However I am
keeping
the foot switch. So you would need to pick up a FS-1 or HS-1 switch.
Now Iv had the Mic. since I was a teen and my last call is engraved on
the
Heil only. (Yes I quit doing that years ago). Just so you know.

Please view the items here:
http://www.wanfear.com/~rich/ts-870s.jpg

My price is $1725.00 shipped in the lower 48
I would consider offers on price but no trades please.

I have a complete 2 meter mobile radio.
Radio is an Icom-25A 2 meter synthisized radio. Includes orginal box,
schematics and parts layout sheet. (might have org docs someplace).
Radio has touch tone mic and power cord. Power cord is wired for a cigertte
light connections. I also have a 2 meter mobile antenna to go with the

radio. Quick in and out of any car. Complete mobile station. Good for mobile or use for a packet or APRS station as well.

Asking $125. will consider offers or trades.

They're fine pieces of kit, albeit rebadged products of the Sangean
corporation. Buy 'em on the net from www.purleyradio.co.uk

Original Roberts Radios are even finer, though. But I collect them so I
would say that.

Jim

RS Pro 2006 for trade. This is a 9 out 10 radio. It has the manual and ant. with it. It has been modified for increased receive. It covers from 25.0MHz to 1.3GHz. This is probably the best scanner for under 800 bucks. Would like to trade for an HF rig. I am posting this for my news group impaired friend N5PXH. Please reply via email to myself (and I will forward to him) or to George at spydor@hotmail.com . Would also consider cash offer but would really like a transceiver.

Nick in regard your question about "Roberts radios";
Saw something about these (I think) on < www.purleyradio.co.uk >
Just a suggestion.

I am looking for a program called ISO.COM

It is a DOS based controller program for an AEA IsoLoop IT1 Tuner. I picked the antenna up at an estate sale but the program was not with it. If anybody could help, I would appreciate it. Thanx.

Below is a list of items I have forsale. Below this is a list of things I am looking for. WIll consider trades or offers on all items.

HAVE the following

CDE rotor control box CD-45-II/Ham IV rotor control (control box only)
good Workingconditon.

Sun Microsystem Sparcstation classic unix workstation, SCSI, 2 serial, network, color video
card. 32mb ram, 2gb disk, keyboard and mouse. Also Solaris 2.6 cdrom also included
good Working condition.

Telebit netblazer router. Use to route your home/office PC(s) to the internet. Does
modem dialup/ISDN connects automaticly for you. Connect your entire office to a single
dialup line. Supports 1 network interface and two dialout ports. Full documentation (heavy). good
good working conditon

Motorla Bitsurfer Pro ISDN modem (TU). docs and power supply. (can be used with netblazer
listed above for a high speed dialup router. Good working condition.

Exabyte 8200, Removed from service working over a year ago, not tested.

Nokia 5100/6100 external audio handset. Option HSU-1. This allows you to use a "phone" style handset on the nokia 5100/6100 cell phone for a more "mobile" phone look.

unused.

Motorla Mocat CB, 40 channel model 4000. radio works fine, but included mic is flakey.

VDC-3500 digital camera, 640x480, 24bit, includes camera, rs232 interface and software.
used little.

Want the following(trades only)

UHF radios. Programable or already have exsisting GMRS freq installed (need pl also).
mobile scanner (30+ channels)
FRS radio's.
2 meter mobile (needs encode pl)
220 mobile
dualband ham radio
solar panels
shortwave receiver (with ssb)
UHF/VHF receiver all mode
30x or faster IDE cdrom
6gb or later IDE harddisk
ritron repeater plus manuals/docs
repeater community panel
book: foxfire 8

Ok Gary, let's deal. I have been after a Motorola CB for ions....what I propose for a fair trade is a Regency MX 3000 30 channel mobile/base scanner. In very good
condition, I replaced the lossy motorola connector with a BNC, touched up the alignment (I'm a two way radio tech), and generally cleanedthings up a bit. I have
the manual, AC adapter for home use, mounting bracket, knobs, DC line.
Other goodies for trade or sale:

Regency MX 5000 receiver, 25-550Mhz, AM, NFM, WFM manual, box, ac supply. Asking $75.00

Radio Shack PRO 64 Scanner. 400 memories, does all the typical freqs, cell blocked, although I've heard of a mod. Nicad pack, charger, leather case, original
boxes $125.00

Yaesu FT 2700 Dual band mobile. Mounting bracket, duplexer, mike...works well, but
needs a new michrophone. Has pl encode/decode capability. $100.00

Icom IC-W32A Dual Band Heanheld.
2 Meter/440 MHz Dual Bander Handheld

Advanced Operations Have Never Been Easier!

"With its five big watts and a plethora of features, the IC-W32A provides just about everything you could possibly need in an H-T. Best of all, perhaps, the IC-W32A makes a serious effort to take some of the pain out of using a small, complex piece of technology" -- QST, July 1997

- Dimensions: 2.25 (W), 5.5 (H), 1.4 (D), 16 oz
- 5 Watts of power @ 13.5 V
- 200 memory channels
- 8 character alphanumeric memory channel identification, keypad entry
- Backlit display and keypad
- ICOM rugged! Meets MIL SPEC C/D/E for shock and vibration
- Handheld to handheld cloning capability (opt. OPC-474 cloning cable) or PC programming capability
- Independent band controls for tuning and volume
- VHF/UHF exchange function allows assignment of VHF/UHF band controls to either knob

More detailed IC-W32A specifications and options.

I did essentially the same thing - and the little holder came from the
local RadioShack, HI!
Just be careful re-assembling the critter, the holder thingy is a bit
larger.....

I have a Kenwood KSC-4 charger (working according to service manual)
in great shape with service manual included for $ 15.00 + shipping.

Ok here is the situation I live in a apartment building that doesn't allow antennas.
This is what I have bought to construct one on the window for my vhf/uhf radio

a roll of heavy duty alarm tape(one they use for window alarms). the ends to attach wires to it. the window is 52 inches high 46 inches wide. this is the space
I have to use.

Now my problem don't know enough about ant. design to do it. Could someone please help.

Mitch

There's info on building a 'roll up' J-pole from 300 ohm "TV" twin lead on my web page. URL below. Click on the Antennas link.

Mine is by far not 'THE' site for this info - there are many, many sites with hidden and apartment antennas. Another idea may be to try a full wave loop taped to the window. Lots of options.

Good luck!

ICOM IC-706 HF + 6M + 2M Radio $1400(Canadian) or reasonable offer
Comes with MB-62 Mobile mounting bracket for faceplate & OPC-581 3.5M
separation
cable, original box, spare power cables, manual, and manual for CIV control.
Excellent like new condition. Radio specs are
100W HF all mode, all bands, except AM which is 40W,
100W on 6M all mode, and
10 W on 2M all mode. (Amplifier listed below)

Heil HM-10-Dual microphone (type 4 and type 5 cartridge) $150 c/w FS-1
Foot switch and MA-1 Adjustable boom.

MFJ 949E Deluxe Versa Tuner II $150 Like new, works great

Daiwa LA-2080H 2M Linear (FM + AM/SSB/CW) amp with preamp $150 Brand new
still in box

Bencher BY-1 Iambic Paddle (black base) $75

All prices listed in Canadian currency. I have been using the station for
approx 1 year, and now must sell quick. I have received excellent
signal/audio reports from all around the globe.
I would prefer to sell the items as a package for $1800 obo but will
consider seperating for pricing listed above. To buy the tranceiver, you
must provide me with proof of a valid amateur radio licence.

thanks for the links everthing that one would need for building an ant. I
will search for the way I would like to do it with the alarm tape just got
to find out the formulas for 1/4 1/2 5/8th wave for and a way to make dual
band 2m/70cm ant with it.and figure what would fit in the window pane

c.radio.swap

1) The Cushcraft R-5 is a vertical 12/12/15/17/20 meter antenna, it
needs no ground planes. It is "as new" in its original box. It was up
on my house for four hours before a neighbor demanded it be taken down
(CC&Rs) (No need for advice on CC&Rs though!!). Best offer, $100 or
better, takes it.

2) ICOM IC-2SRA handheld 2m/440MHz 5 watt transceiver. This is the one
with the extra receiver (and it's own small whip antenna) that receives
all normal modes up through around 999 MHz or close to it. Includes
manuals, box, rechargable batteries and charger. Best offer over $150.

3) Standard Twin Bander 144/450 MHz FM Transceiver C5718DA. Mobile 50
watt transceiver with all the controls and display in the microphone
itself. This includes the extra-long cord so the remote 'box' can be
mounted in the trunk if you like. Best offer over $150. Includes
original box and manuals. The memory upgrade, 100 channels, is
included.

Serious offers only please.

'73

No mods have been done to it.
     S/N: 2272 (Yup! Its a good one :-))
     on a scale of 9 to 10 its a 9.5
     I have 3 of the optional filters installed:
     FL-222 1.8Khz 455 sideband filter
     FL-223 1.8 Khz 9Mhz sideband filter
     FL-102 AM Filter

This item is a Heath HD-4040 that was featured in 73 Magazine. It
comes with a virgin copy of the magazine. A collector's item. Take
a look at the auction:

The NIR-10 is a DSP driven noise reduction/elimination unit made
to reduce audio noise. I used it for amateur satelite work. This
unit is going cheap. Check out the auction at:

Subject: A Theory - STOP THE BAIT AND SWITCH SCHEME!

Friends, Romans, Countrymen,

LEND ME YOUR FISTS!

My friends N8WGM and N4SKD may have solved the mystery of the sudden restructuring to become effective on April 15th. It may not be only about Kenwood or Icom wanting to sell Ham rigs in CB-boom quantities. Big business wants frequencies and the Feds want to sell our God-given Spectrum for filthy lucre and as a bonus to keep the people from having direct access without a government or corporate gatekeeper.

As the new theory goes, the FCC only has unilateral control (eminent domain) over domestic spectrum, namely the VHF/UHF bands, while the HF bands are ruled by international treaties. The quickest bucks come from selling VHF/UHF. These frequencies are also the most useful for business mobile communications. The fly in the ointment for the greedy bureaucrats is the occupation of many of the available bands by large numbers of Technician and Novice Hams. These no-code or little-code Hams are a majority. The ever resourceful parasites in high places were presented with a serious problem, how to move them off the VHF/UHF bands without starting an insurrection. The answer, GIVE THEM INSTANT ACCESS TO HF so that when the plug is pulled on ever increasing slices of VHF/UHF they won't have as much reason to gripe. This is the oldest trick in the book, like giving displaced employees of companies moving offshore the "option" to move to a different division or shuffling Native Americans to smaller and smaller reservations with promises of better hunting grounds.

Who fought to maintain the portions of the VHF/UHF bands already ceded to big brother and big business? Were the General, Advanced and Extra-class Hams as dedicated to saving the 220 MHz band as the Techs? The non-HF Hams fought gallantly but in vain. Most HF Hams didn't seem to care very much. That lesson didn't go over the heads of our "friends " in government or the ARRL. Those cynics know that while the novelty of HF has most new full-spectrum Hams diverted, the VHF and UHF portions will be fair game. The Feds will pull it off like a Mommy offering a baby a lollipop to distract him while she takes away a shiny but oh so dangerous razor blade. Didn't you know that we are all supposed to be too irresponsible to "play" with our own spectrum?

The no-code Hams are crowing today, but they may come to see their victory

as
hollow. We will be all crowded like sardines onto the "reservation" of HF while some of the most valuable VHF/UHF turf is lost forever. SUCKERS! Had these no-coders simply done the work to achieve proficiency in code speed they could have had their cake and eaten it too! Now they will loose what they had and foul what they gain.

Let us all join together for one last thrust against this dirty scheme. Attached is a communication from a friend and avid CW operator. He has provided links to a site with a downloadable petition and links to interested
officials. We have until the middle of February to register our opposition to the restructuring. WRITE AND SHOUT FOR YOUR RADIO LIVES!

73's,
AL PARKER,
N2SAG

shame on you Joel,you should know the band plan better than that,
novice's can also use 220 and 1240 mhz.

I need a couple of Motorola channel elements
model KXN1086 and 1088. What do you have?

Thanks

John

p

I stand corrected.Novice operations are allowed from 222.0 - 225.0 @
25 watts PEP.

WANTED: One or two DEAD Bendix-King handheld radios for case parts.
Need to repair a dropped LPH5142. Front/back plastic, battery plate,
battery spring, case screws, etc. VHF, UHF or 800MHz HTs OK.
I think they all have the same (or close) case parts.

Thanks very much for your help!

Hey - you never know if you want to change the crystal filters in the
IF, maybe narrow band the thing... I guess... otherwise, I would
reprogram the thing, myself.

The Syntor doesn't use crystals, it uses an "R prom" that is "burned" by
the programer. It is not re-writeable, it can only be used once. Every

time you want a new freq., you have to burn a new prom. VERY EXPENSIVE,
unless it is going to be used for a repeater or in the Business band
where it was originally meant to be sold.

Or if you have access to a prom programmer (or even if you don't) go to
http://www.geocities.com/SiliconValley/5857/ and spend 20 minutes reading.
The proms are like $2.00, and Mr. Bennett's software works great.

Not exactly, the EPROM goes for about $6-10 apiece, retail. The suitcase
programmer, on the other hand, is quite expensive. Helps to have friends who
let you use theirs occasionally.

I had listed this a few weeks back, but the person who expressed interest did not send off payment, so I am relisting it once again. Tnx.

==========

I have a Icom 756 transceiver in like new condition for sale. Unit comes complete with original box, manual, schematic, and other paperwork. Has always been used inside ham shack, and kept covered when not in use. Was used as backup transceiver. Has the Icom MARS/CAP mod professinally installed and documented. This is a outstanding receiver offering a bult-in tuner, DSP, Auto-notch, and graphic display. Unit works and looks like new. $1475, and I will pay UPS shipping and insurance to anywhere in the US mainland.

73,

Bruce KG2IC

(Sorry about the duplicate - News server isn't replicating properly.)

Car repair bills forcing sale: All equipment is in excellent condition, approx.. 18 months old, with original manuals, boxes, and stock accessories (such as hand mic and pwr cord) except as noted. No equipment has been modified in any way. Will split out accessories separately only if radio sells solo first:

IC-756	160M-6M Transceiver	$1525	
FL-52A	500hz filter for 455khz IF	$ 125	(no box)
SP-21	External Speaker	$ 75	(no box)
CT-17	Computer Interface	$ 85	(w/ 12v pwr supply)

Will take $1800 shipped CONUS for all, otherwise stated price PLUS shipping if selling separately.
If you have any questions, just ask. I can send jpg pictures of each piece on request.

73 and thanks
Gil Bishop

I'm looking to acquire one of the 70's era S-100 bus computer systems like
the Northstar Horizon or Ithaca InterSystems DPA-1. If you have an S-100
based unit like that please contact me and see what we can work out.
Purchase only, I don't have a trade. Also would be interested in an S-100
based modem if you have one. You can contact me a chipsndips@snet.net.

Thanks

Very nice IC-756, low hours, and used in non-smoking environment. Rig is
easily 9/10 (only because nothing is 10/10 once you open the package).
Serial number in the 2700's. With box, manual, hand mic, 12v pwr cord.
Selling due to
car repair bills...

$1500 Shipped CONUS

Also have FL-52A 500hz filter - $125, SP-21 speaker $75, and CT-17 computer
interface $85. Will Take $15 off each accessory if purchased with radio.
$1725 shipped if you take all.

Otherwise will sell the accessories separately only after rig sells.

73 and thanks for reading

144 to 148 MHz, FM Mobile Transceiver. Maximum of 45 watts output. MC-48B DTMF Micophone and mounting bracket included. Also original box but only a copy of the instruction manual. No DC power cable (you can buy or make one easily). Memory, Scan, CTCSS, Tone and more. I always get good reports on it. Excellent audio - always. It probably needs a lithium battery replacement though. One cold morning the information I had stored in memory cleared. It's a good rig, and shows normal wear and tear. $169.00 Buyer pays shipping.

Check some of the larger TV stations. There was a weather computer by Color Graphics that was S-100 based. Since TV people throw nothing away, there may be some of them hidding somewhere.

X-MimeOLE: Produced By Microsoft MimeOLE V4.72.3612.1700

Running three inexpensive and readily available 811A tubes to produce 600W cw, 1200w PEP ssb off of standard 120v mains and about 60watts of drive. Good basic amplifier. Tuned input to provide maximum compatibility with solid state transmitters. Unit is 100% operational, very clean inside, non-smoker. The case is clean, no scratches The only blemish is the plastic covering on the front panel has de-laminated in a couple of places. It doesn't effect the operation one little bit, but unfortunately hurts the cosmetic "value" - down around a 7 out of 10. With manual and original packing.

Anyway, if you'd like a bit of punch on your signal, here's the link:
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=192180838

As with any item I place on EBAY, there is no reserve. The starting price is $25.

Nice TS-50S with 500Hz filter, hand mic, quick-disconnect mobile mount,
manual and boxes - $550 plus shipping.

AT-50 automatic antenna tuner - matches the TS-50, with cable and manual - $275 plus shipping.

$800 for both and I'll pay for shipping via Priority insured within conus.

Thanks for reading.

I have for sale a GE ExecII radio 100 watts out. The radio has been tuned down into the ham band and is presently tuned to 147 MHz and has been modified for 9600 baud packet. It can also be used for 1200 baud packet by

changing a few connections, or could also be used as a 2 meter repeater. Radio comes with a partial repro manual, tells how to use for 9600 baud, 1200 baud or how to use as a repeater, and one set of elements. This unit is in excellent condition, I'm getting out of packet, not enough activity in my area - so can't stand to just let it set here. First $150.00 plus $10.00 for shipping gets it. Please respond via email.

Richard

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless" watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

I have for sale one Vertex 2011, and one Vertex 7011.

2011 is a 45 watt VHF radio
7011 is a 25 watt UHF radio.

I have the programming cable, and software. These radios are in excellant
condition. Used indoors, and briefly used mobile. I would like to keep it
as a set (both radios,cable, and software), but will be willing to seperate
if I can sell all components. Would like to get $700 for the package.

Hello,

I am looking for a wide band hand held receiver, like a Yupertu MVT-7100.

To swap, I have an almost new Yaseu VX-1R dual band HT. It has wide, 75-999Mhz (minus cellular, except image) receive. I will include the computer interface, software and a MFJ lapel mic.

One very nice Bird 4304 (Blue) watt meter. This is the broadband "slugless" watt meter.

It has four scales on it:
15
50
150
500

Rated for 3.2-1000 MHz

Retails for $519.00
I want $350.00 plus shipping for this meter.

forsale@ev1.net

I have for sale one Vertex 2011, and one Vertex 7011.

2011 is a 45 watt VHF radio
7011 is a 25 watt UHF radio.

I have the programming cable, and software. These radios are in excellant condition. Used indoors, and briefly used mobile. I would like to keep it as a set (both radios,cable, and software), but will be willing to seperate if I can sell all components. Would like to get $700 for the package.

Please take a look, I've listed a wide variety of HF gear, all in good to
excellent condition, including a TS-50S, Mosley TA-33Jr, Create Roof Tower
and more. All auctions are "no reserve", and the prices shown are current
as of 11:00am EST 11/7.

Here's the list of the auctions with the links:

TS-50S Xcvr - with 500hz filter
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=193474314
$455.00

AT-50 Tuner
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=193480344

$142.50

AL-811 Amp
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=192180838
$355.00

BY-1 Paddles
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=192295958
$44.00

MB-13 Mount
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=193487269
$13.50

CR-30 Tower
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=194076537
$76.01

TA-33Jr Beam
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=194092149
$105.00

TB-3 Bearing

Can anyone give me a identification number for the lithium battery used to back up the memory in an HTX-202. Or does anyone know another source besides Radio Shack for this battery. This is the third one I have to change in six years, and I hate to give Radio Shack another $15.00.

Richard

Click on this link to view:
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=165539516

Condition: Very good, original paint, no rust or corrosion

Extras: Spare modulator deck, wheeled roller base, service manual, 3 wire line cord, blower fan switch mod, and rear outlet cover power plate

Produced in large numbers during the 50's and 60's, the T-368 transmitter was used by the military as a multi-purpose unit. Affectionately known as the "T-3" a great many were placed in stationary RTTY service, while others were used for AM and CW operation. As a medium power transmitter the T-368 was overbuilt for continuous 7/24 service.

The unit weighs about 700 lbs., and is roughly cube shaped. Height and length are close to 41". It's modular construction allows easy access for service. The lower deck, and the most heavy, is the power supply section. The middle deck, and next lightest, is the modulator, and the top deck is the RF section. All decks are equipped with Cannon connectors and can easily be removed for service and troubleshooting. It fact it is possible to "hot swap" defective decks while the power is still energized with no adverse effects.

The T-368 requires very little in the way of conversion for use on the amateur bands. With its 450 watts of carrier, and heavy duty construction, the T-3 makes an outstanding amateur transmitter. A few simple safety and convenience changes are all that is required. See the Conversion button for more information.

For more info and photos of this unit, use this link
http://www.buffnet.net/~bhowes/t3sale.htm .

Due to the weight and size requirements, this unit must be picked up in Buffalo, NY. Or you can arrange pickup, crating and shipping at your expense.

Payment must be made within 1 week in certified funds.

Any questions, just email.

Tnx!

I mailed them a new 610 form MANY WEEKS ago.
No reply yet!

Anyone have an idea how long the turn-around is these days for a
simple Change of Address 610 to get processed?

>> > FCC Form 900 was scheduled to end August 9. Electronic vanity call
>> > sign application using Form 610V was to terminate August 13 at 5:30
>> > PM Eastern Time. Hams should not try to file renewal or vanity
>> > applications until the ULS comes up August 16.
>> >
>> > Before using the ULS to file an application, renew or modify a
>> > license, or apply for a vanity call sign, all amateurs must
>> > register. When registering, individuals eligible to hold a Social

>> > Security Number must provide this number--which the FCC refers to as
>> > a Taxpayer Information Number or TIN. This requirement is a mandate
>> > of Congress, not of the FCC. All hams must be registered in the ULS
>> > to do business with the FCC.
>> >
>> > Applicants use TIN Registration Form 606 for both electronic or
>> > manual registration. To register electronically, visit
>> > http://www.fcc.gov/wtb/uls/ and click on ''TIN/Call Sign
>> > Registration.'' A paper Form 606 is available at
>> > http://www.fcc.gov/formpage.html or by calling 800-418-FORM (3676).
>> >
>> > Applicants first register their Social Security Number (or TIN),
>> > then enter a call sign. Applicants also must specify a password and
>> > a personal identifier.
>> >
>> > Registrants receive a nine-character Licensee Identification Number.
>> > Amateurs may use this number in place of a Social Security Number in
>> > future dealings with the FCC.
>> >
>> > For now, applications for club, military recreation, and RACES
>> > licenses should be filed on the ''old'' FCC Form 610B. Trustees and
>> > custodians of these licenses should not use their personal Social
>> > Security Number as the TIN for these applications but should contact
>> > ULS Technical Support (202-414-1250) to obtain a FCC-generated
>> > identification number for Form 610B.
>> >
>> > Applications for new licenses or upgrades will continue to be filed
>> > through a Volunteer Examiner Coordinator. VECs will use a special
>> > NCVEC Form 605--a variation of Form 605--to file with the FCC for
>> > test sessions.
>> >
>> > Starting August 16, hams already registered in the ULS may file
>> > applications using the new FCC Form 605 electronically at any time
>> > of day, seven days a week. FCC Form 605 will be used for license
>> > renewals, modifications, cancellations, application withdrawals and
>> > amendments, as well as requests for a vanity call sign, duplicate
>> > license, change of address or other clerical license modification.
>> > Visit the WTB ULS page, http://www.fcc.gov/wtb/uls and click
>> > ''Connecting to ULS'' for information on accessing the ULS system.
>> > Accessing the ULS database requires a telephone modem. A toll-free
>> > number, 800-844-2784, connects users to the FCC's Wide Area Network.
>> >
>> > Among other things, the ULS features a renewal reminder sent 90 days
>> > prior to a license's expiration date. The ULS also simplifies the
>> > process of submitting fees to the FCC. The FCC said it also
>> > anticipates that the ULS will be capable of accepting credit card
>> > payments on-line ''in the near future.''

hi guys, dont mail anything to FCC anymore, as in the arrl bulletins, ham
radio has been included in the electronic filing system now, and during the
transition to the new electronic filing system, suspended responding to all
paperwork. Check out the arrl site to find specific instructions on how to
file address changes via the electronic (internet) filing. Good luck

I have for sale a 48' (sections) Rohn 25 G Tower. It is in good condition and is on the ground, ready to be picked up. To be sold altogether. Can be installed at 40 ft freestanding (no guys) or at 48 ft with guys. The tower is in Del Rio, Texas, local delivery if needed, Val Verde, Maverick or Kinney County only.

First $125.00 gets it.

Richard

For Sale Price Reduced:

TE Systems model 0510G 6 meter amplifier - 10W in and 170W out - has a gasfet preamp - $210

RF Concepts model RFC 4310 440 mhz amplifier - 30W in and 100W out - has a gasfet preamp - $235

Both of these units are in excellent condition. I am upgrading to two more powerful amplifiers for these bands. If you heard me on these bands during the recent VHF contest, you heard these amps at work.

Please contact via email - dry220@worldnet.att.net

I have a Icom 756 transceiver in like new condition for sale. Unit comes complete with original box, manual, schematic, and other paperwork. Has always been used inside ham shack, and kept covered when not in use. Was used as backup transceiver. Has the Icom MARS/CAP mod professinally installed and documented. This is a outstanding receiver offering a bult-in tuner, DSP, Auto-notch, and graphic display. Unit works and looks like new. $1475, and I will pay UPS shipping and insurance to anywhere in the US mainland.

Additional Specs from website: The ICOM IC-756 is an all mode HF and 6m transceiver. It has a 4.9" blue LCD and dot matrix display, and features selectable AGC, microprocessor controlled automatic antenna tuner which also covers 6m, built-in Digital Signal Processing, built-in CW memory keyer with auto-count and repeat functions, CW reverse, dual watch (monitors two frequencies in the same band simultaneously), 100 memory channels, microphone compressor, RF attenuator (four step), RIT/XIT, spectrum scope with selectable passband width offers a graphical display of activity up and down the band, SWR meter, transmit tone equalizer, triple band stacking registers, twin passband tuning, VOX, 100% duty cycle (HF & 6m), and much more!

Thank you!

Hi-
 I have a mint w/ box and manual the Alinco DR-140 T PKT packet radio.
THis radio came from alinco without a mobile bracket or mic. It has
feet for desktop use. Included it a cable with a RJ 45 end on it for
wiring your tnc.
Please see a picture and specs here:
http://www.alinco.com/Products/dr-140t.shtml

$140.00 shipped in the lower 48. OBO
Please use my reply to email.

Hello all,
I have a like new Alinco DJ-S41T 440Mhz HT
it was bought new a couple of months ago
I used it at a hamfest and put it back in the box
It works perfect and has box, manual and all paperwork
I also am including 6 NEXCELL rechargeable batts (two sets of three)
and a MAHA slow charger
I just need something with a little more horsepower!
So here it is to you for a reduced price
I would like $85 Shipped for All or trade for?????
The radio itself is $79.95 at AES
For more info or Pictures contact
tiny2nz@jorsm.com
Thanks Tiny

Hello group I have a Motorola base station power supply here it is 10 amp and a tough chassis color is black part#TPN1136A usually used for the MCX1000 radio but can work with any radio as long as you know what the positive and negative is! it looks like a 10 LBS. brick, I am asking for the best offer.....

thanks

For Sale:

RF Concepts model RFC 4-310 440 mhz amplifier - 30W in and 100W out - has a gasfet preamp - $235

This unit is in excellent condition. I am upgrading to a more powerful amplifier. If you heard me on during the September VHF contest, you heard this amp at work.

Please note that the TE Systems 6 meter amplifier that I had previously advertised has been sold. Thanks for the many inquiries on that one.

If interested in the RF Concepts amplifier, please contact via email - dry220@worldnet.att.net

I have three Motorola UHF Visars for sale. All are in nice condition, working correctly, with a Motorola Ultra High Capacity NiMH battery (model NTN7394), antenna and detachable belt clip/holster. One has the keypad option at
$350; two are without keypad option at $325 each.

I also have an 'as new' 6 gang Visar charger, model NTN7621C for sale. Immaculate except for some scratches on the bottom plate. Works perfectly. I believe the new price is in the $750 range. $325 including UPS shipping within the US. Would also consider working out a trade for a BP/BR base station duplexer at 460MHz. and/or a 16 channel UHF GP300.

Sunair GSL-1900A 1KW PEP or Average power RF Amplifiers covers 1.6 to
30MHz. Uses a single 4CX1500B and require a nominal 40 watts of drive.

Automatically tuned in a few seconds.

The power supply uses 115/230V/1PH/60Hz. These consist of LPA1900A RF Amplifier and PS-1900A Power supply. Total net weight 190 Lb.

Removed from military service in good condition UNTESTED with a set of plugs and a copy of the manual at $1,750.00 FOB Somis. Only a few of these very well built commercial/military grade units are left in stock.

There is a photo of this on our web site.

Hello,
  I have a barely used AOR 8200B scanner. This is one of the high end

multi-mode (USB/LSB/SSB/FM/N-NF/AM) scanners from AOR. It has some really great features. For full specifications, check out the link below.

http://www.aorusa.com/ar8200.html

I am looking to sell this quickly, so please make an offer. Buyer pays shipping COD or pre-pay. I hate to part with the unit, but we're buying a house and need all the money we can get.

Thanks,
Mark Carey

Hello,
  I have for sale a Startek ATH-50 Frequency Counter. It comes with the telescoping Ariel from Startek. It is an excellent frequency counter and is barely used. (Four times perhaps.) I am selling it to raise funding for a house, so it must go. Any reasonable offer will be accepted. Terms: Buyer pays shipping COD or pre-pays.

The ATH-50 has a range of 5Hz to 50 MHz and also 10 MHz to 2.8 GHz. The unit comes with Auto Triger and Hold mode. It also has three capture speeds ranging from 2.62 seconds to 0.08 seconds. The unit also comes with an internal NiCad battery and charger. The full manual is also included. The manual has full electrical/RF sensitivity and resolution specs. Original shipping materials included. I hate to part with it, but it's got to go.

Please feel free to request any additional information about the unit.

    Mark Carey.

Hello, I have one Yeasu VX-1R for sale. It includes the Car charger ($40 value) and spare Litium Ion battery ($50 value). I need to get $300 out of the unit. I wouldn't be selling it, but we're trying to raise money for a house, so it's got to go. For full specifications check out yeasu's web site. (I would provide the exact URL, but I can't seem to get to it right now.)

I also have a Diamond 144/430MHz antenna (Diamons model SRH519) that I will sell with the unit for $20 additional. If you have any further questions about the unit, please feel free to e-mail me.

    Thanks,
    Mark Carey.

I have several Collins 208U-3 3 KW 2-30Mhz RF Amplifiers. These are in good condition as removed from military service.

This is a military/commercial quality amplifier that uses a single 4CX3000A to produce KW PEP or average power with only 0.2 watts of input.

These are automatically tuned with a servo system that takes about 10 seconds to tuneup.

The primary power input is 200-250VAC, 3Ph, 47-60Hz.

The net weight is 975Lbs, size: 32" x 23" x 70" Tall.

If you have 3Ph power and the room one of these superb Amplifiers would make a great addition to your station.

I am offering these unpacked FOB Somis, CA as follows:

untested less the 4CX3000A Tube $2,750.00 unpacked.

I have a few tested and Guaranteed 4CX3000A tubes at $750.00

crating by a professional packer is $300.00 additional.

A complete service manual is included at no charge.

There is a photo of this item on our web site

If you need more info please contact me.

Content-Transfer-Encoding: 7bit

 I recently saw a 10m, all mode HT. on copper electronics website.
Has any one ever used or seen one of these. If so please comment
good or bad. It is refered to as a EAGLE SPITFIRE 454.   AM/FM/SSB
28-29.699MHZ. but supposedly modifiable to 26-29.699Mhz.

If its an OK radio, I might cosnider buying one,

If its OK but made in CHINA, They can keep it.

Please reply to breda@hom.net so I don't have to review
all RADIO news groups.

Thanks in advance.
Bill (KD6CZU)

Hello all,
I have a like new Alinco DJ-S41T 440Mhz HT
it was bought new about a month ago
I used it at a hamfest and put it back in the box
It works perfect and has box, manual and all paperwork
I also am including 6 NEXCELL rechargeable batts (two sets of three)
and a MAHA slow charger
I just need something with a little more power!
So here it is to you for a reduced price
I would like $80 Shipped for All
The radio itself is $79.95 at AES
For more info or Pictures contact
tiny2nz@jorsm.com
Thanks Tiny

I am needing to file an address change with the FCC. The form on the FCC
website, the last time I looked, is in PDF format. Does anyone know of an
editable format, such as a spreadsheet? It seems I once saw one on
Compuserve, but I no longer have that access.

Any help would be helpful.

Due to the new law, you will have to FIRST register with the FCC
surrendering your Social Security number or they will not accept
anything from you! No address change, no license upgrade, no forms,
nothing, until you first register with the new Universal licensing
system.

Besides, if you don't use the PDF file and try to do something with a
spreadsheet, it won't look like the form is supposed to, and the
government will stick their heads up their asses and refuse to accept
any forms that aren't exactly the way they like them.

This is the universal registration of the citizenry that so many sci fi stories have predicted.... Starting with those who 'have' to do business with the government and ending with everyone... Good or bad? I dunno, but you can see that the career politicians and bureaucrats have had their way via the back door... Retinal scans are likely to be required along with the registration in the very near future...

I have three Motorola UHF Visars for sale. All are in nice condition, working correctly, with a Motorola Ultra High Capacity NiMH battery (model NTN7394), antenna and detachable belt clip. One has the keypad option at $350; two are without keypad option at $325 each.

I also have an 'as new' 6 gang Visar charger, model NTN7621C for sale. Immaculate except for some scratches on the bottom plate. Works perfectly. I believe the new price is in the $750 range. $325 including UPS shipping within the US. Would also consider working out a trade for a BP/BR base station duplexer at 460MHz. and/or a 16 channel UHF GP300.

I am looking for a few Icom R7000 receivers.
No big hurry, the right radios priced right is what I'll buy.

Hello all,
I have a like new Alinco DJ-S41T 440Mhz HT
it was bought new about 3 months ago
I used it at a hamfest and put it back in the box
It works perfect and has box, manual and all paperwork
I also am including 6 NEXCELL rechargeable batts (two
sets of three) a MAHA slow charger, and a PREMIER spkr/mic (lapel
earbud type)
I just need something with a little more power!
So here it is to you for a reduced price
I would like $95 Shipped for All
For more info or Pictures contact
tiny2nz@jorsm.com
Thanks Tiny

For Sale -

Hallicrafters SX-130 - complete but not too pretty. This radio must have
been in the garage a few too many years as the slide rule dial lettering is
coming loose from the glass and the chassis is a bit rusty.. It would make
a good parts radio as it is complete with all of the original knobs, good

power transformer, i.f. cans, etc. Actually if a guy could re-do the dial somehow, it would be a good restoration candidate, I suppose.

I was able to change my address. It took some time because I did not want
to follow directions. But, when I did everything was fine.

Thanks

Boliver

For your information, the last time I did an address change was on an Excel
spreadsheet that looked exactly like the form 610. It had been approved by
the FCC. So it has been done.

As far as the Social Security Number issue, that unfortunately is how you
must deal with the government, not just the FCC. If in order to comply with
the law concerning a hobby that I enjoy I must reveal something that they
already have, so be it.

Thanks

Boliver

The Radio Shack rotor includes the control box. I just bought one
yesterday, so I am positive.

When I went to buy the rotor, a young girl wanted to wait on me. However,
she didn't even know what an antenna rotor was. SO - I told her if she
didn't know to get someone who did. By that time a fellow who worked in the
store had went to the shelf, picked up a rotor, and had it ready for me.

I noticed the girl was playing with a computer when I walked in. The boss
was working on a display and the young man was also working on a computer.
Seems that the boss should put the employees to work on the display instead
of letting them play on computers. The least they could do is look over the
stock to find out what they are supposed to sell. Perhaps they could find
out what an antenna rotor was.

Oh well, at least someone in the store knew what an antenna rotor was. With unemployment rate at about 2% in my town it must be tough to find savvy employees, at least for the money they pay. However, looks like the boss could be a bit more assertive in getting them steered in the right direction.

RADIO OPERATOR'S LICENSE Q&A MANUAL
Revised Ninth Edition
Milton Kaufman

Soft Cover, Hayden Books, 1982, 646 Pages.

This one-stop study guide covers all the information neces sary for the successful completion of
FCC examinations for radiotelephone operators. rhis Revised NinthEdition includes the very
latest revisions in the FCC Rules and Regulations.

The method of presentation is simple and easy-to-follow. Typical FCC-type questions are provided
for each element. Each question is followed by a clear and concise answer and, in many
instances, by discussions which enable the reader to acquire a thorough knowledge of specific
topics. Each element concludes with an FCC-type practice exam, with answers at the back of
the book.

An extensive section on troubleshooting, specially pre pared by the author, provides practice in
solving problems similar to those given on the FCC examinations.

This manual constitutes a valuable and complete refer ence by offering a review of essential

theory, as well as extracts from the FCC Rules and Regulations, the 1934 Com
munications Act,
and other important material.

MILTON KAUFMAN, well-known in the communications field, has written numerous
articles for
electronics magazines and now heads his own publications company. As Electronics
Illustrated
says, "Author Kaufman is King of the question and answers manuals and his works
have nurtured a
generation of FCC commercial radio operator exam-takers."

Did he tell you what the wind-loading area rating was? I haven't found a
Radio Shack employee who knows what I am talking about and it doesn't
seem to be listed on the box. Does the part number have anything to
do with the wind-loading area?

As a RadioShack manager I will tell you that I have seen our customer
expectation go from expecting our employees to know their stuff to expecting
them to know nothing. I think we are starting to swing back the other way.
I manage a store with three 10 year plus employees and we do know what we
are talking about and we train the new employees. I hate to see incidences
where customers are dissatisfied but hopefully everyone can find that Shack
where there are people with the answers.

Me, I got a simple system for Radio Shack. That is before I go, I check
the catalog -- and if I find what I want, I go to the store with the
catalog, and ask for that specific item.

Oh, and btw, I got a couple ArcherRotors and I turn my A3S with one.
It spins around in the wind a little, but aside from that is pretty
much no problem. (I go outside and eyeball which way the antenna
is pointing. That works good enough for me.) I've had this same
ArcherRotor on various smaller ham radio antennas for more than a decade,
and have a second one to turn a 2m/440mhz beam. The bolts rust up after
a decade or so -- but I was able to unscrew them and put in other bolts.

I'm looking for a filament transformer for an RCA SBA-1K amplifier or
reasonable substitute. It must be able to light a pair of 3-400Z's, 5VAC @
30A.
Please Email if you can help me out.

Oh, A3S is a small-ish HF antenna. Covers 20/15/10 meters. I hear
it's not as good as your C4 type of things, but definitely superior
to the Butterflies, and MiniQuad size antennas, which I have
tried. And, you know, even though it doesn't look that big in
the ham radio catalogs, when you're standing on the roof, with
this thing and a rotor on the end of 15 foot of mast, you get
a different perspective! (I believe Cushcraft has been
selling A3S's back into the ham radio stone age -- is my
recollection.)

Hay Len. That's pretty good. You can buy a new 15-1225 rotator from Radio
Shack for $64.99 and you want $70 for a used one. A good way to make a
profit..

Leonard Martin wrote:

This fits the Kenwood TM-742/741/73x triband series radios.
Will not fit on the TM-V7A radio - that needs the DFK-4c kit

Thanks

Motorola 6 pocket gang charger for Visar radio, model NTN7621C. I believe this is the current revision; it has a production date of July 1997. In as new condition except for a few scrapes on the bottom. Tested, and is working perfectly. New cost is somewhere in the $700 range.

$325 including shipping UPS CONUS.

I am getting out of the hobby, so no trade offers please.
I live in Dayton, OH for those close by.

For info from Kenwood's web site go to......
http://www.kenwood.net/products/index.cfm?AMA=open&ama_mob=open&radio=TM-742AD&selection=Amateur

My unit is the 742A model (not the 742AD). From what I've been told, the only difference
is the AD comes with a back lit mic.

The price is firm. It is priced at less than 50% of what I paid.
I will pay the UPS shipping to you (US only).

Contact.....   greggw@erinet.com

Motorola UHF Visars. In nice condition, with Motorola Ultra High Capacity
NiMH battery (model NTN7394), antenna and detachable belt clip. Have several
without keypad option at $325 each; one with keypad at $350. Would also
consider a trade for a BP/BR base station duplexer at 460MHz.

Frequency Range:
30-54, 118-136.975 AM, 137-174, 380-512,
806-824, 849-869, 894-960MHz

Triple Conversion Superheterodyne Tuning -
virtually eliminates intermediate frequency imaging interference (common to 800 MHz dual conversion receivers) so you can clearly hear only the scanner's received frequency.

Hyperscan - searches through unstored frequencies at 50 steps per second or scans stored channels at 25 channels per second.

Monitor Memory - lets you temporarily save up to ten frequencies you find during a frequency search so you can decide later if you want to store any of them into permanent channels.

Two-Second Scan Delay - delays scanning for about two seconds before moving to another channel so you can hear more replies.

Ten Channel Storage Banks - let you store 20 channels in each of 10 storage banks to group frequencies so you can easily identify calls.

Liquid-Crystal Display - shows the selected channel and frequency and the selected modes.

Memory Backup - protects the stations stored in your scanner's memory for up to 1 hour without the battery.

Lockout Function - lets you set your scanner to skip over specified channels.

Keylock - prevents you from accidentally changing the scanner's programming.

Priority Channel - lets you designate a channel to be scanned every two seconds so you do not miss important calls.

AM/FM Mode - automatically selects the most common reception type for the band you are scanning, and lets you override the default selection.

Battery-Saving Circuit - draws only 40% of the normal power.

Optional Power Sources - let you power the scanner from internal batteries, standard AC power, or from your vehicle's battery.

Ni-Cad Battery Charging Circuit - lets you recharge

nickel-cadmium batteries while they are inside the
battery compartment.

--- Basic Specifications ---

Scanning Rate ..... 25 Channels/Sec.
Search Rate ..... 50 Steps/Sec.
Priority Sampling ..... 2 seconds
Delay Time ..... 2 seconds
Antenna Impedance ..... 50 ohms
Power Requirement ..... +9 VDC, 6 AA batteries or a suitable
adapter (negative ground only)
Current Drain ..... 95 mA
Dimensions ..... 5.75H x 2.25W x 1.75D inches
Weight ..... Approx. 8.8 oz (250g)
(w/out ant. and batt.)

You didn't mention the specific band, 406-470 or 450-512Mhz?

Purchased this laptop about 1 month ago, my company purchased me another one less than 2 weeks ago. I'm looking to trade my laptop for a HF rig. Must be in excellent working condition as well as cosmetically good condition. MUST have built-in antenna tuner. 90's era radio's are all that I'm interested (other than possibly a TS-940SAT) that would also be considered.

Here is what I have.
Pentium 166 Mhz Laptop
16 Megs ram expandable to 80 megs
2.1 GIG hardrive
1.44 Floppy drive (swapable)

20 Speed CD Drive (Swapable)
12.1 Color Screen DSTN
56K PCMCIA Modem

Interested parties either email me at kc4oxp@flash.net
OR
Phone 770-867-5156 5pm-10pm EST

You are asking to much for to little. Laptops do not hold their value like HF rigs do. A new 300 mhz or faster laptop with 32 or more meg of ram can be had for 900 or less and they are falling fast in price. Yours would be about half of that or less used today.

hi all,
        for sale. gp300 (motorola) 16 channel commercial handheld.
450-500ish form memory. covers uhf cb no problems. drop in charger, car
drop in charger, 2 batteries (1 big 1 small), headset with boom mike,
etc. all this, programmed to whatever you like, ready to go, no more to
pay. and only for $500.

electrophone tx475 handheld cb radio. 40 channel, car charger,
speakermike, all for $200.

if interested, please e-mail, probably won't get to check the newsgroup
for replies. thanks,
            Aaron.

If someone has a extra manual for the Icom IC-737 that they arent using, or if someone would copy one for me I of course would pay for the charges. Is there some company that sells out of print manuals? Please email if you can assist.

73 Daniel KC4OXP
kc4oxp@flash.net

p.s. the most urgent question at the moment, is how to reset the radio!

The difference would be the Motorola is of commercial spec, and is probably
type approved for commercial use on company frequencies where a CB set is
not. This would make it saleable to a proffesional buyer.

You got that right.
A 5 year old laptop is worth worth zip.
The 20 year old radios still have good value.

hoo boy.. the mother-in-law room is full of stuff, the attic is full of
stuff,
the garage is half full of stuff, my office is half full of stuff.

Gotta get rid of some of this *great* stuff.

Sniff..... I adore every bit of this stuff, but some of it has to GO!

Please check out these auctions on eBay. All the starting prices are
loooow, and there are no reserve prices. Everything is marked down
to go, no exceptions. The garage has to be cleared out before
the snowflakes drop here (not too many more weeks).
The mother-in-law room has to be cleared out before she visits again.

Please help yourself to some of these goodies. Okay, not all of
them are to die for. For some you'd only tolerate light maiming.

I notice that the seller has changed his eBay ID recently -- maybe to ditch
some previous unfavorable comments? He's also quite quick to mention
that "Payment is to be recieved within 7 Days of close of Auction or
negative
feedback will be posted! "

Sounds marginal to me...

It is not always meaningful, but I am concerned with a seller with no
feedback, and a bidder with no feedback. In the past, (at times) that
combo has turned out to be illegal shill bidding. I have NO information
that this is happening now. But I have run into it in the past.

Gentlemen.

It's time for some good swops.

I have many tubes from the 1920-30's, and some WEHRMACHT ,
many power triodes , radar, traveling wave,micro wave , klystrons,
magnetrons etc.etc.

Most are New In Box.

I also have many 1920-30's radios to trade with.
Some 1940-50's recievers - Hammerlund,RCA etc.

Please , let me hear what you need.
I am interested in big power triodes. > 20Watt's of plate dissipation.

- Sincerely Kurt Steffensen

Looking for a used, cheap (or free :)) 6m radio to see if I would enjoy
it enough to want to fork out big money for a newer, better rig. Live in
middle Tenn. I hear a lot of people like it, but have no access to one to
try it for myself. Any constructive suggestions welcome!
Alex

I have forsale a National HRO-7 that is good looking and good working receiver.also have original manual,'doghouse' powersupply,matching speaker and coil sets(a,b,c,d,e,f). I would like this item to be picked up in phila,just to much to pack and to nostalgic to risk,plus you could operate

here. asking $400. John w3ayt@arrl.net

Will not ship so please don't ask.

Check out your area for a ham radio club to join - they exist in most
cities. A fellow member, or the club station, will no doubt have a 6 meter
rig you can try out.

13.8V, 8A continuous, 12A peak Nucleonic power supply. Has current meter, overvoltage protection, and foldback current limiting beyond 12A. Output voltage regulated to +- 200 mA for all design loads. Excellent condition cosmetically (It has an attractive brushed copper front panel) and operationally. I'm selling it because these days I spend more time on computers than hamming.

Price: $50 plus shipping (which will not be negligible, since it's well-made, that is to say, heavy. I have no means of measuring its weight accuratedly. I Will ship it parcel post if that's OK with you. If not pick method.

Includes brief manual.

I have the following items that I would like to sell as a package or possibly trade for some type of VHF/UHF equipment (dual band HT, mobile = rig,

base rig, etc.) or some type of 10 meter equipment or maybe even an older laptop:

Small Wonders Labs SW40+ 40 meter QRP CW transceiver. Has optional = factory
enclosure also has option Freq-Mite frequency counter. Currently set for = the
Novice section of 40 meters (easily changed to General & up portions of = the
band). Also includes a ten-turn pot that aids in tuning, but I have never gotten around to installing it as the factory pot has served me well.

NJ-QRP Club Rainbow Tuner with optional beautiful and 'bulletproof'
enclosure. This is an awesome QRP tuner which tunes a longwire for 40 = meter
operation. It is powered by an internal battery and uses four small = 'rainbow
colored' LEDs to indicate SWR. You can view details of the Rainbow Tuner = at
http://www.njqrp.org The tuner is also easily converted to operation on other bands through a kit which I believe the NJ QRP Club is still has available. Connection to the SW40+ is made through a short piece of coax with BNC connectors on each end, which would be included. The tuner automatically turns itself on when it sense RF and run hundreds of hours = on
the included battery.

Depending on what is offered, either financially or in trade, I also have = a
Vectronics keyer that has been built into a Radio Shack plastic enclosure that conatains an internal speaker for code practice and is adjustable = for
about 3wpm to about 30wpm. It is powered by a 9 volt battery.

I am 99% sure that I have manuals for all the above listed items and = would
also provide them with the equipment.

If anyone is interested, please feel free to email me. Thanks and 73!

Jeff

I AM POSTING THIS MESSAGE TO THIS NEWSGROUP AS I SEE ROLAND GETER CONDUCTING BUSINESS ON THIS NEWSGROUP. IT IS MEANT AS A WARNING TO THOSE CONSIDERING DOING BUSINESS WITH ROLAND GETER, I AM NOT LOOKING FOR FLAMES, REPLIES, ADVICE, ETC...THANKS

Hello Everyone,

On August 26, 1998, I posted a warning message about doing business with Roland S. Geter, Sr., WB6LNA. Mr. Geter posted a "wanted" message on the newsgroups in late June, 1998 for laptop computers for a "law enforcement" project. I e-mailed him about a Toshiba Pentium notebook I had for sale that was not working and needed minor repair. I specifically explained to him what was wrong with the notebook, we agreed on a price and Roland Geter agreed to pay shipping. He requested Fed Ex C.O.D. shipping, since he "did a lot of business with the shipping depot in Phoenix Arizona" and things would go a lot easier. It cost me $132.58 in shipping and C.O.D. charges to ship the package.

I shipped the package as per his specifications and request and advised him of such. When the package arrived in Arizona, Roland Geter failed to pick up the package as requested by Federal Express several times. After several days the package was returned to me less my shipping charges I had already paid.

After that, I contacted Roland Geter several times by e-mail and phone to no avail. He always told me he was sending payment but never did. I finally took further action in late August, 1998. I posted the original warning message, contacted the proper authorities and filed a formal complaint with the Maricopa County Sheriffs' Office in Arizona. Roland Geter had stated to me he was a deputy with that sheriffs' office, (which later proved to be false).

After a lot of pressure from many on the newsgroups and the sheriffs' office, Roland Geter contacted me in late September, 1998, to call a "truce" and settle our dispute. I had received several e-mails from others who had been ripped off by Roland Geter so he agreed to pay me and then "square up" with the others. At that time I also agreed to stop the pressure from the newsgroups and the sheriffs' office.

To make a long story short, to this day I still have not received

my money. I have tried to contact him several times a week to no avail. The others involved also have not received payment. I made the mistake of not doing a search on Deja News about Roland Geter, if I had, I would have found many others who ended up with the same fate as I did with my business dealings with Roland Geter.

I am posting this message to warn others of Roland Geter's bad dealings, i.e. bad checks, failed payments, bad trades, etc., that he has done to many, many others and myself. Do yourself a big favor, do not deal in any way with Roland S. Geter, Sr.

Piero

For Sale:

Complete Hallicrafters lineup consisting of HT-44 transmitter, SX-117 receiver, PS-150 power supply and all necessary interconnect cables for full transceive operation. All units work fine. Good output and audio reports from transmitter. Receiver is stable and sensitive. I would be glad to schedule a QSO on 20 or 75 for over-the-air checks. Original manuals are included.

I would like to sell as a set for $425.00 plus shipping. Would consider splitting up, if no takers on the complete set, so don't be afraid to ask.

This is a nice looking set and we've all seen the Ebay prices recently so here's a chance to get them at a more realistic price.

If you would have bothered to read the related earlier posts, you would
have seen there were other costs incurred in the shipping besides just
the FedEx charges. You would have also seen in the original posting you
replied to that Roland Geter AGREED to the costs involved before the
package was shipped. Roland Geter is a creep, he has ripped off more
people on these newsgroups then you could imagine. Be thankful this
guy is warning the rest of us so we don't get ripped off. Why don't you

get into a business agreement with Roland Geter and find out for your
self.

                  2 miles north of FM 1886.
Talk-in: 147.16- 110.9 phone, also APRS 144.39MHz,
             and packet BBS on 145.01
Call sign: WC5C
Open to Public Attendance.

300+ "radio active" attendees last year, in freezing rain. This year will be better (optimist mode).

There will be free educational events such as Skywarn class, and other demonstrations.

There will be a VE Test Session.

Note new lower prices:

$2/person attending
$5/outside flea market vendor space
$10/indoor table/ amateur radio vendor

Free coffee and donuts for vendors and event workers 5am-7am.

Reserve indoor table space ASAP, call Mary Lee KC5QJN (817)444-1342.
No reservation required for outdoor vendor or general admission attendees.

Buy, sell and swap items of interest to emergency communications team members.
Learn how to obtain your amateur radio license.
Learn how to participate in SKYWARN with the National Weather Service, Amateur Radio Emergency Service, Radio Amateur Civil Emergency Service, Disaster Reservists and more.

You company or club brochures and door prizes for NCTECH distribution are welcomed. Send to:
NCTECH Committee
c/o Mary Lee KC5QJN
222B North Broadway
Azle, Texas 76020

To add your class or demonstration to the education program, contact David KB5YLG at
(817)291-5816, or via email kb5ylg@yahoo.com.

To advertise your company or group's participation in NCTECH in the local newspaper, contact the Azle News at azlenews@aol.com.

RV and tent campers are invited to contact the Heritage RV Park to arrange optional accomodations.

Other attractions in the area: Historic Azle Main Street and Museum; Historic Weatherford; Numerous antiques and crafters' malls; Veal Station Historic Site of an Indian massacre of a girl's school; Eagle Mountain Lake with free admission park and boat ramp; Lake Weatherford with free shoreline park; 30 minutes drive to Historic Fort Worth Stockyards, and numerous attractions.

Hi All,

I just finished the restoration of two Heath AT-1 transmitters. I started

with four. I have a box of AT-1 parts that consists of most of two transmitters including transformers, chokes, front panels (one without extra holes), some of the tubes, coils,
knobs, two chassis and one cabinet. All as is, and available in one lot. I would like $50.00 shipped to your door in continental USA.

73,
Bob, N6CM

You CANNOT miss this deal if you are looking for a UHF/VHF HT!

I have for sale the following items-
An Icom W32A HT: The radio is in MINT/PERFECT condition! It has NO
dents, scratches, or other damage and no signs of wear. I have all of
the ORIGINAL documentation, including the manual which came with the
radio. I have its ORIGINAL box and all the paperwork for it. I
purchased it from Ham Radio Outlet in New Castle, Delaware about 1 year
ago. I am the ONLY owner of this radio and it was used as a backup
radio. The radio has had VERY LITTLE use and the battery has been
charged and discharged only twice. I have performed NO MODS at all on
the rig.

That is not all, however!

I am looking to sell with the radio-

An MFJ Dual Band 144/440 MHz Antenna which works well with the radio (model MFJ-1724B). I have the original packaging for the mag-mount antenna and it is in very good condition.

A MAHA Speaker/Mic which also works well with the radio (model MH-800). I have the ORIGINAL packaging for the spkr/mic as well.

An ICOM Power Cable which supplies power to the unit from another power supply or from a car's electrical system. A cigarette lighter attachment can be added for more portability. This power cable runs the rig AND charges its battery. It is double-fused and in good condition.

A Radio Shack Discone Antenna for outdoor use. The antenna has very wide receive and transmits on 2m and 70cm (440). Please note that I DO NOT have the cable for attachment between the radio and the discone antenna. That would have to be purchased/made separately.

If at all interested, please contact Mark at hr_rig@hotmail.com I am an individual selling one unit with all of these accessories. I AM NOT a reseller. Please feel free to email any questions, concerns, or requests to that email address as well.

All serious bids will be considered!

Mark - hr_rig@hotmail.com (if telephone works better, please email me here and we can set up a time to talk!)

ps. Of course, the wall charger, rubber duck antenna, and all other accessories which came with the unit are included. I even have the belt clip and wrist strap STILL IN THEIR ORIGINAL, FACTORY SEALED POUCH!!! Email me soon... hr_rig@hotmail.com

I have an original Heathkit HW-8 manual and a copy of the "Hot Water Handbook" for auction on eBay.

The URL is

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=146218405

and the description is

An *original* manual for the Heathkit HW-8 QRP transceiver PLUS a copy of the legendary HW-8 modification text, "The Hot Water Handbook" by Fred Bonavita W5QJM. The Heath manual is complete and includes the giant 25" x 17" schematic and all assembly fold-outs and diagrams. One small tear on the front cover, otherwise in excellent condition. The Hot Water Handbook has chapters on Keying Waveform modification, An audio amplifier add-on, RIT modification, variable drive control, a new receiver front end (a great mod !), break-in circuit modification, 30 meter modification, inboard active audio filter, linear amplifier brick, VFO improvement, plus many more chapters on souping up the HW-8. Some mods also applicable to the HW-7. With these two publications you can repair your HW-8 and make modifications that turn this little rig into a really fine radio.

Closes 8/22/99.

I also have a GR-64, 1985 handbook, and a copy of Ade Weiss' book "The History of QRP in the US" on eBay so please check my other auctions.

Thank-you.

I have a Heathkit GR-64 shortwave receiver for auction on eBay.

The URL is

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=146213481

and the blurb is

This is a Heath GR-64 superheterodyne general coverage tube-type communications receiver in excellent mechanical and electrical condition with spare tubes and whip antenna. Receives AM, CW and (with operator skill) SSB. There is an "extra" sticker on the back that I believe indicates that it was factory-built; at any rate it was assembled in an expert manner. The GR-64 (arguably) represents the pinacle of small tube-type receiver design, as it used a PC board to mount most parts and employed a solid-state power supply to cut down on internal heat, reduce warm-up drift, and prolong component life. This receiver also has a variable BFO and a noise limiter, both features not normally found on a small receiver. Covers .55 to 30 mHz, works well and includes spare tubes. Also included is a small whip antenna that I had mounted in one of the rear-panel ventilation holes; I removed it to make the radio "stock" but it can easily be remounted. Use of the whip antenna makes a "semi-portable" package that you can keep in a drawer until you're ready to listen, then put on your kitchen table to receive BBC and other international shortwave broadcasts. An outside antenna would provide better reception, but this radio does surprisingly well with only the small whip antenna. A small chip on the top of the front panel is the only noticable defect; no rust on case or chassis, knobs original and in good shape.

Closes 8/22/99.

I also have a HW-8 manual, 1985 handbook, and a copy of Ade Weiss' book
"The History of QRP in the US" on eBay so please check my other
auctions.

Thank-you.

You CANNOT miss this deal if you are looking for a UHF/VHF HT!

I have for sale the following items-
An Icom W32A HT: The radio is in MINT/PERFECT condition! It has NO dents, scratches, or other damage and no signs of wear. I have all of the ORIGINAL documentation, including the manual which came with the radio. I have its ORIGINAL box and all the paperwork for it. I purchased it from Ham Radio Outlet in New Castle, Delaware about 1 year ago. I am the ONLY owner of this radio and it was used as a backup radio. The radio has had VERY LITTLE use and the battery has been charged and discharged only twice. I have performed NO MODS at all on the rig.

That is not all, however!
I am looking to sell with the radio-

An MFJ Dual Band 144/440 MHz Antenna which works well with the radio (model MFJ-1724B). I have the original packaging for the mag-mount antenna and it is in very good condition.

A MAHA Speaker/Mic which also works well with the radio (model MH-800). I have the ORIGINAL packaging for the spkr/mic as well.

An ICOM Power Cable which supplies power to the unit from another power supply or from a car's electrical system. A cigarette lighter attachment can be added for more portability. This power cable runs the rig AND charges its battery. It is double-fused and in good condition.

A Radio Shack Discone Antenna for outdoor use. The antenna has very wide receive and transmits on 2m and 70cm (440). Please note that I DO NOT have the cable for attachment between the radio and the discone antenna. That would have to be purchased/made separately.

If at all interested, please contact Mark at hr_rig@hotmail.com I am an individual selling one unit with all of these accessories. I AM NOT a reseller. Please feel free to email any questions, concerns, or requests to that email address as well.

All serious bids will be considered!

Mark - hr_rig@hotmail.com (if telephone works better, please email me here and we can set up a time to talk!)

Of course, the battery wall charger and an original battery are included as well as all of the other parts in the original box!

These PS really are quiet and it amazes me something so small will run at 20
amps on transmit with hardly a whimper.

Two radios for sale:
Icom IC-T7A handheld $175
Radio Shack HTX-242 mobile $150

Both include original equipment in original box with manual. Both look and
work great. Prices include shipping (to US addresses).

See http://davisfamily.nu/icomt7a.htm for more picture and info on the T7A.

Might look at home intercom systems. Mine is rather nice and you can
get them with Cassette and I think now CD.

Yaesu FT-736R all mode. Standard 2 meters and 440mHz plus 220mHz + 6 meters modules. The condition of the radio is mint and with very little use.
The serial number is 3H730134.

The price is US$1250.00 plus shipping.

Dennis.

Dennis I am interested in your 736R... Could you send me your phone number so
that we may discuss the radio and funds exchange..

Wanted: LCD Display for older Bendix King VHF 14-channel HT. Need only LCD Display, not the keypad or display assembly. I believe the B/K part number is/was 043-0011-002. Date on the back of the display/keypad assembly is 1987. Key button color is white/clear. Stamped on back of circuit card is V-210.

Thanks in advance for your help!

Not sure why there is such little response to my previous postings. I guess no one is in the buying mood or there is truly no interest in what I have to offer or they just don't like posts from DejaVu . Just in case of the latter, I am posting from my personal email account in hopes that I can get some response to my ad.

SWAP/TRADE/SELL in Dallas/Ft Worth area
Yaesu FT901DM - non WARC band HF Tranceiver

Excellent condition. Email me your offer and we might work a deal. This rig is too nice not to be used and I cannot bear to see it taking up my closet space.

Surely, there is a Novice looking for a first time rig. If this is the case, I can make a special deal for you as long as it can be verified that you are a newly licensed Novice. This radio is much nicer than what I started out 22+ years ago.

Maybe you need a backup radio? This would make a nice one. Has everything built-in, AC supply, keyer, AF bandpass filter.....

Not a bad radio for the asking price of $300. Or, trade for "?". Or make a resonable cash/swap offer. A photo can be emailed to you upon request.

1) Yaesu FT901DM w/orig manual - $300 will not ship
LOCAL PICKUP ONLY - Dallas/Ft Worth Texas
2) Shure 526T II Desk Mic (NEW) - $120 shipped FEDEX CONUS ONLY
Discount for local pickup - $110
3) Sony ICF-SW100 w/acc., no box - $250 shipped FEDEX CONUS ONLY
Discount for local pickup - $240
4) MFJ-934 Tuner/Art Gnd w/man - $150 shipped FEDEX CONUS ONLY
Discount for local pickup - $140
5) MFJ-260C 300w Dummy Load - $30 shipped FEDEX CONUS ONLY
Discount for local pickup - $25
6) Johnson Viking Adventurer - FREE - LOCAL PICKUP ONLY
Only good for parts - rescued from previous owner who left in shed
7) Heathkit VF-1 - FREE - LOCAL PICKUP ONLY
Only good for parts - rescued from previous owner who left in shed

Items 6 & 7 above are "First Come, First Served". They where part of my
original Novice station that I operated 22+ years ago. I rescued them from
the previous owner who had left them in a shed and they have suffered
exposure damage. I had plans to restore them, but just do not have the time.
The Adventurer cabinet has some modifications that was done by the origianl
builder (of whom I do not know). Not sure the cabinet is worth restoring.

Willing to discuss trades for:
1) QRP/Kit radios/accessories,but must be able to inspect trades "first
hand" or via digital photo. Or, know the reputation of the builder. If still
in kit form, I will consider trade "sight unseen".
2) CW Paddles - No Bencher Please.

3) Pentium Computer system with floppy/hard drives, SB card, CDROM, 32MB or
more of memory. I do not need the monitor keyboard or mouse.
4) Desktop SW Band receivers. Later "Digital" models only please.
5) SW Band Active Antennas or SW Band tuners.
6) Bench 12V power supply. 20A or better.
7) VHF/UHF Allmode radio.
8) Yaesu FT90 Dualband radio - Yep, I know I'm dreaming.
9) Make me an offer, it can't hurt!

1) Sony ICF-SW100 w/acc., no box - $225 shipped FEDEX CONUS COD
    Discount for local pickup - $200
2) Johnson Viking Adventurer   -   FREE - LOCAL PICKUP ONLY
    Only good for parts - rescued from previous owner who left in shed
3) Heathkit VF-1   -   FREE - LOCAL PICKUP ONLY
    Only good for parts - rescued from previous owner who left in shed

Will swap item 1 for QRP gear.

Items 2 & 3 above are "First Come, First Served". They where part of my
original Novice station that I operated 22+ years ago. I rescued them from
the previous owner who had left them in a shed and they have suffered
exposure damage. I had plans to restore them, but just do not have the time.
The Adventurer cabinet has some modifications that was done by the origianl
builder (of whom I do not know). Not sure the cabinet is worth restoring.

Hi,

I have always wanted an HBR receiver since I saw one in the handbook
when I was a kid.

Do you have one you would consider parting with? Do you have any
leads on one for me.

Thanks

Bob

I would strongly suggest that everybody BOYCOTT this radio.

the owner has NO respect for this news group, as attested to by
his "BAIT" post, NOT mentioning ebay. if this person is this
DECEPTIVE, he would not hesitate to Screw the buyer.

Just my opinion

Bob

Hello Everyone,

I just wanted to drop a few names of some guys I have dealt with over the past few months who have been a real pleasure to deal with. The deal went through smoothly with lots of communication between parties and the parties involved were real gentlemen. I have dealt with these guys on the newsgroups and/or the For Sale/Swap mailing list at forsale-swap@qth.net.

These GOOD GUYS are:

W2KL - Louis Bocchetti
KA1SRD - Edward Rauer
KD1UX - Glenn Pike
KJ5NO - Brian Horst
KF2GG - Richard Schneider
N2KXX - Kevin Francis
N9KHI - Marc Mallett
W2TGP - Clifford Priebe
(call unknown) - Tony from Tony's Equipment

Thanks guys, it was a pleasure doing business with you.

73, Piero - N3FVG

Hello All,
I have for trade a MFJ 1278 Multimode TNC Has 10 modes and dual ports.
Includes all the cables, software and manuals. Has some scratches on top of
case but works well.

I would like to trade this for some sort of 10m fm radio, 2meter radio or a
kenwood DG-5 Digital display for my kenwood ts-520s. You may send email
me other offers you have for trade. Lets make a swap! E-mail me today!

I'm looking for an S-100 bus modem, like DC Hayes 80-103A or whatever S-100
bus modem you may have. I'd also be interested in an acoustic coupler modem
from the same era if you have one. Please reply to chipsndips@snet.net

Alan

The Cuyahoga Amateur Radio Society is offering a free service to the ham radio community to post no-fee items for auction. Auctions can last from 1 to 14 days, can contain reserve prices, and will automatically extend the auction for 5 minutes after the last bid. Posting is FREE!

We also are offering a free classified ad service. Again, posting is free to the ham radio community.

The ONLY restriction is that items must be of general interrest to the ham radio community.

These services are NEW as of now, so there is little posted.

Find the auction at http://www.cars.org/auction

Find the classifieds at http://www.cars.org/classifieds

e,rec.radio.swap

Now that my questions are answered (well most of them), I am looking for an
Eddystone 830 - SW and an 850 - LW receiver. Please email with what you
might have and what you are asking for it. I would like radios that are in
working order and look good and correct. I would also be interested in a
770R in similar condition.

I am located in the Hudson Valley and am willing to drive several hundred
miles for the right radios (including some parts of Canada). It gives me a
chance to enjoy a day without work and avoid shipping a 50 pound radio.

Sorry for the crossposting but not everyone receives some of the newsgroups.

Thanks

M Bryant

I have an RC-12 remote control unit (board for inside of radio and remote
control) in excellent condition.
VERY easy to install in your R7000.
$110 shipped

Are they still in business?

Need instruction manual(or copy), software and serial cable for the AEA

Model SWR-121 HF Analyst.

Thank you,

Rich

Hello Rich;

Try 1-800-258-7805. They are closing out the analyzer and this may be you last chance to pick up accessories.

I still have a few of the Samlex 1223 power supplies I got before the price increase.
I am willing to sell these BRAND NEW in the box (not refurbs!), 13.8 VDC @ 23AMPS continuous power supplies for $95 each + $6 shipping (48 state). I can ship anywhere in the world.
Only 3 lbs and RF QUIET for use on HF/VHF/UHF, whatever.

See http://radiodan.com/misc/samlex1223.htm

Hello , I have a VX-5 forsales. NEW CONDITION It's about 3 months old
a 9Dxxxxxx series ,and I have never had a problem with it.
It didn't do any hardware mods, I just use the Sofeware EVE to mods it. I'm
not use 6 meters at all since there has no 6M repeater.
and the main reason I selling it is I need the money for my school . It's
comes with radio,antenna, box ,manual , case(CSC-73), Rapid desk
charger(CD-15), Mic adapter(CT-44)and
the RS clip on belt clip. I don't want to give it up but

I need to pay by school for next year. I'm asking $349 + shipping.Thanks
you!! Victor iden1000@hotmail.com

     What is a difference between a Kenwood mike MC 80 and MC 50?
I need one for a farm radio station. I do have a MC 80. Can you check
for me the postage by US mail?

Thank you.
Vlad

I am selling my VX-5R Tri-Band HT. It has a serial number 9C. It is in excellent condition as I have only had it for a short time. I have not done any hardware mods to the radio only the EVE software mod. The radio has been in the soft case since purchase. It comes with all original documentation, box, antenna, li-ion battery , and wall wart charger. I will also include Yeasu soft case CSC-73, Diamond SRH-519 antenna with a grommet to cover the gap, Yaesu speaker mic MH34B4B, and ADMS 1E software with cable adapter. Original cost was over $460. I am asking $395 shipped to your door. If you have any questions feel free to e-mail me at the address below. Thanks for reading this and 73.

I am looking for a transverter for either 6 or 2 meters.
Must be 28 MHZ if if you have a 6 meter then 10 watts out is
fine if it is a 2 meter I need at least 25 watts.

Thanks for reading.

FS: YAESU FT901DM $350
DFW AREA ONLY

YAESU FT901DM (NON-WARC) $350
WITH:
Hand Mic - Yaesu (stock) no connector
Desk Mic - Shure 526T Series II
Original Manual - Good shape

Radio is in Very Good condition (9 of 10). The Shure Desk Mic is brand new, just installed it 2 weeks ago using the mic connector off the Hand Mic.

Selling the radio because I am going QRP/Homebrew and want to sell off my QRO equipment. I get more enjoyment from building and operating than using commercial equipment.

Would rather sell outright for cash, but willing to discuss trade for other QRP or Kit radios, CW paddles (no Bencher, please), or Station accessories.

If you would like a full discription of the Yaesu FT901DM, please click the URL below and scroll down to the proper section:

I have a few Samlex 23 amp continuous (25 amp peak) switching 13.8 VDC power
supply, only 3 pounds, very small and most important it is RF QUIET for HF
(or VHF/UHF). Brand new in the box, three year manufacturers warranty.

$95 + $6 shipping each. Once these are gone, they're gone.

To the price police who suggest other sources, they do NOT have any for less
and the current price from them is $119 + shipping, it was a special that
has come and gone.

Dan, I used an "L" shapped mounting bracket about 6 to 8 inches from the
front window on my Blazer. (Opposite side of the am/fm antenna) I also
did not wish to drill any holes. I works quite well. Then you have
your choice of hole mount antennas to pick from.

At ebay, I have a NEW in BOX ICOM IC PS-35 internal power supply (13.8 VDC @ 20 amp), very light and the only one made just for your radio! Keep it ICOM original!
NO reserve!

See http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=108852326

I have a BRAND NEW in BOX ICOM MT-100 antenna tuner.
Has dual meters for forward and reverse power.
Very rare, I can't think of when I've ever seen one of these available
before.
Low opening bid, NO RESERVE!
Matches older ICOM gear

Guys, guys, guys, simply look on the back cover of the HRO catalog. OR
better yet, go to www.search.com or www.altavista.com and type in FT90.
I found several places that show a picture of this new radio. I find it hard
to believe that you haven't tried a search engine yet...

Dan

FREE! FREE! FREE! FREE! FREE!

The Cuyahoga Amateur Radio Society is offering a free service to the ham radio community to post no-fee items for auction. Auctions can last from 1 to 14 days, can contain reserve prices, and will automatically extend the auction for 5 minutes after the last bid. Posting is FREE!

We also are offering a free classified ad service. Again, posting is free to the ham radio community. Advertisiments to the classifieds do not expire, however, if you sell your item, it would be appreciated if you delete the ad.

The ONLY restriction is that items must be of general interrest to the ham radio community.

These services are NEW as of now, so there is little posted. Please post and tell others about it!

Find the auction at http://www.cars.org/auction

Find the classifieds at http://www.cars.org/classifieds

The Swan 350's, no doubt one of Swan's most popular series of transceivers. I bought this radio because it was sold together with a Swan 500. I've decided to keep the 500 for my father and sell this 350.

Comes with a Swan hand mike, Swan 117 power supply, manual (copy) and an external Realistic speaker.

I have fired it up and have made contacts with it on SSB. My watt meter

shows in excess of 200 peak watts output on SSB.

MFJ1270C TNC - This tnc was bought for a packet node and was never used. Has been on air about 15 minutes. Manual included $75.00 shipped.

MFJ1278 Multimode TNC- I used this tnc on my home packet station for aprrox 7 years. Does have scratches on top cover where radio sat. Manual included. This model does not include pactor mode. $100.00 shipped.

I have a SX-100 with all but one of the main tuning
knobs original. Generally works fine, though the BFO

is a little iffy. Tuning mechanics are fine.

The calibrator case has been replaced with a new box
and the stem of the pitch control has been broken and a
piece welded on and a brass coupling added to which the
knob attaches. (looks OK but a little wobbly -- needs some
adjustment)

The cabinet is a mess. Two corners have suffered serious
denting and sloppy patching, another corner has bad chipping.
The top half of the front panel was repainted a non-original
sorta-close color and the surface was not well prepared.
The cover is intact but was painted a too-glossy sorta-close
silver.

The receiver looks fine from a distance (other than the obvious
non-original knob ... as you get closer the flaws begin to show.
(No, I didn't do any of the damage or any of the repairs.)

I have $70. in this (long story) and will sell it as a parts or
restoration rig or trade it for a Multi-Elmac PMR-7 in good
shape with a 6m converter (perhaps an old Ameco).
Note: I am looking for a compact boatanchor receiver
to match my Gonset Commander (160-6m AM/CW).

Thanks! & 73, DavidC K1YP@qsl.net or 603-894-1174

Mint 706MkII with DSP, separation cable, mounting bracket, mic, manual and

box. Would like to trade (plus $$$ obviously) for a IC-746 in similar condition. Let me know if you're interested - and how much $$$ you'd want in addition to the 706.

Tnx and 73

If I was in the market for an SX-100, DavidC, I'd be happy to buy
from an honest guy such as yourself who doesn't describe his gear
as being in "Rare, Mint Condition" (when it really ain't)! :)

73, and hope your SX-100 finds a new home soon,

-bill

I have two KaGOLD software for the Kantronics TNCs. For PC computers WIN 95/98, 3.xx, DOS, OS/2, (NO MAC!).
This is absolutely THE best software for all digital modes. I use this software myself on the KAM TNC.
AMTOR, PACTOR, G-TOR, RTTY, CW. Single port or full dual port support.
This is the version WITH PACTOR.
Too many features to list them all here.
Version 9. NEW, you are the first owner and user and you use the registration card. SEALED box.
Normally $99.95 + ship.

$68 DELIVERED price each.
I have two available.
Note: I also have one PkGOLD, same as above but for AEA TNCs, also $75 delivered.

HENRY 2K Classic X at ebay with low reserve!
See http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=110233287
New this amp has a HENRY list of $2695
Used these amps normally sell for $1600-2000.
Reserve on this amp is MUCH LOWER!
80-10 Meters (including WARC bands), pair of 3-500Z tubes, THE strongest power supply and RF deck for a pair of 3-500 tubes. Roller inductor tank (PI-L) for the ultimate in efficiency and tuning. EASILY loafs at 1500 watts in SSB/CW even RTTY!

Here's your chance to own a fully factory checked out and guaranteed HENRY for less.

I have an HDR300 Hy-Gain rotor that was up and not turned for a few years.
It is complete and looks nice inside. The control box looks very nice.
I did have to hacksaw the bracket on the shaft of the rotor partially to
remove the plate. The same bracket can be used as little damage was done to
it.
I have NOT plugged this in to see if it works.
I am selling this as-is but probably all Ok. It was used VERY little. this
was the rotor up at HENRY Radio store in West LA and not turned often.
This was the KING of rotors just a few years ago (over $1000).
$175 for the both rotor and control box. Plus shipping.
Credit cards OK

I have received my Winradio 1500i and now don't
required the WinRadio1000i which is in excellent
condition with latest drivers,manual etc.

I would like to trade it for a Eddystone
1990r(full UHF 220-400Mhz Range) or any
Watkin-Jonson set of the same in full working
order or even a good handheld or base station that
has full range facilities i.e. HF/UHF/VHF
ssb,am,fm etc. (MVT/AOR) to the same value as the
1000i, currently selling price is £260!

Or if you want to buy we can discuss a figure!
After a quick sale or exchange!
(Something different to mess with!)
Please email me at dean.ledger@port.ac.uk

Dean

The Swan 350's, no doubt one of Swan's most popular series of
transceivers. I bought this radio because it was sold together with a Swan
500. I've decided to keep the 500 for my father and sell this 350.

Comes with a Swan hand mike, Swan 117 power supply, manual (copy) and an
external Realistic speaker.

I have fired it up and have made contacts with it on SSB. My watt meter
shows in excess of 200 peak watts output on SSB.

I have a good condition and working Motorola Max Trac 100 mobile radio in the 42-50 MHz range. 2 channels.
Model # D51MJA93A5AK WITH serial number perfectly readable. Presently on 48.5 MHz, receive is <.2uv.
It measures 80 watts out on my service monitor.
With mounting bracket, short power cable, mic

$225 shipped to lower 48. I know this is a rare radio in the 42-50 MHz range, so first e-mail or call at 310 821-5244 (call only between 9AM-9PM PDT) gets it

I do NOT have software and CANNOT program for you. I do not know if it will go outside of the specified 42-50 MHz range. YOU determine suitability yourself before you buy.

Looking for an IC-706 MKII with DSP or the IC-706 MKIIG

Must be a full or partial trade for something from my site.

Take a peek at www.radiodan.com and www.radiodan.com/hamindex.htm
Need something I don't have on my site? Maybe I've got it or can get it.

I have TWO UT-28 modules that are NEW in BOX.
These will get you on 10M from your car with your Kenwood 742 or 642 triband
radio.
Get one for you and one for a buddy and have a contest to see who works more
on 10M on your drive home!
$225 each + ship or $400 for both + ship.

Credit cards OK

Hello,
Anyone have the new log-eqf v 9 yet? I was looking for a copy to try out but
it was not at log-eqf site yet. Also I have version does anyone have the
modules
for DXCC WAS and WAZ for version 8. I would like to check this out also.
Thanks!!

Steve,

For $49.95, you can check out version 9 all you want and you will not have to
copy anyone registered disks.

I got version 9 at Dayton and like Tom's earlier versions, Version 9 is
works great!

I have one 440-450 MHz module for the Yaesu 726.

$150 + ship.

Version 9 is not out as shareware (as I understand it). DXCC, WAS and WAZ are modules of the registered version only. Buy it, you'll like it!

I have Version 8 and have been asking for some of the things in 9 ever since
I got it. I looked at the ad and am singularly unimpressed. It is still a
dos program and still has no variable length or user configurable fields.

My opinion is

For contest use NOTHING beats Troll
For General Logging NOTHING beats Logic 5.

For me, that is what I will stick with.

AEA HF Antenna Analyzer

This is one of the best antenna testing units to come along in years. With it's digital readout, and ability to sweep a range of frequencies, antenna condition, SWR, feedpoint impedance, and losses can be determined in seconds.
Has output for capture on computer serial port (cable included!) for logging and monitoring antenna installations over time. Unit works perfectly and has seen little use.

Complete with carrying case, manuals, computer control cable and paperwork.

Payment must be received in certified funds or Postal Money Order prior to shippment. Buyer to pay shipping costs, your choice UPS or FedEX.

Tnx http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=98990222

Try Techamerica (www.techamerica.com). Just pulled their website and they show
them is stock for $159. Don't think you'll find a good used one for that.

Actually I've seen used ones on this list for $100, but far and few

between. I have this radio myself and like it very much.
Good Luck.

NEW!

The Cuyahoga Amateur Radio Society is offering a free service to the ham
radio community to post no-fee items for auction. Auctions can last from 1
to 14 days, can contain reserve prices, and will automatically extend the
auction for 5 minutes after the last bid. Posting is FREE!

We also are offering a free classified ad service. Again, posting is free

to the ham radio community.

The ONLY restriction is that items must be of general interrest to the ham radio community.

These services are NEW as of now, so there is little posted.

Find the auction at http://www.cars.org/auction

Find the classifieds at http://www.cars.org/classifieds

I see, Tony. Techamericas website it pretty nice, but the search
engine for finding anything is poor at best. They do have the DJ-C5.
Here's how to find it: Go to techamerica.com. From their homepage,
click on "online catalog". The screen you get next will be a tab
labeled "Online Catalog". Page down this tab to catagories and click
on "communications". The next screen will also have alist of catagories,
click on "amateur radio". Next screen: click "transceivers-handheld"
The first items listed are Standard radios. Page down to the 12th
item..."2m/440mhz credit card HT"...this is the Alinco DJ-C5T. They
have it for $159.95. Cheers,
Nate KL3NPIn article <7h77om$rk49@hpbs1500.boi.hp.com>,

Bought used last year, cleaned the traps and elements, but never did put it
together. (Decided it would dwarf my little crackerbox Cape...) Appears to
be in good shape - elements straight, etc., with manual.
Boxed for shipping (but it's heavy).

$175 pick-up or will deliver within 50 miles of Providence, RI.
$225 shipped CONUS.

Tnx and 73

I have some NEW IN BOX Samlex SEC1223 power supplies for sale.
RF QUIET!!! Great for 100 watt+ HF radios and VHF/UHF too!
This is really a great little power supply, small and light enough for
travel and DXpedition use and rugged enough for everyday fixed station use.
Rugged with UL approval and short/open circuit protection.
Will deliver up to 23AMPS continuos! THREE year mfrs warranty.
Great for travel as it accepts 100-130 VAC or can be switched at 200-260 VAC
50/60 Hz.
Available for a limited time at this price (less than dealer cost!), get
more than one at this price!
$95 + $6 ship lower 48. Can ship international!

See all the details at http://www.radiodan.com/misc/samlex1223.htm

You can get these at Tech America when they go on sale (frequently)
for $89.95

I have some NEW IN BOX Samlex SEC1223 power supplies for sale.

RF QUIET!!! Great for 100 watt+ HF radios and VHF/UHF too!
This is really a great little power supply, small and light enough for
travel and DXpedition use and rugged enough for everyday fixed station use.
Rugged with UL approval and short/open circuit protection.
Will deliver up to 23AMPS continuos! THREE year mfrs warranty.
Great for travel as it accepts 100-130 VAC or can be switched at 200-260 VAC
50/60 Hz.
Available for a limited time at this price (less than dealer cost!), get
more than one at this price!
$95 + $6 ship lower 48. Can ship international!

See all the details at http://www.radiodan.com/misc/samlex1223.htm

The Techamerica price is $119.95 + shipping.

They are NOT available from any place that I know of for less than $119.95.

These are really great power supplies at a terrific price!
Radiodan price is $95 + $6 shipping. NEW IN BOX with 3 year mfrs warranty.

Techamerica price is $119.95!!

Call them and see!

My Price is very fair at $95 for the 23AMP Samlex power supply (3 pounds,
very small).

I see many "price police" out here with incorrect info.

Yes, I do think you price is fair! HRO is a little better. I for one am glad their is a "price police" out their provided they are correct. If I am buying it helps me to make an informed purchase. If I am selling it keeps me honest and fair.

So to all those "price police" thanks!!!!! Keep up the good work!

Hi,

I would go with the Kenwood radio. The TH-D7A is wonderful for APRS.
The TH-G71A is a great HT also. I own both. If I was not doing APRS I
would use the TH-G71A with an external TNC.

I have again put on auction on ebay a receiver seldom seen: a "very scarce" (as
Fred Osterman puts it)Hammarlund HQ-215. This 80-10 Ham band only receiver can
be "expanded" by plugging in crystal in 13 available sockets.
At the moment, with the unit, several optional crystals are furnished to cover the WARC bands.
I had to relist because the highest bidder, w0ogm, paid with a "rubber" check. Here's the link:
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=106860971
Thank you very much for the bandwidth!

Motorola 6 pocket gang charger for Visar radio, model NTN7621C. I believe this is the current revision; it has a production date of July 1997. In as new condition except for a few scrapes on the bottom. Tested, and is working perfectly. New cost is somewhere in the $700 range.

$350 including shipping UPS CONUS.

I have a BRAND NEW Eimac 5CX1500A

Stored at HENRY RADIO. Tube has been tested and works perfectly.
While it has been plugged in and tested, it has ZERO hours on it.
Ted Henry will verify this.

$295 + ship

Pay with credit card and be safe. Guaranteeed good tube with full output.

Yes, it's the latest and smallest dual band mobile ever made.
BRAND NEW in BOX.
Full warranty. Same as if you bought at your local ham store only cheaper!
Just won it at my local radio club raffle tonight and don't have a need for
it myself.

$360 including shipping to lower 48.
Only ONE.
First confirmed e-mail or phone call at 310 821-5244 (call ONLY between
9AM-9PM California time)

Which direction do the radios face when all 6 are plugged in? If they face
forward how long is the charger? If they stack like dominos, what is the
length and width?

I have some NEW IN BOX Samlex SEC1223 power supplies for sale.

RF QUIET!!! Great for 100 watt+ HF radios and VHF/UHF too!
This is really a great little power supply, small and light enough for
travel and DXpedition use and rugged enough for everyday fixed station use.
Rugged with UL approval and short/open circuit protection.
Will deliver up to 23AMPS continuos! THREE year mfrs warranty.
Great for travel as it accepts 100-130 VAC or can be switched for 200-260
VAC
50/60 Hz.
Available while I still have a few left at this price (less than dealer
cost!), get
more than one at this price!
$95 + $6 ship lower 48. Can ship international!

See all the details at http://www.radiodan.com/misc/samlex1223.htm

Good evening from Vienna!

Anyone can tell me what "NO COD" means ?

Greetings. Kurt.

It means no Collect On Delivery. In otherwords, you must pay for the item
before it is sent to you. This can be risky if you don't know who you're
dealing with...Dale

Kurt,

At a fish market "NO COD" means they are out of cod fish. ;-)

73,

Marv

What's the best 2 meter mobile antenna that I could purchase to be placed on
a Dodge Dakota truck - Really don't want to drill holes. Any suggestions
would be appreciated.

Hi Daniel,

I use an MFJ mag mount 5/8 wave, Model 1728B. It's actually a 5/8wave
on 2m, and 1/4wave on 6m. I wouldn't say that it is the "best"
solution, but it works great and the price is right (about $25).

I have the new version 9. of Log-EQF. Best logging program I have ever used.
To get a complete working version only costs 35.00 and the complete Rig-EQF is
only 20.00. Well worth the really low price. Not fair to steal a man's
creation from him.

Hello!

Wanted: Motorola MITREK PL element: 127.3 Hz.

I believe that this is a ceramic substrate single inline package (SIP)
that plugs into a PL board. I have 141.3 elements to trade if you need
one.

Thanks very much for your help!

Steve KC6IJM

I have been chosen by my Radio Club (WARC) to buy our next new HF radio for
the club station at the WLA Veterans Administration Red Cross site.

I can spend $750 for a good used TS-570.

I MAY consider other late model HF radios. MUST have a radio that runs on 12
VDC, built in antenna tuner, less than 5 years old.
I know what a good deal is, no need to offer a TS-440 for $800!

We're in no hurry.....

Last 10 hours on ebay for the excellent condition 2K Classic X 80-10M
amplifier.

VERY heavy duty power supply and RF deck. Using a pair of 3-500 tubes, it is
THE strongest amplifier using these tubes.

See auction at

I have a nice Kenwood TS850SAT that I traded for from Murray on
rec.radio.swap. I have it listed for $975.00 plus shipping but I will
sell it to you for your radio club for $875.00 and I will pay shipping
to you. I will even take one of your SP-8 speakers that matches my 920
in trade.
I have the box, book, mike and dc cord. It is a 9+ . But it is probly
over 5 years old. I did not see that in your email till I had already
typed down to here. :-)
Catch ya later

THIS REALLY CAN MAKE YOU EASY MONEY!! ITWORKS!!! BUT YOU HAVE TO
FOLLOW IT TO A LETTER FOR IT TO WORK!!!! A little while back, I was browsing
through
newsgroups, just like you
: are now, and came across an article similar to this that
: said you could
: make thousands of dollars within weeks with only an
: initial investment
: of $6.00! So I thought," Yeah, right, this must be a
: scam", but like
: most of us, I was curious, so I kept reading.
: Anyway, it said that you send $1.00 to each of the 6
: names and address
: stated in the article. You then place your own name
: and address in the
: bottom of the list at #6, and post the article in at least
: 200
: newsgroups. (There are thousands) No catch, that
: was it. So after
: thinking it over, and talking to a few people first, I
: thought about
: trying it. I figured what have I got to lose except 6
: stamps and $6.00,
: right? Like most of us I was a little skeptical and a little
: worried
: about the legal aspects of it
: all. So I checked it out with the U.S. Post Office
: (1-800-725-2161) and

: they confirmed that it is indeed legal! Then I invested
: the measly
: $6.00. Well GUESS WHAT!!... within 7 days, I started
: getting money in
: the mail! I was shocked! I figured it would end soon,
: but the money just
: kept coming in. In my first week, I made about $25.00.
: By the end of the
: second week I had made a total of over $1,000.00! In
: the third week I
: had over $10,000.00 and it's still growing. This is now
: my fourth week
: and I have made a total of just over $42,000.00 and it's
: still coming in
: rapidly. It's
: certainly worth $6.00, and 6 stamps, I have spent more
: than that on the
: lottery!!
: Let me tell you how this works and most importantly,
: why it
: works....also, make sure you print a copy of this article
: NOW, so you
: can get the information off of it as you need it. STEP 1:
: Get 6 separate
: pieces of paper and write the following on each piece
: of paper "PLEASE
: PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00
: bills and place ONE
: inside EACH of the 6 pieces of paper so the bill will not
: be seen
: through the envelope to prevent thievery. Next, place
: one paper in each
: of the 6 envelopes and seal them. You should now
: have 6 sealed
: envelopes, each with a
: piece of paper stating the above phrase, your name
: and address, and a
: $1.00 bill. What you are doing is creating a service by
: this. THIS IS
: ABSOLUTELY LEGAL! Mail the 6 envelopes to the
: following addresses:
:

STEP 2: Now take the #1 name off the list that you see
: above, move the
: other names up (6 becomes 5, 5 becomes 4, etc...) and
: add YOUR Name as
: number 6 on the list. STEP 3: Change anything you
: need to, but try to
: keep this article as close to original as possible. Now,
: post your
: amended article to at least 200 newsgroups. (I think
: there are close to
: 24,000 groups) All you need is 200, but remember, the
: more you post, the
: more money you make! ---DIRECTIONS -----HOW TO
: POST TO
: NEWSGROUPS---------- Step 1) You do not need to
: re-type this entire
: letter to do your own posting. Simply put your cursor
: at the beginning
: of this letter and drag your
: cursor to the bottom of this document, and select
: 'copy' from the edit
: menu. This will copy the entire letter into the
: computers memory. Step
: 2) Open a blank 'notepad' file and place your cursor at
: the top of the
: blank page. From the 'edit' menu select 'paste'. This
: will paste a copy
: of the letter into notepad so that you can add your
: name to the list.
: Step 3) Save your new notepad file as a .txt file. If you
: want to do
: your postings in different sittings, you'll always have
: this file to go
: back to.
: Step 4) Use Netscape or Internet explorer and try
: searching for various
: newsgroups (on-line

: forums, message boards, chat sites, discussions.)
: Step 5) Visit these
: message boards and post this article as a new
: message by highlighting
: the text of this letter and selecting paste from the edit
: menu. Fill in
: the Subject, this will be the header that everyone sees
: as they scroll
: through the list of postings in a particular group, click
: the post
: message button. You're done with your first one!
: Congratulations...THAT'S IT! All you have to do is jump
: to different
: newsgroupes and post away, after you get the hang of
: it, it will take
: about 30 seconds for each newsgroup! **REMEMBER,
: THE MORE NEWSGROUPS YOU
: POST IN, THE MORE MONEY YOU WILL MAKE!! BUT
: YOU HAVE TO POST A MINIMUM
: OF 200** That's it! You will begin reciving money from
: around the world
: within days! You may eventually want to rent a
: P.O.Box due to the large
: amount of mail you will receive. If you wish to stay
: anonymous, you can
: invent a name to use, as
: long as the postman will deliver it. **JUST MAKE SURE
: ALL THE ADDRESSES
: ARE CORRECT.**
: Now the WHY part: Out of 200 postings, say I receive
: only 5 replies (a
: very low example). So then I made $5.00 with my name
: at #6 on the
: letter. Now, each of the 5 persons who just sent me
: $1.00 make the
: MINIMUM 200 postings, each with my name at #5 and
: only 5 persons respond
: to each of the original 5, that is another $25.00 for me,
: now those 25
: each make 200 MINIMUM posts with my name at #4
: and only 5 replies each,
: I will bring in an additional
: $125.00! Now, those 125 persons turn around and post
: the MINIMUM 200
: with my name at #3 and only receive 5 replies each, I
: will make an
: additional $625.00! OK, now here is the fun part, each
: of those 625
: persons post a MINIMUM 200 letters with my name at
: #2 and they each only
: receive 5 replies, that just made me $3,125.00!!! Those
: 3,125 persons
: will all deliver this message to 200 newsgroups with

: my name at #1 and
: if still 5 persons per 200 newsgroups react I will
: receive $15,625.00!
: With a original investment of only $6.00! AMAZING!
: When your name is no
: longer on the list, you just take the latest posting in the
: newsgroups,
: and send out another $6.00 to names on the list,
: putting your name at
: number 6 again. And start posting again. The thing to
: remember is, do

1 1/2 year old Icom Icom 756 HF and 6 meter transceiver. With internal
antenna tuner. Has the optional voice module installed.

MARS/CAP mods professionally done.

Unit is like new, with no scratches or damage. Functions 100% like new rig.
Complete with all paperwork, manuals, and original box.

Reason for selling, I do mostly AM activity on older boatanchor gear.
Located in Buffalo, NY, you can stop by for inspection if desired.

Will professionally pack and ship anywhere in the United States.

$1600.00 + UPS shipping to your postal code.

Image and specs of transceiver on the Icom site
http://www.icomamerica.com/amateur/hf/IC-756.html

Any questions just email.

Tnx

73,

Bruce KG2IC

Kenwood TH28A 2 Meter HT

Transmit 144-148 MHZ
Receive 136-173 MHZ

This unit is also dual band receive - It receive the 440 band and may
be used as a crossband repeater - receive on 440 and transmit on
2 Meters.

Have HT, battery pack, wall charger, alkaline battery case, 12 volt
power cord, manual and original box.

The unit has a flexible antenna, not the original solid rubber duck.
The antenna works great with the unit.

$125.00 shipped.

Get on 10M and have lots of fun! Use you Kenwood 641/642/741/742 radio. This module fits inside as the "third" band.
Model UT-28S.
Sunspots are still on the rise and you will have terrific propagation on 10M for at least the next 4 years!

I have two of these BRAND NEW in the box! Never used or installed.

$225 each or both for $400 + ship.
Credit cards OK!

HF Antenna Tuner, very heavy duty

Click here for link ->
http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=115299903

Antenna Tuner (Transmatch)

HF Antenna Tuner. Homebrew, but better than commercial quality. Built with broadcast transmitter parts. Vacuum variable caps, and large roller inductor. Unit is housed in black instrument case, about 19" wide and 12" in depth.
Range: Covers 160-10 meters, will match a very wide range of loads. Tuning

is not limited to the amateur frequencies as inductor and caps are not fixed, continuously variable.

Features: Turns counters on both vacuum variable capacitors, using the tuning/loading mechanism of a T-368 transmitter. Roller inductor, also with turns counter, is operated by motor with gearbox, using front panel momentary contact switches. Indicator light shows motor operation. Tuner can be bypassed via relay using front panel switch. Indicator shows tuner in/out condition. Front panel Power meter shows both forward and reflected power using internal bridge unit. Meter range is adjustable using front panel mounted potentiometer. Unit runs off 110vac, and is supplied with 3-wire line cord. Front panel is low gloss black with white control lettering.

Construction: QRO away! RF connections are mounted on the rear bulkhead using SO-239 jacks. Builder of the unit claims power handing capability of 5000 watts, and looking at the construction of the unit, liberal use of heavy strapping and broadcast quality components, I believe it. This unit makes the MFJ, Palstar and Nye tuners look like QRP.

Use: Was used with my T-368 for over 1 year, working flawlessly. I have seen many antenna tuners, amateur, commercial and military, and none have the heavy-duty constitution of this unit.

Any questions, just email!

Tnx

Kenwood TM-V7A in excellent condition. Comes with DFK-4C Front Panel Kit.
Not sure if I can find the box and the mobile bracket which is in the box.
If I can find it, I'll mail it to you later.
Asking $350 without box and mobile bracket.

Buyer pays shipping.
Please e-mail for more info.
Thanks
Chad

Hello,
I have for trade a MFJ 1278 Multi-mode TNC with multi gray level modem.
Includes all the cables Manuals and software. The software is Multicom
MFJ1289 modes are :
pactor
HF packet
VHF Packet
RTTY
ASCII
FAX/Color Fax
CW
Amtor
Navtex and color slow scan
This is a great TNC for these modes also has mail box cw mem keyer and more!
I would like to trade this for some Kenwood ts-520s assecories Iam
looking for a Kenwood DG-5 Digital display. Or send me a email with what you
have to offer to kb9hgi@qsl.net Thanks!!!

I have a VHF Saber I Securenet HT (5d core) and am "new" to the Saber
world. I was curious if the 2 buttons below the PTT are programmable
through RSS? I don't recall seeing anything addressing these buttons
when the radio was being programmed. Is is possibly a function of the
RSS version, or the P/N (capability)of the actual radio?

Thanks in advance for your help!

Steve KC6IJM

Those are the RAT buttons (repeater access) they are programmable through
the software but you have to have certain options turn on to use them.

They are used as RAT buttons for a 6D core radio. With a 5D core radio,
they have no function at all.

I have a number of tubes for sale on eBay. I've been posting them in grouped lots, some groupings containing dissimilar tubes but that are usually linked circuit-wise like the 6V6GT/5W4GT. Some of these lots are spare tubes I've had from the 60's. Others (mostly the Mil. Spec. ones) are from the estate of a ham radio operator. Each of the eBay listings has a picture of the item up for auction. This list will be revised periodically or I can be contacted at: mailto:mannion@snet.net or my Reply To: address.

Thank you for your time. - Tom

Many of us up here will decline to make a purchase from the US if they insist on
using UPS for just that reason.

I got ding $145 brokerage on a $600 item once. I have found the US postal service
to be one of the best ways
to get stuff accross the 49th parallel.

Paul VE6LDS from the other side of the story

No problems with postal service though, keep in mind that UPS is in the Business of extorting money out of you at every possible chance. They dont get my business anymore, I send and receive parcels from the US via Mail, no brokerage fee. Mind you it limits what can be shipped.

just my opinion.

This does not apply to amateur radio equipment. There's NO duty on ham
equipment. Otherwise for all other stuff there's Duty about 5-10% and
taxes about 7-8%. Then if you use a broker it cost even more. If they
think you claimed too low they can appraise it for you at a using some
rediculous method. If they catch you tring to hide it in a car they can
impound the car and charge you double duty and taxes to get your item
back or it goes to auction. Remember to mark whatever you are sending
clearly "AMATEUR RADIO EQUIPMENT" 73 Chris

It is my understanding that there is an exemption of some type for amateur radio
equipment purchased for personal use (not resale). It's been a while and I don't
remember the details but I purchased a PTC-II from SCS in Germany for $900 plus
and was
not accessed any import duties on it.

I'm looking for an S-100 bus modem. Yes, honest, S-100 bus, 300 baud modem. I want to add it to an S-100 bus system I have and add one to my display wall at work where I have a number of S-100 items. Any S-100 bus modem you may have in that box of wires in the shack. I'll buy it from ya. I'd also be interested in an acoustic modem (coupler) if you have one of those.
Please reply to me directly at chipsndips@snet.net.
Thanks.

Alan

X-Http-User-Agent: Mozilla/4.5 [en] (Win98; I)

Quantity of 10 New NiCd battery packs at Ebay. to find the auction first go here:

http://cgi3.ebay.com/aw-cgi/eBayISAPI.dll?ViewListedItems&userid=boatman9&sort=3&since=-1&page=1&rows=0

then select the auction hyper-link for the batteries.

These are Mitsubishi cellular telephone battery packs. Each pack contains five (5) size AA Nickel Cadmium rechargeable batteries. These are rated by the manufacturer at 850 MilliAmp hours. Since each cell is nominally 1.2 volts the entire pack is a 6 volts. These packs can be used by soldering onto the terminals or you can cut them open and remove the cells for use individually.

Connection to a digital camera can be made by soldering a small power cord onto the battery's positive and negative terminals and then attach the correct plug for your camera on the other end of the cord. Since the batteries are 850 mAH the correct charge rate is 85 MilliAmp for 14 to 16 hours. If you use the batteries individually you can simply charge them using an ordinary AA NiCd charger.

You get 10 of these packs for one price.

I have a near mint R-7000 (Taiwan model) which I believe was the very
last model of the Trans-Oceanic radio loved by millions for several
decades. I am considering selling it because I saw a new amateur rig
that I fell in love with and the only way I can get it is to either
sell the T.O. or work a trade with the dealer (if he is willing). To
do either, I would need to know the fair market value range for a unit
with the original box, packing, sales slip and is about a 9 to 9.5 out
of 10 on the condition scale. If anyone out there is an expert in this
area, I would consider it a kind favor for some advice. Thanks and
have a nice day.

Post a photograph of the unit Ray, sometimes us older guys need our memory
jogged a bit :o)

I'll give you $350 for it. I'll overnight a USPS money order; you'll
have it tomorrow. Ok? Thanks.

Hi,

I am looking for a FM board for my Kenwood TS930s. If you have one, or know where there is one available for sale at a reasonable price can you please let me know via Email to: timj@omen.net.au as I do not browse the news groups very often.

Thanks.

Tim. VK6EI Perth, Western Australia

PS I am will to pay shipping costs etc. from where you are.

I have on action on ebay a receiver seldom seen: a "very scarce" (as
Fred Osterman puts it)
Hammarlund HQ-215. This 80-10 Ham band only receiver can be "expanded"
by plugging in crystal in 13 available sockets. At the moment, with the
unit, several optional crystals are furnished to cover the WARC bands.
The reserve is $400.
Thank you very much for the bandwidth!

Hi, Guys,
A little over a year ago I bought two used Sony portable receivers from a guy in New Brunswick. He shipped them via UPS and when he filled out the customs forms, he declared them in detail by brand name, model, and country of manufacture. Naturally, the package was delayed over two weeks by customs at the border and I was assessed around $37 in several sorts of brokerage, release, and import duties and fees. I called and straightened it out with UPS and they fixed the problem.

When you send a piece of gear across the border, whether you ship via UPS, FedEX, or either country's postal service, here's how to avoid all those customs and brokerage and import duties and delays. When the customs form asks for a declaration of the contents, list it as something generic and innocuous like, "Used portable radio receiver," "Used amateur radio equipment," "gift."

Where it asks for a declaration of value, write in something like, "No commercial value," or "No Retail Value."
I've always done that regardless of where I shipped any items where a customs form was required to be filled out declaring contents and/or value. It works every time. I have used such wording when sending items to Australia, New Zealand, Germany, Austria, Sweden, Switzerland, and the United Kingdom as well as to Canada.

If you ship by US parcel post you will have no problems or broker fees
(as UPS and FED-EX),you do not have duties for ham or electronic
equipment(free trade)but we here pay taxes on declared value,in US you
do not pay taxes unless 500.00 if I remember well

Tim, you're way out of line. First you spam this message to every radio
newsgroup under the sun (I suggest you read up on newsgroup etiquette for
newbies) and then you insult everyone in the newsgroup rec...antenna

And why would anyone want to exchange emails directly with you anyway if
you're such a clod?

Yes, you have a great day down under mate.

Tim wrote in message <371A8C2B.2E374305@omen.net.au>...
>Sorry mate, didnt realise that the ad would upset people (youre the only

Collection of ARRL Handbooks, 25 issues in all. Some duplicates as noted.

Due to the number, and my desire not to pack and ship separately, I have listed as a group using the following criteria:
Scale: ->
Excellent- Near New ->
Very Good- Slight binding cracks, slight folds, binding in good shape, no tears or damage ->
Good- Normal wear for age ->
Fair- Showing some wear

1942 Very Good
1945 Fair but cover is loose
1946 Good but small tear on binding cover
1946 Good
1947 Fair
1947 Good
1947 Fair
1950 Good

T-195 Military Transmitters, Package of 2
Designed by Collins Radio, the T-195 is often found paired with the R392 receiver. An exceptionally heavy-duty transmitter, the T-195 is both waterproof and shockproof. By using two car batteries in series, the transmitter is perfect for vehicle use, or as a field day transmitter.

This package includes 2 of these transmitters. Both are in very good condition. As per most "de-milled" equipment, the meters have been removed. They have been replaced in one of the units. One unit makes full RF output; the other seems to have a problem with the Auto-Tune mech. I understand from Electric Radio that often these problems are a result of poor connections on the modules.

This heavy-duty transmitter covers 1.5-20MHz continuous. RF Power output is a solid 80-100W with nice sounding plate modulated AM. Emission modes are AM and CW.

Frequency coverage is in 4 bands using a Collins PTO. The unit features antenna Auto-Tuning, with two choices of antenna connections depending on feedpoint impedance.

Final tube uses a 4X150D, and 2-4X150D are used as modulators.

Dimensions are 11.5h X 22w X 14.25d. Weight is 135 lbs. Power requirement is 28VDC 42amps.

Due to the weight, the buyer must pick up in the Buffalo, NY area, or arrange pickup, crating and shipping at his/her cost.

Payment must be received in Postal Money Order, or Bank Check prior to shipping.

As always if you have any questions just email.

Tnx

73,

Bruce KG2IC

Hi,
    I'm after any kind of ham rig. HF, VHF, UHF, QRP, SSB, FM, AM, Valve,
PLL, VFO anything!

I'm a novice and I need some gear to get me going...perhaps you have just
uprgraded to the latest rig, well please email me with what you've got.
I'll pay upto $60usd (£40ukp)

David

I am located in Manchester NH, and I have the following items for sale:
==========
Yaesu FT-757GX HF Transeiver |
Yaesu FC-757AT Automatic Antenna Tuner |
Yaesu FP-757HD Heavy Duty Power Supply |

This radio is 8/10. It has a few nicks on the front panel, meter illumination light needs replacing.

Asking $650.00
==========
Yaesu FT 703R 70 cm HT
Nicad battery (holds charge, but condition unknown) + wall charger
Alkaline Battery case
VOX headset (needs foam earpiece and microphone cover)

Asking $50.00
==========

MFJ 1270C TNC-2 Packet controller >> Like new
(about 4 or 5 years old, S/N 01027421)

Asking $60.00
==========

Kenwood MC-85 microphone
Had to replace volume control slide switch, but works great

Asking $60.00
==========

Kenwood SW-100 SWR meter (1.8-150MHz @150 watts)
A few scratches but otherwise it works great

Asking $60.00

==========

GS Dielectric model 2008, 2-30 MHz 1000 watt thruline wattmeter slug

$45.00
==========

I'm planning to be at the Deer-chester Hamfest (Rochester, NH) on
Saturday if the weather is okay.

All prices negotiable, and I'll split shipping charges with you.
If you don't like my price, make an offer.

Reply to this message, or feel free to telephone:

If you split the FT757GX set, I am interested in the automatic antenna
tuner. Let me know your price.

For Sale

4PR1000A Eimac or Penta Labs tubes.
These are pulls, and have been tested live in a BTI amplifer at
3KV on 3.5 Mhz, 100 W drive.
They have been segregated based on performance as follows:

In the above amp output 1100+watts =$125.00 + shipping/insurance
 "   "   "   "   "   1000 watts =$100.00   "
"
 "   "   "   "   "   750 watts = $75.00   "
"

Shipping is from the Eastern Massachusetts area.

----------Find Anything On Anyone ----------

_____

http://www.producthouse.com/netspy _____

Now anyone can become an online sleuth. NetSpy shows how to get access to files and data available for years to credit firms, lawyers, research companies, government agencies, and "snooping" firms. Special "how-to research and investigate" sections are complemented by a guide to special databases and complete coverage of all the major on-line services.

Netspy contains almost everything you need to know to find out just about anything about anyone by using freely available information sources on the Internet. It also contains good basic information on the role of the Net in corporate espionage and explanations of of secure financial transactions online.

Even if you find snooping about other people distasteful, you should get this book to find out what others can find out about you--and how you can cover your digital tracks on the ever-widening silicon beaches surrounding the continents of our existence. Very Highly Recommended

NetSpy shows how to get access to files and data available for years to credit firms, lawyers, research companies, government agencies, and "snooping" firms. Special "how-to research and investigate" sections are complemented by a guide to special databases and complete coverage of all the major on-line services.

Selling my Dentron DTR-2000L 160-10m amp in original condition with original manual. (I have decided to run only my dual 3-500Z amp.)

Amp only. (Guaranteed full power medical pull tubes are available on the Net for $190. - $225.)

Amp has been tested and is working fine.
Asking $900. shipped conus.

Thanks! & 73,
~~~

I have some 4pr1000a tubes for sale. They are pulls and have been tested live in a BTI amp at 3KV on 80M (3.5 Mhz). They put out 800 watts in this test. There are a few that performed at 1000 watts, but they are going fast! The going price has been $125 + shipping for the KW tubes and they are
~~~

almost all gone (may be more coming). Any interest or offers on the lower performing tubes? Make an offer?
73 es good DX
Chris

I have the following equipment for sale and/or trade.

*****SOLD***** Icom IC-25A 144MHz FM Transceiver
Frequency Coverage: 143.800-148.195MHz
Output Power: 25W(High), 1W(Low)
Good condition. Works great! Comes with manual.
$75.00 shipped

6' Equipment Rack
Standard 19" wide rack. Large cooling fan mounted on top.
Great shape! On wheels!
Pickup or delivery only. Will deliver withing 25 miles of Lake Villa, IL.
If you have and idea for shipping arrangements, please run them by me. We
might be able to strike up a deal.
$425.00

Siemens Programmable Logic Controller
Two Power Supplies, One CPU, One Handheld Programmer, One Digital Input
Module, Two Digital Output Modules, Three Bus Modules.
No, this does not program radios. It has a series of inputs and outputs.
Once programmed, it will monitor the inputs and will turn on and off the
specific outputs.
$150.00

Sony Hyper HAD Color Video Camera
Excellent condition! Comes with 24VAC Power Supply.
$250.00

I am looking to trade for the following:

Kantronics KAM+ TNC

Icom CT-17 RS-232 Level Converter

Vertical HF Antenna

If you have something else you would like to trade, please tell me and I might just want it!

You can e-mail me or call me by telephone.
E-Mail - zman@iwc.net
Telephone - (847) 587-0551 - I have voice mail, so if I'm don't answer, leave voice mail. I'm usually here, but sometimes I'm too busy to answer.

Thank you,
Christopher Zeman, KB9RHA

Something for the radio or aviation collector,
millitary enthusiast, ham...3 emergency
Vietnam-era (243MHz) tranceivers, on auction,
currently going for $26 for all three. Pretty
cheap.

See pictures and details of auction at:

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=64080876

Auction ends in only 9 hours....time to get a low
bid in!

Deal fell through, still need to sell my Dentron DTR-2000L
160-10m full legal power amp. This amp uses a single
8877 (not included).

The amp is clean and unmodified and comes with the
original manual. It has been checked by an Ham amp.
expert and is working properly.

These sell for $1200. with a full power tube. I am asking
$900. shipped conus, $850. picked up or delivered within
a reasonable drive to Southern NH (reasonable offers
welcomed).

Thanks for reading my message.

I have a 3 month old computer that I would like to offer for trade for a complete HF station. Comes with a EXTENEDED 3 year IN HOUSE warrenty. Looking for a RECENT MODEL HF Station - Complete setup only please. Would consider older stations such as TS-940SAT with SP940, SM-220 plus cash. Value of Computer system is OVER $2200.00 Monitor isn't included on this deal.

The USS Salem CA139 Radio Club, K1USN, is in need of a manual for a
Kenwood TS-5115 transceiver.

We need both operation and service manuals - we would like to retube the
rig and need the alignment information for it.

Thanks much!

Hi, All!
  I have two National NC-173 receivers for sale. Really

hate to get rid of these, but finances force sale.
  First receiver is in very nice shape, works fine, with just a few minor scratches. Has original speaker and mint owners manual. Second receiver is complete but does not receive. Very minor damage to lower front panel. Will fix up nicely.
  Will sell all for $250 plus shipping. Will not seperate.

Steve, there must have been 6 versions of that module, plus 6 eproms to go
with it, it all depends what prom you have. You should try for the
erasable prom unit.

I have a quantity of RF and other parts in excess of my personal needs.
Some items are available in large (>50) quantities.

Here's what I have and asking price:

ITEM	PRICE (each)

Johanson 8054 1.5 to 20 pf Capacitors (Piston Style)	$1.50
Piston Style 0.7 to 15 pf Capacitors	$1.25
0.01 ufd Monolithic Ceramic Capacitors (Bag of 50)	$2.50/bag
MCL TFM-150 Mixers (LO/RF: 10-2000MHz, IF: DC-1000MHz, +10dBm LO)	$5.50
MCL LPS-109 Power Dividers (2 way, 0 degree, 10-500MHz)	$2.50
MCL MAT-3 3dB Attenuators (DC-1500MHz)	$1.25
MCL MAT-9 9dB Attenuators (DC-1500MHz)	$1.25
AVANTEK VTO-8090 0.9 to 1.6 GHz Voltage Controlled Oscillator, 50 ohm, +13dBm output, TO-8 Case, with mounting hardware.	$10.00
Cablewave Systems FXA 12-50 NM N Male Coax Connector for 1/2" Hard Line New, In the box!	$15.00
2N918 Transistor	$0.35
2N4924 Transistor	$0.20
MRF5174 Transistor	$0.50
USD935 Diode	$0.15
Push Button Switch	$0.15

Pictures and specifications (where available) on the above items may be found on my web page at:

http://www.qsl.net/wb9anq/ or http://members.tripod.com/~wb9anq/

All parts are unused. Shipping is extra (typically $3.20)

73 -- Bruce, WB9ANQ

Article was clearly marked FA and Ebay. The items are radio related.
It would have been easy to ignore it.

Not the Spam I am used to, unless the flavor has changed since I checked.

Greetings:

I have a Radio Shack HTX-100 mobile rig for sale. Was
never used on 10 meter (well sort of, it was the IF for
my 6 meter transverter). 8 out of 10.

$125 Canadian.

Complete with original box, bracket, etc. Can't find
the manual, but it's very simple to operate. USB and
CW only.

Is it still for sale?
How much US$$$? (U-ship)
I assume LSB, too?

it is still avialable.

:>>How much US$$$? (U-ship)

I think it worked out to 87 USD, PLUS shipping.

:>>I assume LSB, too?

Nope, USB and CW only.

I am looking for a reliable 2m all-mode rig w/mic and manual.
Must be 100% operational. Minor cosmetic blemishes OK.

Have to trade all of the following:

1. Alinco DJ-S11 -- pocket 2m HT w/sma swivel mod to allow
                          for a better antenna, as well as mobile antennas
                          and/or an amp. Nice. In original box w/manual.
2. Radio Shack HTX-202 in original box w/battery, manual, etc. Nice.
3. Radio Shack HTX-404 in original box w/battery, manual, etc. Nice.
4. Shure 450T desk mic as-new in box w/manual
5. D-104 mic w/amplified base (needs a little cleaning and tinkering)
6. Kenwood TR-7200G 2m mobile w/original manual. Nice.
7. Motorola Mitrek 2m range rig w/control head, mic & cable harness
     Model # CT43JJA3900A (needs cleanup and mic needs cord and plug)
8. GAP Titan vertical (needs work)

If a local pickup (Southern NH/Central MA) will throw in Panasonic
KX-P1124 mono printer and Citizen GSX-220 color printer.

I aquired a Swan 350 with a 117CX power supply some time ago. It was
originally intended for my father, but we picked him up a Swan 500 instead.
So, I don't really have any use for the radio, nice as it is.

I tuned it up tonight on 20 meters and was able to get around 200 watts out
of the finals, and I didn't even have the load maxed out.

The reciever in this radio is of some of the best quality I have heard. I
was surpised as to how sensitive it is.

But, alas, I am entirely too lazy to tune up this rig each time I want to
use it. I much prefer to just turn on my Kenwood TS-450 and just operate.
:-)

The condition of the rig is an 8.5 out of 10. The power supply is not in a
speaker enclosure, so you'd have to add your own speaker. But the cables
and connectors are in very good shape.

I don't know what this radio is really worth, so I would appreciate offers
from those seriously interrested.

The correct procedure is to preface your ad with FA instead of FS. Then
those who do not care for Ebay can ignore the ad..

Forsale:

Swan 350 and 117CX power supply. I acquired this rig about 1 year ago and have not really used it that much. It works, and works well. I was just able to tune up the rig on 20 meters to over 200 watts into my beam. The 117CX power supply does not have the attached speaker or enclosure.

I have had a couple people express some interrest and even make an offer ot two. Since I have not heard back from them, I'm opening it up again and this time I have set a price at $175 plus the buyer pays shipping costs.

This is a real nice radio, for new ham or old timer alike. It has some of the best audio quality I have ever heard on a reciever, even better than my solid state rig.

I think the price is set rather nicely, as I am not interrested in dragging this out for too long.

$175 plus shipping.

I have a RCI-2950 that I'd like to use for 10m mobile.
It has some problems (bought it that way) and I need to
troubleshoot.

I thought a couple of GIF's I downloaded would get it done
but they had been poorly scanned and are missing large
sections of circuitry.

Scanned schematics are fine, otherwise will pay reasonable
copy and postage as agreed in advance.

Thanks!

Forsale:

Diamond CR627NMOB 6m/2m/70cm mobile antenna
      Gain: 2.15 db on 6m
            4.5 db on 2m
            7.2 db on 70cm
  Capacity: 150 Watts
    Length: 60 inches

Diamond K601NMO hide-away trunk mount
    Black
    6.5 ft. RG316 Teflon coax w/PL-259.

Both are less than 1 year old (bought at Dayton last year) and in great
shape. Antenna is a top notch performer and the hide-away trunk mount
keeps the antenna secure when away from your vehicle and out of the
weather.

$140 for both (save $30 from NEW prices) and split shipping from 44125

Newsgroups: rec.radio.swap,rec.audio.tubes,rec.ham-radio.swap

I have a number of tubes for sale on eBay. I've been posting them in grouped lots, some groupings containing dissimilar tubes but that are usually linked circuit-wise like the 6V6GT/5W4GT. Some of these lots are spare tubes I've had from the 60's before I moved to transistor circuits (remember the Brute 70? Pop Electronics 1968). Others (mostly the Mil. Spec. ones) are from the estate of a ham radio operator. Each of the eBay listings has a pic of the item for auction. This list will be revised periodically or I can be contacted at the Reply To: address.

Please let me know if the newsgroups I've chosen for this posting are inappropriate. Thank you for your time. - Tom

Thanks for reading this message. I am looking for information
from someone who has bought something on the news group
from an individual living in Canada. What are the import duties
or tariffs if any imposed by the US customs? I sure would hate to
buy this radio and find out that there is a 50% or more tariff on the thing!
 I have not found a clear answer on the 'net.

Thanks,
Randy KB8ASO   Milan, IN.

A lot of government agencies have web sites with all sorts of information. Have you tried finding a web site for the U.S. Customs Service?

Randy:

If you live in the US and are purchasing something in Canada, only US customs
may impose duties on your purchase. If the product is made in the US or if
it's value us less than $50US, you will have not problems and to my knowledge,
no duties will be charged. If it is not either of the above, they will asses a
tax based on what it is (ie 5% or the such). You should check with them
concerning this. I'm not sure on this, but there may be brokerage fees charged
by the shipper to move it across the border.

Keywords: MX-300S MX-360 Motorola
Newsgroups: rec.ham-radio.swap,rec.radio.swap

Problem:
I have a 12-channel MX-360 (MX-300S) that receives OK on all channels, but will transmit only on some channels intermittently. XMIT LED is much brighter than normal when trying to transmit on a "non-working" channel. I don't think it's the channel selector switch or the internal flex harness (?), and was looking for suggestions on where I might try to troubleshoot next. PROM pins (top and bottom) look OK. A "non-working" channel will sometimes start to work after holding down the PTT switch for an extended time (3-4 seconds). During the non-op time, the XMIT LED may flicker, and then eventually dim (to normal levels) when the channel starts to work. "Non-working" channel may squeal during bad TX. (Note: the radio is an old police DVP/ANI model. The DVP RX and TX works OK on the working channels, as does the ANI ID).

Any assistance would be greatly appreciated! Thanks in advance for your suggestions!

Try adjusting "L4" VCO coil per procedure in service manual.
It sounds like it's going out of lock (the flickering dim/bright
LED) for that particular channel. I'd give you the procedure,
but I don't have my manuals in front of me, briefly, you select
high end, and low end channels, then tune the L4 slug so the
test point voltage is within a certain window.

I bought a music synthesizer last year for $300 USD, I think I paid $15 shipping for 10# and U.S. Customs charged a $30 tarif and there was a $25 fee from a broker or someone like that. I wouldn't bother doing it again unless its really a rare item.

I think you'll find that items for PERSONAL use do NOT require a broker.
UPS, however, assumes that EVERYTHING is commercial, so they feed things
thru a broker. For 30 bucks or so. Use the post office. Check with FEDEX, as
they may be more friendly, but at higher transport rates. There is a publication
put out
by U.S. Customs, outlining the rules. Be careful in following the rules.
Also be conscious that things like scanners that can receive cellular frequencies
can
be considered to be contraband, under U.S. law. /mark

I have the following ARRL publications for sale:

All are in good shape.

1979 ARRL Handbook - $ 12

1972 Radio Amateur's Operating Manual - 3rd edition - $ 4

1970 Single Sideband for the Radio Amateur - 5th edition - like new $ 9

1956 ARRL Antenna Book - 8th edition - $ 12

1968 Mobile Manual - 4th edition - like new - $ 12

1976 ARRL Ham Radio Operating Guide - first edition - $ 8

1986 Tune in the World with Ham Radio - 6th edition - $ 5

1991 Now You're Talking - First Edition - $ 8

1993 Now You're Talking - 2nd edition - $ 12

1976 Radio Amateur License Manual - 75th edition - like new $ 10

1977 Learning to Work w/ Integrated Circuits - First edition $ 6

1978 Solid State Basics - First Edition $ 8

1993 FCC Rule book - 9th edition - $ 4

1987 FCC Rule Book - 7th edition - $ 4

The ARRL Training Program - Official Novice Student Workbook
No date or edition listed, but appears about 1985 $ 3

Booklet to go with ARRL Code kit - 5 to 13 WPM - $ 2

Repeater Directories - $ 4 each
1977-78
1978-79
1979
1983-84
1987-88
1989-90
1990-91

Operating an Amateur Radio Station $ 2 each
1969 - 52nd edition
1976 - 57th edition
1978 - 58th edition
1980 - 59th edition
1984 - 62nd edition

Public Service Communication manual
no year listed - prior to 1970 for sure - appears to be first edition $ 3
1970 - 3rd edition $ 1
1985 9th edition $ 1

1974 Ameco Radio Theory Course $ 6

I have found some older ARRL net directories. All are in good shape. Those in the 60's and 70's are $3 each, and those in the 80's are $2 each, plus shipping from Florida.

I have the following years are available:
1968-69
69-70
70-71
71-72
72-73
75-76
77-78
78-79
79-80
82-83
84-85
1989

Although not directly radio related, someone might be interested

Handbook for Patrol Leaders (Boy Scouts) - 1950 copyright - 1959 printing
$18

Exploring (Boy Scout Explorer handbook) 1958 - $ 12

Girl Scout Handbook - 1953   - $ 12

1986 American Red Cross "Expect the Unexpected" $ 2

Prices do not included shipping from Florida.

Please reply to W8EK@usa.net

Thanks.

I originally posted this as a 2K-4D. Please forgive me for the re-posting.
Thanks.

I am trying to locate a schemtatic diagram and a diagram showing the routing of the dial cord for the band switch. This I desperatly need for a Henry 2K (a pair of 3-500Z's sitting on a pedestal). If you can help, please send replies to: Mike W3SLK, E-mail: kc4slk@csrlink.net
Thank you,
Mike

RARE AND DESIRABLE, VINTAGE SWBC ITEMS FOR YOUR SHACK!

1. WORLD RADIO TV HANDBOOKS!!! Complete your collection's gaps now!
-- 1965 (hardbound!) - beautiful shape, $45
-- 1968, 1969 - poor condition, $22 each
-- 1970, 1971, 1973 - vy rough condition, $16 each
-- 1974 thru 1979 - nice condition tho used, many covered with clear plastic contact paper, $14 each
 1980 thru 1988 - fine to near mint condition, $12 each
-- 1990 thru 1992 - near mint condition, $11 each
-- 1995, like new, $10

2. "NUMERO UNO" weekly private DX newsletter: Wow, a complete run of issues from the heyday of this legendary DX weekly, from 1972 - 1984!! Three binders, 3-inches thick each, jammed full of DX news, pioneering reports on rare stations, feature articles, controversy, you name it. Finally, you can now see just what all the noise was about and read what the "elitists" (hi!) were up to! Full-sized 8.5 x 11 sheets, a stack of paper 9-nches thick, 600 issues. Won't break this up, to be sold as one lot. $250 firm.

2. FINE TUNING: Again, a mother lode of early issues from another late 1970s/early 1980s private circulation DX every-couple-weekly: issues 1-70, 113-140, 172-239. One stuffed 3-inch binder. Plenty of great DX info. $50.

3. "RADIO NUEVO MUNDO" Treasure Trove: Issues 1-71 of the famous Japanese LA DXing publication from the late 1970s into the early 1980s. Incredible amount of info for the serious LA DXer. Also, includes two books, "LA DXING", a photocopy of the first book and a bound copy of the second edition, from 1982. Also, the special Fifth Anniversary edition of RNM. And finally, to cap off this orgy of LA DXing paraphernalia, a few stray copies of the Machu Pichu DX Club, published in Peru, and the Bolivia DX Club boletin. $70.

4. "THE RADIO BOYS SEARCH FOR THE INCA'S TREASURE", here's one that you never see, a hardcover "Hardy Boys" type of radio aficionado's novel for kids, copyrighted 1922. Super condition. If you call yourself a diehard LA Dxer, your shack isn't complete without this. $50.

5. SOUTH AMERICAN HANDBOOK: Very handy reference, and the historical stuff, of course, doesn't age. Maps and geographic info make this classic a must-have. Save twenty bucks and buy a used copy! 1983 - $8. 1976 - $6.

6. BROADCASTING STNS OF THE WORLD (FBIS), BOOKS I & II, 1974. Nice condition, 500 pgs of data from the US govt's listening posts. $10.

7. BEST OF LOUDENBOOMER: NASWA/FRENDX SWBC satire from the 60s & 70s. $6.

8. REVIEW OF INT'L BCSTG: 1983-84 Issues No. 75-87, $3.

9. PASSPORT TO WORLD BAND RADIO: 1988/90/91, $17.50 for lot of all 3 books.

10. VIRTUAL GRAB BAG OF RADIO REFERENCE BOOKS: Japan's "BCL" (date?); "DXing According to NASWA"; Radio Amateur's Handbook 1973; The ARRL Antenna Book. Take 'em all for only $12

11. POPULAR COMMUNICATIONS MAGAZINE: The First 18 issues!!!! Starts with the desirable Vol. 1, No. 1, in Sep. 82. Great reading and a lot of fun, too. Collectible. $35 for the entire lot, just under two bucks an issue. Great condition.

12. GRAB BAG OF RADIO STATION CASSETTE RECORDINGS: Here's a real assortment for the LA Dxer: 3 cassettes, two are recordings of Peruvian station IDs from the 70s and one is of Bolivian stations made by the Bolivian DX Club. Bonus: will toss in another 3, I don't know what they are, might even be old blank tapes, but could be better.. Based on just the first 3 alone, this is a real catch for Andes specialists. $20

13. DANISH SW CLUB INTL BULLETINS: 3/73 TO 7/80, three 3-inch binders chock full of info. Also, bulletins from the Finnish DX Club, 1967/68/71/72. Only $20 for all of it!

14. VINTAGE FRENDX!!!!!!! Saving the good stuff for the end, gang: A lonnnnnnng run of the monthly publication of the North American Shortwave Association, FRENDX, from Jan 1971 through May 1984! That's 160 issues of nostalgia, news, radio information and feature articles, old names and faces, history of stations, etc. Virtually priceless! ..... but for you, the entire lot goes for $250, just a shade over a lousy buck-fifty an issue. You'll never buy such great reading, so cheaply, again ! (Bonus: a free year of SPEEDX, just for fun.)

15. ANDES FOLKLORICO MUSIC ALBUMS!!!!!!!! Here's a classic deal for the Latin DX specialists. Imported LP albums (get out your turntables!) from Ecuador, Peru and Bolivia, featuring that beautiful haunting music from the Andes. Finally, you can learn the different between a huayno and a passacalle! Special deal, assortments of 3 albums for $20, or 10 albums for $50. I have something like 50 albums to sell, so build up your collection now! Sorry, assortments will be as put together by me; no custom orders, please. I will try to make each lot as balanced a set as

possible. Also, these are 20 years old and although look to be in tremendous condition, no guarantee that they will all play like new and some warping is probable on the discs.

IN ADDITION TO ALL PRICES ABOVE, BUYER PAYS SHIPPING/HANDLING.

Ralph W. Perry

er

I have a brand new Icom IC-2SRA hand-held for sale.
It has 2 radios in one package.
A 2 meter transceiver and a scanner.

Transceiver
 Transmit   : 140-150 MHz
 Receive   : 138-174 MHz
 Output Power : 0.5 to 5 Watts (4 levels)

Scanner
 Freq. : 25-950 MHz (Continuous, NO GAP)
 Mode : AM, FM and WFM

It comes with BP-84 Battery Pack, Wall Charger, Softcase,
and Manual, but no original box.
I threw the box away as soon as I bought it.
It's been in the drawer for several years and never been used.
Sure I turned it on to see if it worked OK when I first bought it
and I decided to sell it today. It still works and looks brand new.
I'm asking $300.00 U.S. plus shipping.

73, Robin

I have a Motorola full duplex radio for sale. It was private labelled for Western Electric as a KS21466, but is internally marked as a Mototola TUD1733A. I believe this is a VHF Pulsar II carphone, which would put it on 152/157MHz. It is complete and clean, including the 'Trisolector' duplexer. It is synthesized, and I have heard that with work they can be made into a repeater. I have a cable, but no head. I don't have a service manual, but can point you to someone who does. $100 and split UPS shipping; either check in advance or COD are fine.

Dan,

Is that the rotor and control box? Norm's Rotor service has just the rotor brand new for $350. You didn't mention control box, so I'm assuming it's rotor only?

Don -N1AO

Hi,

A really great accessory..... A high quality weighted spinner knob!
This spinner knob matches the band/tune/load knobs already on HENRY
amplifiers.
This knob will fit any other 1/4" shaft as well. Metal bushing with TWO set
screws, this knob is QUALITY!
When we want to move from 160M or 80M to the higher bands or back again
there sure is quite a few turns of the roller inductor (tune) needed to get
there.

Well, here is the solution!
I have been testing this knob for a few weeks and believe it's "just right"!
$32 delivered USA (Calif. add $2.39 tax), Foreign e-mail for shipping price.
RADIODAN has them! Credit cards OK.
See it at http://radiodan.com/Henry/parts/spinner.htm

I have a MINT, condition VHF SP50 unit, barely used, 10/10 condition, Model # P94YQT20A3AA, 2 channel, 5Watt with good
battery, drop in charger and antenna. I NEED A GP68 VHF unit .

-_____
Additionally:

FOR SALE ITEMS

I have a Mint condition, 2 week old, modified Icom IC-Q7A dual band Transceiver, receives from 30-1200MHz (less cell), TX
130-174MHz & 400-470MHz, great 200 channel radio/Scanner. With antenna, clip, box and manual. Sell for $175.00. I
also have software to extend range to .5-2GHz approx. You'll need cable...or I just bought a VX-1R cable which should work,
I'll sell for $25 extra

GE Portamobils (2), with handsets, chargers and batteries. Low VHF (2 channel 46.8/46.9MHz) Appear to work, I have no
antennas, sell for $50 pair

Prepayment via Postal MO or COD preferred.

Was supposed to be for my packet BBS but my 386 is cutting the mustard just fine. It is set up as a Win95 net-surfer right now and it seemed like overkill for my requirements. It's a 486DX with lotsa ram, modem, soundcard, speakers, mouse/pad, keyboard and monitor.

$300+ shipping, w/o software - will trade for best radio

-Chuck

Hi,

CAN HAVE PROGRAMED TO YOUR SPECS.
   I have 3 MT1000 pkgs. for sale. Radios are UHF mid split, (438-470) 8
channel, H44GCU7180AN model #, stubbies, beltclips, excellent condition!
should be convertable to 16 easily. :)
 In following configurations:

1 ea. MT1000, sp/mic, charger, battery..... $240

1ea MT1000, charger, battery..... $225

1ea MT1000, 3 batteries..... $200

Please contact via email.. Radios are guaranteed not DOA and in excellent
condition. Shipping not included. (if u want all, or 2, I'll ship) No clue
on the batteries as date codes are around 96-95, but they seem to hold a
charge ok. Prepayment with postal money order, and can offer more info or
pics to the serious inquiries..... as always, thanks for the time and
bandwidth!
Randy, KC8CPK, KAG0900

I have a mixed pair of one Regency RPH410 VHF tansceiver & one Wilson HS-410 VHF
transceiver. Both units are intact(one
missing case screw) these are the same radio by different MFG, no antennas(BNC
jack on top) . I have one battery between
them, it is not charged. From what I can ascertain, these radios need some help,
but they did, when the power in the battery

was good, come up with display test. Both have Keyboard for on unit programming, an LCD screen, pri,rst, scn & rvw buttons as
well as switches for light, keylock and power(hi/low). These are older units I was going to send for repair, but I will take
the highest bid for them.

I'm still trying to clean out some things, and found an assortment of the big thick color programs from the Dayton Hamvention. They include the equipment ads, as well as the list of speakers, forums, etc. It would seem that someone would probably like them.

Here are the years that are available:
1976
1979
1981
1982
1983
1984
1985
1986
1987
1988
1990
1991

$ 3 each, plus shipping from Florida.

I also have a similar one from the 1991 Orlando "HamCation" $ 2 plus shipping.

Thanks.

73,

Ken, W8EK

Data I/O EPROM Programmer.

The Data I/O Model 280 Set Programmer is a completely self-contained gang programmer that allows you to program up to eight identical devices, or a set of up to eight devices containing different data. With the 280 Set Programmer you can program both 24- and 28-pin NMOS and CMOS EPROMs and EEPROMS without using special socket adapters or personality modules. You can operate the 280 Set Programmer "locally", using the front panel keys and 32-character display, or "remotely" using a terminal or computer and the RS-232C serial I/O port. The 280 offers five data translation formats (Intel, Motorola, Tektronix, etc) which enable you to transfer files to and accept files from software development systems. Currently supports over 200 different devices. Includes complete manual, attractive padded carrying case, power cable and PC windows compatible software. Dimensions are 12" x 4.5" x 14" and weighs about 10 lbs. Buyer pays shipping. Shipping weight will be about 13-15 pounds from 93523 (CA). I will accept prepayment or COD with certified check/money order, or personal check with ample positive feedback. Happy bidding!

Hi People:

I have for sale the Automatic antenna tuner from a
Kenwood TS-440 for sale. Comes with all cables to
re-intall into a 440s making it a 440sat (sorry, no
instructions).

Would prefer to sell it in Canada.

$200 CDN (seems to be the price difference between a
used 440 and 440sat north of the boarder).

I have some modern Electronics Fundamental Text books available. All
are
currently in use at various colleges. They are all Associate Degree
(Technician) level.

Basic Electronics by Grob - 8th edition - 1997 - $ 30

Electronic Principles by Malvino - 6th edition - 1999 - $ 30

Electric Circuit Fundamentals and Electronics Fundamentals - 3rd edition
by Floyd - 1995 - $ 30

Electronic Devices and Circuits by Hassul and Zimmerman - Conventional Flow version - includes student workbook
I think this is a 1998 copyright, but it is still in shrink-wrap, and I do
not
want to unwrap it to find out for sure. $ 30

Digital Electronics by Uffenbeck - 1994 $ 28

Prices do not include shipping from Florida. All books are new. By the
way, most of these
are large, heavy books, weighing about 6 pounds each.

E-mail to W8EK@usa.net

Thanks.

Mobile Mounting Bracket:

I am fairly sure this is from an Icom 230 or Icom 22 S (same bracket, if I remember right).

The radio that fits it would be 5 1/2 inches wide and 1 3/4 inches high. Please measure and check, as my memory may not be correct.

$ 8 plus shipping from Florida.

Thanks.

I have a Mint condition VX-1R w/ ADMS software & interface cable, battery, charger & antenna. I will sell for $225.

RLC Electronics COAXIAL Switch, model # s-2826
15VDC operation, N connector outputs and 1 input - $20 obo

1 - SEEKA GR40 12-24VDC input, photo/color sensor unit, very small and unused, Dark/light sens adjust - great for
monitoring
object, etc - $40

1 - OMROM, NEW, H5L-A Time switch, 2 relay contacts, time set, large LCD control window, 100-220Vac supply, perfect
condition, never used, mounted in NEMA enclosure, asking $75 obo

1 - RS232 A/B printer/peripheral switch - $10

1 - Magitroni P/N I-E16-COMBO Ethernet card, BNC/RG connectors, used - $10

1 - Artsoft Ethernet Adapter, BNC/DB15 connectors - used - $10.00

1 - Moose Products Inc, High Powered 12Vdc, yelp/stdy Siren Module Board, 4 ohm min output for horn, works fine, real
loud, -
$10.00

1 - 12VDC operated UHF remote control switch receiver/Mini transmitter set, works fine, relay output (w/ relay),
transmitter
uses 12V battery, included, used but functions perfectly - $20 (pair)

Intermec (altered) Barcode Laser Scannerdevice(diode Laser) does not read, but

scans fine(5V input) scans nice 670nm line
when hooked up to 5-6VDC, neat toy. - $20.00
Model # 1545

1 - B Eagle Electronics Automobile shock sensor unit, 12VDC operation with sens pot - $10

1 - DE 1506 sound automobile sensor, 12V with MIC & sens adjust $10 obo

1 - LXI series(sears) Portable 12V VCR, works fine, with all cable connections from base unit. LCD readout, no
charger,takes
lead acid batteries(like from old MOTO phones - $50 obo

Uniden/Bearcat Desk model # INF5XL scanner, preprogrammed by state type, with whip antenna, no power supply, tested fine
with
mine. Buttons for POLICE, FIRE, MEDICAL, STATE, WEATHER, DELETE & HOLD, PLUS SQUELCH/VOL. Best offer takes this off my
hands..

PRO-34 (cat # 20-139/9135) SERVICE MANUAL ONLY - $10.00

VIDEO STUFF

Casio HH calculator(scientific) # RM-7400G (icon Menu) with comp link & OHP(over head projector) unit, Calc talks to OHD
via
IRDA(Infrered) signals, great for presentations/classroom. OHP also made by CASIO has some type of PCMCIA port on side
aswell, no docs, but both work fine. $100 pair

1 - Color CMOS Egg shaped CCD camera, adjustable focus, 12VDC input/NTSC video output via RCA jack - $75.00

1 - CCD B&W board camera, w/ adjustable lens, 12Vdc input, Video (NTSC) output - $50 obo

1 - Commodore Model 1702 COLOR video monitor - $40.00

It turned out that the Icom Mobile Bracket that I listed yesterday, thinking it was for a 230 or 22, is really for an Icom 27/37/47 series. At least that is what it appears to be, from what I can tell now,

The radio that fits it would be 5 1/2 inches wide and 1 3/4 inches high. It has a lever that moves a rubber pad tighter on to the radio.

Sorry for getting that wrong. I knew my memory wasn't as good as it should be!

$ 8 plus shipping from Florida.

Thanks.

forward these ebay teasers to:
malcolm@ebay.com and cc support@ebay.com suggest@ebay.com
safeharbor@ebay.com founder@ebay.com

maybe if ebay gets enough complaints about ebay members constantly
spamming newsgroups with their auction teasers they will do something
about it.

How can you even define it as being a teaser? They post the FA in their subject heading. That is NOT a teaser. A teaser would be if they didn't put FA in the subject!

FYI, I learned about eBay from those FA postings and did buy some equipment someone was selling. I have been a buyer and seller on eBay ever since. I have made a lot of money and people have made money from me because of their postings on the newsgroup. I have posted my ads in the newsgroups and attracted buyers because I did so.

This is such a petty subject to bitch about, I know, but I deal with stupid people all summer at work, and the last place I would expect to find stupid

people is in an Amateur Radio newsgroup! Come on, people, we're supposed to
be the more intelligent group in society. Ok, so the HF bands prove this
wrong also.

There haven't been that many ebay teasers posted on this newsgroup yet,
but it has seemed to increase somewhat lately. There are some newsgroups
where the ebay hawkers have just about destroyed the groups as far as
discussion because of their constant postings of these teasers. As more
and more ebayers discover that they might make an extra buck by posting

these notices, the number of teasers will increase and they pay no
attention to if the charter of the groups allows FS and FA ads or not.
When it comes to making a buck, nothing will stand in some people's way.

And did you even check the charter of the newsgroups to see if FS and FA
ads are even allowed before posting your teaser? Probably not, and you

are probably the type that would not even care, you just want to do what
you want with total disregard to others.

No, I did not. One can naturally assume that it was allowed considering the number of messages that were posted in this fashion.

Explain this to me: What is the big deal about FA and FS anyways? You obviously don't have anything better to bitch about, but I'm sure you have a GOOD reason. Unless you can give me a GOOD reason why FA messages just

aren't compatible in a newsgroup, I will assume that you just feel you need to have control over people or something like that.

Since when did rec.radio.cb and rec.radio.amateur become swap groups? Do
you see swap in the name?

I guess if you see eveyone else jumping off a cliff then you would too?
Just because you see others posting ads to a group dosen't mean it is
OK. They are being just as dumb as you are.
>

The bid deal is, if the charter dosen't allow for ads, then you should
be willing to abide by the charter or go somewhere else. But I guess you
are the type that thinks those kind of rules only appliy to others, if
it serves your purpose to post ads then it is OK.

Well, I got an amateur radio auction that is easy to use and fairly priced.
The category is specifically for ham gear. You guys help me out. go
register and submit some stuff. This goes to help support the Ham's Net
server

I have the following High Voltage Variables for sale, good shape -
shipping extra.

Hammond Manufacturing, a pair of 350UFd @ 3000 volts, with 1" Johnson
porcelain mounting legs, and a Johnson porcelain inter capacitor
connector. Should sell as a set - $40.00.

Hammond Manufacturing, 250 ufd @ 3000 volts, $15.00.

Hammond Manufacturing, 100ufd - 100ufd dual section 6000 volts $40.00

Pair of 100ufd with interconnecting cable from ARC5 transmitter $6.00

New in box Airdux coil, #1604T 2" 4TPI $15.00

Shouldn't the rating be pf (pico farad) instead of ufd (micro farad) ?

If it IS ufd, those are some SERIOUS caps!

Randy.

This unit has only been connected to power and turned on to
ensure it works. Other than that, it is brand new. It's
a great all mode radio (AM, FM, SSB, FSK, CW) that covers 180 - 10
meters + 6 meters. Recieve covers 50 Khz - 60 MHz continuous.

Last day. Check it out:

New or not, starting @ $1109.00 is quiet high for a rig that is no
longer in product. Especially since better rigs can be had for as
little as $850.00. Not hard to see why there have no or few bidders.

Checked it but it also is too high, starting at $590.00.
They 735's regularly go for 400-450 here in W7 land.
You can't fault a guy for trying though.

I'm looking for an SWTPc computer, any model. Typical SWTPc (Southwest
Technical Products Corporation) models were around in the late 70's. If you
have an SWTPc computer buried in the shack and are interested in selling it
please email me at chipsndips@snet.net.

Singer Gerstch FM 9 SERVICE MONITOR, covers 30mhz thru UHF. Syntithized freq select. Unit looks good shape but only partly operational. (freq standard is ok). Highest offer over $50. + shipping. I have a book on this so it can be fixed.

Triplett 3490A Lab quality transister analyzer in a 20" suitcase. In very, very nice condition. I just ever use it. If you want to run curves on power transisters, I believe this unit will do it. Unusual piece of equipment. $150. + shipping

SWR bridge on 19" x 4" panel with meter. Made by GE for use in VHF/UHF, "N"connectors. Same quality as a Bird watmeter. Has some circuit on panel

for mabe alarm remote but this in no way will affect the operation of meter
for local use. $40. + shipping.

Conair 221 tube tester. Compact suitcase that covers popular tubes including
compactrons. Nice condition. I have used this myself & works well. Suitcase
is fair to good condition. $60. + shipping.

I have a brand new Icom IC-2SRA hand-held for sale.
It has 2 radios in one package.
A 2 meter transceiver and a scanner.

Brief Specifications;
Transceiver
 Transmit : 140-150 MHz
 Receive : 138-174 MHz
 Output Power : 0.5 to 5 Watts (4 levels)

Scanner
 Freq. : 25-950 MHz (Continuous, NO GAP)
 Mode : AM, FM and WFM

It comes with BP-84 Battery Pack, Wall Charger, Softcase,
2 Antennas (one for Tranceiver and one for Scanner),
and Manual. but no orginal box.
I threw the box away as soon as I bought it.
It's been in the drawer for several years and never been used.
Sure I turned it on to see if it worked OK when I first bought it
and I decided to sell it today. It still works and looks brand new.
I'm asking $325.00 U.S. plus shipping.

Happy New Year, 73.
Robin

In my archives, I found a collectable VOM, that I have no need for.

It is a Triplett 310 "Mighty Mite" VOM. It includes a nice leather case, with Triplett imprinted on it, a set of original probes, and the original manual.

This unit looks as close to new as you would ever find. I have looked all over it and can not even find one scratch. The manual looks new, except for the possibility that the pages are not quite as white as they once were. The leather case is made so that it can go on a belt, but does not look as if it ever was on one.

I have searched the manual, but find no information as to the date it was made. My guess would be in the 50's, but that is only a guess.

$ 75 plus shipping from Florida.

Happy New Year to all.

During a recent move to a new house I found several items I no longer need
and that are taking up space. I have the following for sale:

1. Regency TRH-202 mobile VHF 2 ch ($100)

2. Maxon SM-4150 VHF 16 ch ($225)

3. Motorola Convert-A-Com for MX300 series portables ($50)

4. Motorola Saber rapid charger ($100)

5. Federal Signal 100w compact siren speaker ($60)

6. Uniden Force rapid charger APX 111B ($25)

7. Motorola rapid charger NLN6895A for HT-220 ($25)

All prices are plus shipping from St. Louis metro area.
Feel free to contact me for further information, serial #'s, etc.

I have two lab quality DMMs for sale.

One is a Keithley 178. It is 110 V AC (or optional NiCad pack, which is not included), and is a 3 1/2 digit LED meter with 0.04% basic accuracy. It is in good shape. $ 50 plus shipping from Florida.

The second is a Keithley 169. This is also a 3 1/2 digit DMM, but this one is LCD and operates off of 6 "C" cells (or appropriate adapter). It is newer than the 178. $ 125 plus shipping.

73, and Happy New Year.

Not only that, but some of us have ISPs that remove this crap from the
newsgroups, but not when a replier reposts the whole thing. So we get
to see what we missed, courtesy of a well-meaning friend. ;-)

When a brand new one is $194 delivered to your door from HRO, it hardly pays
to look for a used one. Used, are nearly new price.

I have some college level math books for sale.
All are in good shape.

Essentials of Mathematics, by Person, 1968, 2nd edition
General Math intro with Algebra, Trig and Geometry in one book
$10

Introduction to Modern Mathematics, by Vance, 1963
Algebra, Trig, and various functions
More depth than the Person book above $ 15

Calculus by Sherwood and Taylor, 1954, 3rd edition
The title of the book says it all! $ 18

Differential Equations, by Morris and Brown, 1964, 4th edition
An "in depth" book. $ 15

Modern Elementary Statistics by Freund, 1967, 3rd edition
Uses very, very little calculus. $ 14

Trigonometry with Tables, by Welchons and Krickenberger
1960 - Basic Trig book $ 10

Prices do not include shipping from Florida.

Thanks, and Happy New Year.

I have some modern Electronics Fundamental Text books available. All are currently in use at various colleges. They are all Associate Degree (Technician) level.

Basic Electronics by Grob - 8th edition - 1997 - $ 30

Electronic Principles by Malvino - 6th edition - 1999 - $ 30

Electric Circuit Fundamentals and Electronics Fundamentals - 3rd edition by Floyd - 1995 - $ 30

Electronic Devices and Circuits by Hassul and Zimmerman - Conventional Flow version - includes student workbook
I think this is a 1998 copyright, but it is still in shrink-wrap, and I do not want to unwrap it to find out for sure. $ 30

Digital Electronics by Uffenbeck - 1994 $ 28

Prices do not include shipping from Florida. All books are new. By the way, most of these are large, heavy books, weighing about 6 pounds each.

E-mail to W8EK@usa.net

Thanks.

I have the following Kenwood HTs and accessories for sale:

TH-21 AT - small, synthesized 2 meter HT. Basic, without a bunch of 'bells and whistles'. Includes TT Pad built in, rubber duck antenna, good

battery, charger, original box and manual. $ 100

TH-41 BT - as above, but for 440 MHz. Sub audible tone adjustable by DIP switches on front panel. Same accessories as above. $ 125

Stubby rubber duck antenna. Will fit the TH-41 above (440 MHz) $ 10

BH-3 belt clip for above series HTs $ 4

Prices do not include shipping from Florida.

Thanks, and Happy New Year.

VX-1R with extra lithium ion battery, AA alkaline battery adapter, out of band mod.
Comes with all as when new, even the original box!
 $200 for all. Plus shipping. Works perfectly, just have too many HTs!

Credit card is OK.

I have an Alinco DJ-580 "dual band" HT for sale.

It covers both 2 meters and 440 MHz, plus most frequencies in between and some above. It has just about every "bell and whistle" that you can think of. This one has the 12 V heavy duty battery, so it has 5 W out. There are 3 power out positions, so actually, you have your choice of 5W, 3 W, or 1/2 W. This unit has a manual and its original box. It is in good

condition both electrically and cosmetically.

$225 plus shipping from Florida.

73,

Ken, W8EK

CHECK OUT MY WEB SITE FOR FULL COLOR PICTURES and SHOTS OF THE EXTENDED WARRANTY ...
...go to http://www.mhtc.net/~todjk/DX394/

Here's the story.

No gimmicks. Just the need for an honest guy to sell a good piece of radio gear.

My DX-394 been sitting on my amateur radio desk for 12 months now. I originally bought this radio to help me study code when studying for my Technician Plus 5 wpm test.

Since I passed my test, I purchased an ICOM IC-746. Thus there's no need for the DX-394. The DX-394 has served it's purpose. In reality, this unit was barely used for approximately 6 hours. Truthfully.

There's absolutely nothing wrong with this radio. There's not even a scratch on it. IT IS IN PERFECT WORKING CONDITION. I wouldn't want to sell it if it were second rate, broken, or junk. No one likes to be led on to buy crud.

To boot, there is still time left on the 5 year TSP Warranty. Warranty card

and sales receipt will be included with purchase.

If you are interested in purchasing this radio, please e-mail me below OR
call me after 5pm central time at (608) 326-5539.

Hi,

 Price reduced to bottom dollar... selling FT-900/at in pristine condition
for $725 plus shipping. Radio has built in tuner, keyer, and not a scratch.
Never mobile. '95 manufacture. sorry, no xtra filters or seperation cable.
.30-30 rx plus MARS/CAP. Works great and puts out around 110 watts.. Must
have prepaid money order on this one. includes hand mic, box, manuals,
orig. factory paperwork, reciept of orig. buyer from AES, etc.
thanks for the time!
Randy

In my archives, I found a collectable VOM, that I have no need for.

It is a Triplett 310 "Mighty Mite" VOM. It includes a nice leather case, with Triplett imprinted on it, a set of original probes, and the original manual.

This unit looks as close to new as you would ever find. I have looked all over it and can not even find one scratch. The manual looks new, except for the possibility that the pages are not quite as white as they once were. The leather case is made so that it can go on a belt, but does not look as if it ever was on one.

I have searched the manual, but find no information as to the date it was made. My guess would be in the 50's, but that is only a guess.

$ 75 plus shipping from Florida.

Is it me or has this list (rec.radio.swap) suddenly become less
Ham user friendly and more dealer, auction, and collector overloaded?

I am finding a tiny percentage of posts even vaguely of interest to a
typical Ham looking for something to add to his station without
breaking the bank.

Is there another Ham-specific newsgroup we might move to?
Perhaps rec.radio.amateur.swap or rec.ham-radio.swap?

Just a thought! Perhaps it is just a abberation of the past few weeks.
Or perhaps I just need more sleep! :-)

Exactly where to you find the word "ham" or "amateur" in rec.radio.swap.
You are already aware of two other newsgroups with these words in them...So
use them.

All too often, people speak of censorship in this newsgroup, from too much commercial stuff to eBay bashing. I for one, want to see all that is available to me, and then make an intelligent and informed decision whether or not to buy something.

If you want to only be "ham specific", hang out on a newsgroup that specifically caters to you guys. In my view, rec.radio.swap welcomes all.

Rob

I am trying to locate a schemtatic diagram and a diagram showing the
routing of the dial cord for the band switch. This I desperatly need for
a Henry 2K-4D (a pair of 3-500Z's sitting on a pedestal). If you can
help, please send replies to: Mike W3SLK, E-mail: kc4slk@csrlink.net
Thank you,
Mike

Model HD1418 Active Audio Filter -- dates from 1988.

Assembled solid-state unit in mint condition. Attractive design. Has bandwidth settings for CW, SSB, and RTTY. The CW filter includes a tunable notch/peak filter with variable BW. The unit also has high and lowcut capabilities to get rid of "rumble" and "hiss". It has its own audio amplifier.

Very dark brown metal with red and white lettering--no plastic! Coordinates with the Heathkit rigs of the era. In perfect cosmetic condition. I packed it carefully away in a cool closet, along with several other high-quality items, when I changed my main interest from ham radio to computers shortly after I assembled it. You get the manual with it.

Asking $100

Hi....
I have a TR-7950 that won't transmit (everything
else works fine). The problem is the PLL UNIT #x50-1900-10.
I verified this by borrowing that particular board, out of another
7950.
So.... I need to find myself another board with the above part
number.

===Anyone have a junker or parts 7950 out there ?????====

The board I need is the one on the bottom of the radio, at the back.
It's part # is PLL UNIT x50-1900-10.

I'd be willing to pay $30.00 for one of these boards in working condition.

email me if you can help....

Ron   n8lmt@usa.net

Lowband/6 meter equipment for sale:

RCA Series 1000 mobile radio, model CMFM7MMRNC. 100 watts, presently on
39.xxMHz. Complete system with 4 frequency scanning control head & bracket,
speaker, mic, mounting tray, and control/power cable. Has optional noise

blanker option. Also includes complete, original RCA 700/1000 series lowband service manual set in three ring binder. Clean, complete, working when pulled a couple years ago. $75.

RCA 'Supercarfone' mobile, model CMFA50N2TT. 50 watts, 45-54MHz split, presently on 47.98. Complete system with 4 frequency 'integrated' control head with mtg bracket, speaker with mtg bracket, mic, mic hangup box, mounting tray, control and power cables. Also includes complete, original RCA Supercarfone/Superfleetfone lowband service manual set. Radio is very clean, head and cables complete, but a little dirty and worn. Working when pulled a couple years ago. $60.
Both for $115.

Equipment is in southern NH; I would be glad to show it if you're in the area. Prices plus shipping. Check in advance or COD (at cost) are both fine.

Newsgroups: rec.ham-radio,rec.ham-radio.packet,rec.ham-radio.swap,rec.radio.amateur.swap,rec.radio.amateur.packet,rec.radio.amateur.equipment,

1) Standard (brand) "Twin Bander" (Dual Band) 144 MHz/450 MHz FM Transceiver. Includes optional 100 channel memory upgrade. Can also be used for repeater or packet duties. All controls are on the microphone so you can mount the main unit anywhere in your car or truck. It includes the 2m extension cable between the microphone/controls and the main unit. It works perfectly and looks near new. It's never been abused. It has been modified so it can transmit/receive on Civil Air Patrol frequencies. It is made for mobile use so it needs 12 volts DC to operate on. It has around 50 watt output and can receive from 118 MHz to over 800 MHz in addition to the ham and CAP bands. It can receive on two different bands simultaneously, and can also be used as a cross-band repeater. Simultaneous receive and transmit is possible.

2) ICOM IC-W2A Dual Band FM hand-held Transceiver. 5 Watts output. Also modified for use on the CAP bands that have no negative effect on normal operations. This also receives outside the hambands too and includes 118 to over 800 Mhz. It can receive on two different bands simultaneously, and can also be used as a cross-band repeater. Simultaneous receive and transmit is possible. This unit can also operate packet. 60 memory channels.

3) Cushcraft R-5 HF Vertical antenna. Perfect for the 10M band now coming back alive. This unit is near-new, since it was only installed a couple hours before a neighbor threatened to sue me over it (CC&Rs). Please, no comments on that LOL... I dealt with that some time back. I don't recall the specific bands this antenna works but 10/15/17/20 come to mind.

If you don't want to spend cash, I will negotiate for certain items I want you can buy off your credit card and ship to me in exchange.

Please, PLEASE... don't contact me UNLESS you are serious about buying one or more of the above units, I get too much email as it is. I'll accept best offers for them all. $350 minimum for the Standard, $300 for the ICOM, $150 for the Cushcraft. You pay shipping costs.

73,

Jerry Bransford

As a result of cleaning up my shack, I have the following items for sale or swap.

1. Kenwood ts570D, mint condition

2. Icom 706, excellent condition, all mounting brackets & remote cable included

3. Pro 2050 trunk tracker, 6mos old

4. FEX-736-50(A) 50mhz unit for FT-736R, used very little

5. KPC-3 tnc

Please contact me via email: scannon@together.net for more information

Just a note to let you know of an established guy who is now on the web.

We've known him for years as Duane Heise AA6EE. He has ARRL books & CDs, and
other goodies like this.

Vist him and bookmark http://radiodan.com/aa6ee/

Hi folks,

I have lots of web space available and would be very happy to share my site and skills in putting up a small WebSite for your HAM related products that YOU offer to us all. Products, Services, Tips, etc??
I know it sounds crazy, but I will put up and maintain a site, makes changes and updates when you want ALL FOR FREE!!
See http://radiodan.com/aa6ee/
As an example of one such site I have put up for a guy who sells books and CD's at discount to us all.
Another example is http://radiodan.com/IIX/
E-mail these guys if you have any questions about the authenticity of my offer!

Merry Ho Ho Ho!!!

E-mail me if you have any questions.

I have quite a few AOR AR-210 TNCs. Use as standard AX.25 packet. Great for portable operation as these about the size of a cigarrette pack. I use one for regular base operation for DX packetcluster. Works great and very inexpensive!
$75 + ship each.

Optional ni-cad battery $25

See it at http://radiodan.com/ted_stuff/AR-210.htm

I have some Heil BM-10 headsets NEW for $40 each with #5 (full range element).
Also have some Heil HM-10 mics with #5 elements NEW with cable and clip ready for your stand. These look like a singers mic and are very high quality. $40 each.

As of now I still have some Yaesu and Kenwood wired versions although it is the same connector and just needs rewiring if I don't have the one for your brand when you call.

I have a few cable adapters for Heil Prosets at $10 each. Collins, Yaesu, Kenwood
And a very few Heil B4K microphone boom with #4 DX element, This unit replaces the entire boom mic on a BM-10 headset, and has the 8 pin plug, 1/4 jack and cable. Usually the guys use this to switch between contest and DX #4 element and the regular ragchew #5 element, $25 for this unit, again NEW! Plus ship. Credit cards OK

I got sooo many responses to the BM-10 headsets (all sold out now, thanks!) that I dug around the warehouse and came up with 4 dusty boxes with HEIL BM-5 desk mics. BRAND NEW in box.
I have only 2 for Kenwood, 1 for late model (8 pin) ICOM, and 1 for Yaesu. All with 8 pin plugs.
These are very nice units with goose neck and ptt bar on smart looking base. All have #5 element for natural sounding audio.

$50 each + ship.

First payment (credit card OK) and shipping info gets choice.
Also, still have some HM-10 mics (looks like singers mic) with same #5 element and cable/connector for only $40 + ship NEW!
And a few B4K (Kenwood) and 1 B4Y (Yaesu) boom mics complete with cable and connector for the BM-10 headset. This has the DX #4 element and can be simply installed by removing the original boom so you can easily have a #4 and a #5 element boom available for DX/contest use or regular ragchewing. NEW $25 + ship.

Phone on Thursday OK 800 995-2929 or e-mail

The following Kenwood HTs and accessories are for sale:

TH-21 AT - small, synthesized 2 meter HT. Basic, without a bunch of "bells and whistles". Includes TT Pad built in, rubber duck antenna, good battery, charger, original box and manual. $ 100

TH-41 BT - as above, but for 440 MHz. Sub audible tone adjustable by DIP switches on front panel. Same accessories as above. $ 125

Stubby rubber duck antennas. Will fit the TH-21, TH-31, or TH-41 respectively. (Separate antenna for 2 meters, 220 MHz, or 440 MHz) $ 10 each

BT-6 empty battery try for the TH-21 series HTs. Hold 6 AAA batteries. $ 20

DC-21, DC (cigarette lighter) cord and power converter for TH-21 series HTs $ 25

SC-8 T, soft case for the above series HTs. $ 15

BH-3 belt clip for above series HTs $ 4

TH-21 "Special". This is an HT as above, but will transmit only. Receive is dead. HT for transmit only. Would be great for "Fox hunts", as the unit is fully synthesized, and the transmitter works fine. $ 25 as is.

Other Kenwood Accessories. All are NEW, in the original packing.

PB-26 battery pack for TR-2600 or TR-2500 $ 50

MC-43 microphone, 8 pin, hand mic, like came with most of the HF radios. Has "Up" and "Down" buttons. $ 55

SC-8T soft case $ 15

Prices do not include shipping from Florida.

Thanks, and Happy New Year.

73,

Ken, W8EK

Hi folks,
An announcement about the new HENRY reflector on contesting.com.
Here's how to join the group! We talk about anything related to HENRY
Amplifiers.

Address a new e-mail to majordomo@contesting.com

In the body (NOT subject) of the message simply type subscribe henry

When you get the confirmation back, just copy and paste into a new e-mail
the authorization information.

You will get another confirmation that you are all set and welcome to the
list! Then, after you're all set-up just type henry@contesting.com to post
new messages.

Hope to see all HENRY enthusiasts there!

Hi,
   Well, I'm giving it up in lieu of a new computer....

NEVER MOBILE

Yaesu FT900AT
auto freq. tracking tuner built in
modded for MARS/CAP
all the normal base model stuff....
no scratches or dents, works great!
Purchased new in 1995 from AES, (I even have the reciept.. over $1300!!)
Radio, manual, hand mike, box, papers to include factory mods, etc...
factory filters

Priced at $775, uship, No trades, please....
Please reply via EMAIL
Picture emailed on request and this one will have to be prepay, so
references available, too, from these groups even!
thanks for the time and space,
Randy, KC8CPK

Ben and Al's After Christmas Sale
Didn't get what you wanted for christmas? Well perhaps there's something
here for you:

Pictures of all these Items are here
To Order any of these, please write to alnben@yahoo.com

Cardinal Scale, over 500lb capacity, tested as shown with 50lb standard.
Completely Accurate! - $800

Chronar Solar Panels, NIB, Going Fast - $100/ea

Collins 28 Volt Power Supply for KWM-2A - $75

LAMBDA 48 Volt Switching Power Supply - $100

LAMBDA 44-48 Volt Power Supply - $100

LAMBDA 24 Volt Power Supply - $75

LAMBDA 28 Volt Power Supply - $75

1952 Motorola Portable TV !! - $200

APC UPS - $50

Pictures of all these Items are here

To Order any of these, please write to alnben@yahoo.com

Hewlett Packard Power Supply - $200.00

Measurement Instruments 2400 Master Unit - Make Offer

Northrup Aircraft Power Supply for Gunnery Fire Control Unit - Make Offer

Telco/Other Punch Down Unit - $10

Turner JM+2U Mic - $35.00

Telex Mini Headset - $20.00

Corning Glassware / Reagent Bottle with stopper - $15.00

Corning Glassware / Fleaker - $25.00

Super Switcher, Very Nice, Must See! - Make Offer

Corning Glassware / Standard Funnel with 50mm opening - $2.00

1939 Mills nickle Slot Machine, Antique, Original Key, to die for - $2000

Pictures of all these Items are here
To Order any of these, please write to alnben@yahoo.com

Zenith 1940's/50's AM radio upright unit - $350.00

Magnificent Nickles Bally Slot machine, another collectors item - $1750

Draw Poker Video Machine - $700

$25 Slot machine, works nice - $1350

Mars Air Door, New in Box - $200

Red Electron Tube - Make Offer

Rackmount Blower Unit, NIB w/manual - $100

ECG Machine - Make Offer

Dynakit 70 - $200

Dummy Loads, Electrical - $50

Ten Tec TT Supply - $75

Heathkit Tube Stereo - $175

Racal Tuner - $250

Pictures of all these Items are here
To Order any of these, please write to alnben@yahoo.com

Hewlett Packard Pin Modulator - $100

Robyn Tube CB. Very Nice. - $100

High Power Output Bulb AN/ALQ 123 - Make Offer

Fish Insulation Paper LARGE roll - $30

Ballantine A.C. Voltmeter, See Picture - $150

Messenger 124 CB - $100

Weinshell Engineering Diagnostic Unit - Make Offer

Stromberg Carlson Amp w/pair 6L6s - $100

Sorvall B6000T Refrigerated Portable Centrifuge - $800

Collins 8030 Power Supply - $1500

Pictures of all these Items are here
To Order any of these, please write to alnben@yahoo.com

I found 3 Plectron Receiver/Recorder combos after moving to a new house. All are functional but a little dusty. They are VHF (154.xxx) and have ship dates of 1975, 1979, and 1980. Two are the Patrol model and the third is an unknown (Model # RR16X4).

If any one has an interest, please email me at khoerz@accessus.net

Kurt

I finally got my Army MARS Call and paper work.
This is 6 month after I applied and 1 week after I sold my IC-706!
I need a HF rig that is MARS modified or modifiable.
Just looking for some thing reliable and cheap! Tube or solid state.
Can afford up to $450.00
Thanks!

Hi all,

Since the JRC NRD-535 receiver has been discontinued, are there any
discounts on this receiver out there? Also, would someone know of any
radio closeout/liquidators that might have this radio? I've been
searching for one of these radios, and would greatly appreciate any
information you might have.

please reply to mroriole@gte.net if you have any information.

Thanks in advance,

-jim

Lowband/6 meter equipment for sale:

RCA Series 1000 mobile radio, model CMFM7MMRNC. 100 watts, presently on 39.xxMHz. Complete system with 4 frequency scanning control head & bracket, speaker, mic, mounting tray, and control/power cable. Has optional noise blanker option.
Also includes complete, original RCA 700/1000 series lowband service manual set in three ring binder. Clean, complete, working when pulled a couple years ago. $75.

RCA 'Supercarfone' mobile, model CMFA50N2TT. 50 watts, 45-54MHz split, presently on 47.98. Complete system with 4 frequency 'integrated' control head with mtg bracket, speaker with mtg bracket, mic, mic hangup box, mounting tray, control and power cables. Also includes complete, original RCA Supercarfone/Superfleetfone lowband service manual set. Radio is very clean, head and cables complete, but a little dirty and worn. Working when pulled a couple years ago. $60.

All equipment located in southern NH; I would be glad to show it if you're in the area. Prices plus shipping. Check in advance or COD (at cost) are both fine.

This is the companion VFO to the TS-520 series. It comes with the cable,
manual, and original box. The unit is in good condition with only a few
minor scratches on the side - the front is excellent. In perfect working
order, currently in use.

Just put this mic up for "auction". It's in very nice shape - no scratches.
Just a little dust in the mesh.

No reserve on this mic - set the minimum at $25.00 + $6.00 shipping.

Paul,

The original SW8 which you have,sold for just under $600-US so I would
say that $300-US is a fair price,considering the age. JW

i've got an hm-103.
it's the mic that came with my 706.
no dtmf but works/looks great.

a friend of mine used it with his 2710h while i replaced a chip resistor
in the stock mic to bring the audio down to an acceptable level.

This is the last day for this auction. I'm selling my tried and true 520se
with the optional 500hz cw filter installed. Rig is in good cosmetic
condition - (some light scratches on the case, face is very good), and
excellent operating shape. With manual. Only reason it's leaving is that I
just bought a new radio (TS-570D) and wife says if one comes IN, then one
goes OUT! (hi, hi). Nice first hf rig, or as a backup. Very fine transmit
audio - like most of the tube kenwoods always get great reports on the
sound. And the cw filter is great for picking a signal out of the qrm.

So it's on EBAY thru tonight (11/13). Currently at $250. I have a $275
reserve, but have decided to sell for $250 or above plus shipping.

http://cgi.ebay.com/aw-cgi/eBayISAPI.dll?ViewItem&item=40493038

Thanks and 73
Gil

I am a newbe to radio and am looking for a Ham setup. I know nothing about
Ham and am looking for advice on what to buy? What I need? Radio, Antenna,
license, tuners, etc.. Is there any units that have antenna, etc in one
package?
Any advice is appreciated. I would be interested in purchasing now if
someone has a setup for sale.

Thanks

Richard

Still lots of parts left from this set. VFO section, Meter,
Loading,plate and grid capacitors, along with the plate vernier and
bakelite connecting shafts, bandswitch and coil, power supply choke
(2.5h), Plastic meter and dial window, front panel is reusable, assorted
pots and parts - antenna relay etc. Power supply transforme,
mechanicial filter, knobs and cabinet are gone.

Not trying to be price police or anythig like it. But it seems to me one
can buy a real nice DSP unit for the same price. I own all the same
equipment and do not find anything special about the filter except the
only way to find it is used.

Hi Richard,

The first thing you need to do is get your licence. There are several
licence classes, each providing different levels of privileges. Your
specific level of licence (privileges) will dictate what type of ham station
you should be looking for. If you do not get a licence, it is not
appropriate for you to own equipment that can transmit on frequencies that
you're not licenced for, so you can save yourself a bundle by waiting until
you are licenced. The process of getting your licence will teach you what
you need to know to decide how to get started with your station.

Best of Luck.

I'd have to agree with Casey, Richard...

Something you may want to consider is to check your local library for
amateur radio related books.

Although they may be a few (and in some cases, more than a few) years old,
they will still give you an understanding of what the hobby is, and the
various equipment needed for different interests - you can't possibly know
what gear to buy until you understand the privileges associated with each
license class, how you can operate within that class, and what YOU want to
accomplish within the hobby...

Welcome to amateur radio!, and don't feel that you have to spend thousands
of dollars to enjoy yourself in the hobby - you really don't...

SP600JX14 Hammarlund general coverage receiver, being sold as is. This
radio is complete, has good cosmetics allround, and is running on all
bands. The bfo is not working, and the AC switch is broken. It appears

to have been recapped. The loggings scale is unique - it is calibrated
in amateur band frequencies instead of 0 - 100. Looks like a factory
mod.

Price is $185.00 plus foam in place packing costs of $20.00 and
shipping.

Hello Richard:

There are several good sources for Ham Radio Information. Look for QST, CQ, 73 and World radio at better news stands. There are lots of ads for books and information if you want to try the hobby.

You can also write the ARRL at newham@arrl.org and get a welcome package. I know a great many new hams that used material from Gordon West, For all his hi-tect he is not on the web. Try W5YI at 1-800-669-9594 for information on becoming a new ham

73 (That's ham-speak for "best wishes")

>>Ham and am looking for advice on what to buy? What I need? Radio,

Go to http://www.arrl.org/

You can leave you name and address at the site and they will mail a brochure of clubs and hams in your area. Also included are locations and dates for licensing exams. They include a brochure for ording tapes and books for learning/studying; Yet, you can just go to Radio Shack and get the books you need.

Hope this helps! Regards, John

Hello All:

I am in need of a manual (original or GOOD copy) for a Dentron DTR-1200L.
Information on this amplifier seems to be a bit elusive.

Also, I am wondering if anyone knows of a 10/12 meter modification for this
amplifier.

If you think you can help, please E-mail directly.

Thank you,

73

I always come up with varying results when I use a search engine to look for an amplifier.

I'd like to hear from anyone and everyone privately about what words YOU use to search for amplifiers.

Which words individually?
Which two or three word phrases?
What can you think of?

Please reply privately to me as this won't be of much interest to most newsgroup viewers.

Lowband/6 meter equipment for sale:

RCA Series 1000 mobile radio, model CMFM7MMRNC. 100 watts, presently on 39.xxMHz. Complete system with 4 frequency scanning control head & bracket, speaker, mic, mounting tray, and control/power cable. Has optional noise blanker option. Also includes complete, original RCA 700/1000 series lowband service manual
set in three ring binder. Clean, complete, working when pulled a couple years ago. $75.

RCA 'Supercarfone' mobile, model CMFA50N2TT. 50 watts, 45-54MHz split, presently on 47.98. Complete system with 4 frequency 'integrated' control head with mtg bracket, speaker with mtg bracket, mic, mic hangup box, mounting tray, control and power cables. Also includes complete, original RCA Supercarfone/Superfleetfone lowband service manual set. Radio is very clean, head and cables complete, but a little dirty and worn. Working when pulled a couple years ago. $60.

Both for $115.

Equipment is in southern NH; I would be glad to show it if you're in the area. Prices plus shipping. Check in advance or COD (at cost) are both fine.

Book #1: FM TRANSMISSION & RECEPTION, Printed 1949.Has 400 pages.Hardcover. Good condition but pages are (as per usualin a book this age) a bit yellow. Size is 5.75" X 8.50" X 1.25". By John F. Rider. Numerous charts / diagrams. Original owner has name on book in first page as well as along the Pages as you look at them from the 3 open ends.

BOOK #2:"G.E. TRANSISTOR MANUAL, 2ND EDITION" . Covers circuits, applications and specifications. Paper cover, 112 pages. In general good condition, cover shows some dirtbut is in fact in very good appearance. I can't locate the year the book was published. I do knowit was prior to the time that zipcodes were implemented because on the rear cover the addres for G.E> shows :Syracuse 1, NY".

I would like these books to be of use to someone out there. I don't know what they may be worth. Someone who needs one or both will know and make me a fair offer.

Hope to hear from someone soon. Have a nice thanksgiving to all!
Ray Miller N2NJK

And of course Robert you will be keeping all four of them and wouldn't think of selling them for a even the slightest profit! In good shape even $100 is fair.

The following books are for sale, all in nice shape. Postage extra.

"Building The Amateur Radio Station" Rider publication 2nd printing 1967
$6.00

"Getting Started in Amateur Radio" Rider publication $6.00

"Radio Amateur Licensing Handbook" by Jim Kitchen VE7KN includes a Canadian Call Book section. $6.00

"Ham Handbook for Beginners", and "Ham Handbook for the Advanced". by

VE3CSE. Excellent training books for any one studying for a ham license. $5.00 each.

"The Radio Amateurs Handbook" 14th Edition by K4JBI. Great shape with dust cover. $10.00

"Popular Science Second Radio Annual" (May 1944). Projects here are a bit different because of the effect of WW2 on electronics. $6.00

"Television - How It Works" - a Rider publication (1950s). Good if you are into old TVs etc. $6.00

"Popular Science" - Fix your own car (1954) - so fix up an oldie. $6.00

"Popular Mehanics Shop NOtes" #36, 1940. Some of the stuff they tell you to do would make a safety inspector write tickets - but during the war you had to be practical. This book reflects that and has many neat old ideas. $5.00

Hi all.. please be aware that ALL merchandise I ordered from Roly has
arrived a little late, but AS STATED IN CONDITION STATED, People do
sometimes have difficulties and we can't plan for the unexpected, so let's
cut the guy some slack. I posted with a simple question: 'where did you go
and what happened to your contact lines?' This apparantly sparked a rash of
other postings, I assume, of a less than polite nature.... I hope it wasn't
my posting that started it and if so, I do apologize to anyone affected.
Roly, if you're out there...Thanks, and hope u resolve the problems,
whatever they were and all turns out for the good.....
73 to all,
Randy

I have an excellant condition ICOM IC-551.
6M SSB/CW/AM rig (no FM board, FM was not good on this rig anyway!).
Has the rare optional PBT (pass band tuning) installed. 10 watts out.
Perfect working condition and about a 9 consmetically.
Very sensitive and selective, built in Noise Blanker, selectable AGC, dual VFOs, memories!
This rig has a REAL S-meter, not a light show! Very clean, not a TVI generator.

See it at http://radiodan.com/xcvrs/icom551.htm

Built in AC power supply. I have worked 42 states on 10 watts and an indoor dipole with this rig!
You can too!

(I can accept credit cards)

You must have never experienced FM on the 551, 10 watt or 551-D, 80 watt
Icoms. The quality of FM is as good as the new radios of today.

  Steve , do you have any pl to trade?
   I have 127.3 (3A) 123.0(3Z) 210.7 (M2) 103.5(1A) 162.2(5B)

      I also need 100.0Hz   and 192.8 (7A)

           Regards,
           Bill

I have a new Sony ICF-SW77 shortwave receiver. One only. This unit was the visual demo in a glass glass (internal store display) and was NOT used. With box, manual, like new.

List on this unit is $649.

You can own it for $350 shipping included to the lower 48. Shipping anywhere in the world is possible for extra $.

MFJ Deluxe Power Sentry, Model MFJ-825.

It has two meters on its face, one for forward power, and the other for
reflected power or SWR. It can be switched to measure average power, peak
power, or SWR. It has 3 switchable modules installed, to measure forward
power as follows:
HF:
200 or 2000 watts Full Scale
HF:
2 or 20 watts FS
VHF (50-175 Mhz)
20 or 200 watts FS.

This should cover just about all your station power measuring/testing
needs, I would think!

It's black metal with chrome trim. It's ery accurate and in near-perfect
cosmetic condition. It dates from c. 1987. I packed it carefully away in a
cool closet, along with several other high-quality items, when I changed my
main interest from ham radio to computers, You get the manual with it.

The price is $125

This is the forrunner of a newer model which encorporates cross needle technonlogy and covers all the same frequencies and ranges. The newer model sells for $85 and can often be found on sale at $10 or so off. Your price is about $75 to $85 too high.

I forgot to mention: Each module has its own input and output connector,
so, no connecting and disconnecting is necessary. Three different rigs can
be connected simultaneously.

Hi,
Subject says it all. Looking for the 15 meter monobander mobile
rig, prefer the one with the spinner dial chrome VFO knob and

heat sink on the back chassis.

Reasonably priced, please.

thanks,
Joe K7JOE

I have a VHF Visar that truly is 'as new' - no marks on it, and the
original Motorola programming still in it except for two channel I
programmed to
test with. It has the antenna and owner's manual; it does not have the full
keypad option. I would like to trade it for a UHF Visar; preferably the
mid-split, but high split is OK also. I would prefer to keep my battery
etc., and you keep yours, but would consider including either battery(s)
and/or nylon case for the right deal.

    Regards,

    Phil Barber

FOR SALE: Hallicrafters HT-37 SSB/CW/AM transmitter 80-10 meters (no WARC bands) Boatanchor (80 lb.) - I will not ship it. Includes hand mic and the 11-pin control plug for hooking up a t/r switch with a receiver. Original manual included. All original knobs, etc. and in good operating condition - usual wear and tear for a rig this old. Has been modified for push-to-talk mic. Not "mint" but it works! Pick-up only in Houston, Texas. Make me an offer. Reply by e-mail to jhardin@hal-pc.org

WTB: ARRL Advanced Class License Manual - the one that's good thru 6/30/99.
 I'd like to take the test before then, so I need one with all the pages in
legible condition. This may be your last chance to sell yours. The ARRL
wants $17 including shipping...Give me a price for yours mailed to me in
Texas. Please respond by direct e-mail since I may miss a post in this
newsgroup.

I have a Collins Mechanical Filter which I would like specifications for:

p/n F 455 YA 120 A 6345

Is this a 12 kHz or 120kHz bandwidth unit? I will probably offer it for sale if someone is interested.

Thanks,

Greetings,

  This radio is in excellent condition. Very clean. Non smoking
environment. (No disrespect to smokers, my wife used to smoke. Some people
like to hear about the non smoking environment.) The radio is a 2 meter/70
cmtr all mode. Sat/and packet ready. Hand mic, tone board, box and manuals.
$1000.00 Shipped. Thanks in advanced.   73, Stuart KB8VIY 440-352-7787

This is really one of those things that IS as it appears ! NO SMALL PRINT!!!
Good till 12-31-98
Just one Ham who found some bargains passing them on to you!

40-60% off all existing stuff on my shelves from
AEA, Isopole, Ameritron, AOR-210 TNCs, CSI (private patches), Cushcraft, CW
filters, Daiwa, HFX propagation software, JPS noise reducer, Kantronics, KLM
antennas, M2 antennas, MFJ, Mirage, RF Concepts, SGC-230 tuners, solar
panels, Timewave DSP units, Vectronics, Ramsey kits, The Clip belt clips.
All NEW in box. Manufacturers warranty applies. Sales are final.
 Here is where you need to pay attention: LIMITED ONLY TO STOCK ON HAND!!!!!
This means that if it is not listed on the WebPage I CANNOT get it!!!
These prices are WAY below dealer prices! Visa/MC OK

See all the stuff at http://radiodan.com/hamindex.htm

MFJ Deluxe Power Sentry, Model MFJ-825.

It has two meters on its face, one for forward power, and the other for reflected power or SWR. It can be switched to measure average power, peak power, or SWR. It has 3 switchable modules installed, to measure power as follows:

HF - 200 or 2000 watts Full Scale.
HF - 2 or 20 watts FS.
VHF (50-175 Mhz) - 20 or 200 watts FS.

NOTE: Each measurement module has its own set of input and output "UHF" connectors, so no fiddling is necessary to measure the power output from different radios

Its case is black metal with chrome trim--no plastic! It's very accurate and in near-perfect cosmetic condition. It dates from 1983. I packed it carefully away in a cool closet, along with several other high-quality items, when I changed my main interest from ham radio to computers in 1987. You get the manual with it.

Total original cost in 1983 dollars: $240 You pay $150.

Ryan,

It's not that we all hate eBay auctions, it's just that we'd rather
you put the word "eBay" in the title of your post, so we'll KNOW it
is an auction and not a normal sale. I wouldn't have read the post
if I'd known it was an auction (although I use eBay myself a lot!).

73,

Dean, K5DH

Ryan, you could avoid the flames by paying attention.

You are already aware of the eBay "discussions" in this newsgroup. You
should also be aware that a "gentlemen's agreement" has been reached - if
you put FA (For Auction) instead of FS (For Sale) or eBay in the subject
line, you will avoid all the flames!!

Control costs about $7 from ICOM.

The 02AT came out around 1982 and ran until around 1990, they made over
200,000 of them if I remember right. It has built in PL, but limited
frequency range, so it's value is only about $100 in good condition with a
manual, less for less.

I'm trying to put together a collection of single board computers such as
the
following units from the late 70's:

KIM-1
SYM-1
AIM-65
EBKA Familiarizor
HAL MCEM-8080
MicroDaSys MD-690a
OSI Challenger 400
OSI Model 500
AMT 2650
Sphere One-Card Computer
Microcomputer Associates Jolt

...or whatever you might have similar that is now serving as a mouse house.

You can email me at chipsndips@snet.net

Alan

I just bought at a pawn shop this 9/10 condition SL-500 with battery and charger. Unit powers up and has a small stubby antenna, DTMF pad. I cannot gain access to Maxon's database, what freq's does this work on, how many channels, is it trunked, VHF/UHF, what is it worth, better, what is it worth to you because if it isn't GE trunked, I want to sell..

It is a UHF "Close out " radio. It was a bastard child from Maxon. No
factory support. It uses different software than all the rest. I think
Pagecom bought out all the factory had at fire sale price then dumped them.
It started out as a 99 channel radio that was going to kill the compitition
and now ended up a POS. Steve

Daniel, you might want to take a look at

http://www.interlog.com/~saturn/david/links/interfaceslink.htm

for a cheap and easy homebuilt version of what you want.

73, Dick W0EX

Encyclopedia of Electronic Circuits Volume 2
By Rudolf Graf

Hard Cover, Published by TAB, 1988, 731 Pages.

Graf does it again! This GIANT sourcebook offers you 700 MORE, electronic and integrated circuit ideas. Easy to use and incredibly complete, it is the perfect sourcebook for all levels of electronics practitioners. Here you'll find 768 information-packed pages covering over 100 circuit categories, all alphabetically arranged. Other features include: a source section including the exact page number of the original reference; an extensive listing of the original circuit sources including such industry leaders as Motorola, National Semi-conductor, Texas Instruments, and the National Aeronautics and Space Ad-ministration; a meticulous index; and a specially keyed index that cross

references Encyclopedia of Electronic Circuits Volume 1.

Rudolf Graf is recognized worldwide for his expertise in electronics and practical project guides. A senior member of IEEE, he holds a degree in Communications Engineering from Polytechnic Institute of Brooklyn and an M.B.A. from New York University.

Greetings,
    This radio is in brand new condition. Very clean. No scratches. Non smoking environment. I bought the radio on 06/02/97 from HRO. I have only used the radio on 2 meter ssb. Never even hooked an antenna up to the 70 cm connector. Due to schedule change and lack of time I am selling it. I have the box, manual, schematics, unused hand mic and the tone board is installed. Very nice write up on it in the March of 1997 QST. I am asking $1200.00 "OR BEST OFFER." If interested please e mail me at stu@harborcom.net or call me at 440-352-7787. Thanks in advance.

I have for sale-
Icom IC-706 (Original) with HM-95 Touch Tone Hand mic.
Matching AT-180 auto antenna tuner for the 706.
The 706 has the CR-502 High stability oscillator,
UT-102 Voice synth. and
FL-223 1.9 kHz IF SSB filter installed.
Radio has the MARS/CAP Mods.

$925.00 shipped Con U.S.
Will not separate! Price is firm!

I can send digital pictures if interested.
I am looking for a Swan 250 in good condition.
Also looking for a 5 pin DIN to fit a Microwave Modules Transverter.

I think that the continental net is also open on another weekday.
I will check.

Ten-Tec Argonaut 505 QRP SSB/CW transceiver. Nice QSK, 5 watts input, about 6 lbs. Draws less than 100 mA on receive. (This is less than the more common Argonaut 509.) According to Ten-Tec advertising, there were only about 2000 of these produced. This one (serial number 73) is cosmetically about a 7 out of 10 (it has one scratch that is noticable on the top of the front panel), and operationally it is absolutely perfect. In fact it is a tad more sensitive than my Argonaut 509. It has been recently completely aligned. Comes with a copy of the manual. Great for camping, or just QRP operating.

Reason for selling: I have an Argonaut 509 as well and can't really justify keeping both. I decided to keep the 509 for nastalgic reasons because I used to have one in my younger days. If you would like to look at some data, including a scanned QST advertisement, see:
http://asd.state.va.us/tentec/tttrans.htm

$250 plus shipping.

Harold,
     While you are conducting your investigation, why don't you do a search of the Dejanews files, in the search field enter Roland Geter and you will get plenty of hits about your buddy Roland Geter and his business dealings, bad checks, items never paid for, etc., etc. Just today (9/21/98) another posting from a guy who got a bad check from Roland Geter in Arizona and filed a complaint with the Glendale Arizona District Attorney's Office. It took five years for the victim to get his money...isn't that great! You can contact the D.A.'s office for Glendale Arizona, bad check division to verify it.

     Do your homework before you start defending someone....
Piero

Want to trade my laptop (description below) for a H.F. rig, of equal value and/or + Cash.

Laptop Description

3 Weeks Old
Compaq Presario Model 1625
All-In-One Design
Built-In Modem (56k)
24x Cd-Rom And Disk Drive
12.1" High Performance Addressing Display (HPA)
128-Bit Accelerated Graphics
3.5 Gig Hardrive
AMD-K6 266mhz MMX Enhanced Processor 88.80
42% FASTER than other mobile 266mhz MMX Processor 63.90

Carrying case included

Total Value 3 weeks ago $2400.00 + $180.00 3 year warranty

Will Include 3 year TRANSFERABLE BEST BUYS WARRANTY

What I am looking for - LATE MODEL HF RIG -
IC-756
IC-761
IC-781
IC-970

Other HF rigs will also be considered - Expecially Icom - Kenwood

Email what you have and let's see if we can come to a mutual agreement.

Well, I have rec'd a lot of mail and see some posts about a listing I placed... not sure what all groups. I've had some trouble with my server the last few days and it has apparantly had a seizure and belched out 20 copies of the same post...(I assume this is the problem.. the upset individuals are not great communicators...) I've posted, bought and sold here for some time and never dreamed that something like this could happen, I've always met intelligent, polite people.... what the heck happened??? At any rate, I must apologize to the group for any hang-ups the problem has caused, whatever it was. Could someone of better temper and maturity please email and let me know if there truly is a problem and what I can do to fix it? I would appreciate it.

As for the folks who emailed and posted those beautifully worded messages.... I say this: Before flying off the handle on someone about something that is (to me) not a life-changing experience and no big deal, you should have asked, instead of posting a useless msg and wasting even more space....like an idiot, no? It never ceases to amaze me, how quickly people feel free to act 'tough' when they assume the other person will never be standing in front of them in 'real' life..... You don't know me or who I am. I could be living in walking distance of you. You need to grow up, get up from your computer once in a while and not take this so seriously... None of it will matter in the large scope of things, anyway. There's a whole world out there, full of real people. Go check it out sometime.

It's funny..... 20 people who have no idea who I am are feeling free to be rude, and not one person pointed out the problem or asked if it was an accident or if I needed help.. I 've managed to piece together what it was anyway. thanks a lot, guys.

Again, if there truly is a problem of some kind, I apologize to the group. Sorry I had to post this msg as well.

thanks,

Randy
p.s. Thanks to the folks who answered the posts... I'll be getting back to ya as soon as I can.

Hi;
     Several months ago, I responded to a request from "Roland S. Geter,
Sr", claiming to be a member of the Maricopa County Sheriff's Dept. and
sent him a batch of RCA numerical indicator tubes. The package was sent
to the Maricopa County address and the payment has not been received.
Since it was a mere $35 or so, I was not overly distressed by the
non-payment. But, it seems, his perfidy was not limited to me.
                        bye, Sid Washer KC2COO

My mistake; it was $25, not $35.00 that Geter did not pay. Please see below.

MARICOPA COUNTY SHERIFFS OFFICE
Roland S Geter Sr, Communications Posse
11201 N El Mirage Rd Suite 10
El Mirage AZ 85335-3104

Hi, Roland;

Enclosed are the readout tubes; I hope that they are what you want. I had them left over from a project many moons ago.

Pardon my ignorance, but where is Maricopa County? I'v only been in Arizona once, almost 51 years ago and that was just an afternoon in Tucson.

(snip)

BTW, just make the $25.00 cheque out to me, Sid Washer, and my vacation account will thank you for your support.

Very truly yours,

Sid Washer

 Hi Sid,
Prime example of the problem I have been having with the most simple
purchases!!! I have not been at that location for quite some time
since I have been summer traveling. Since you apparently didn't send
the items COD CASH ONLY my secretary thinks its all right that you
think she's clairvoyant .....but she asks would you mind including
a return address for a remittance? (smile)

Do you remember which tubes and quantities you sent? I have a couple
volunteer technicians rebuilding four older Doppler traffic radar
units for donation to a couple surrounding low budget municipalities.
I'll check it they have been opened and used yet. Please be sure that

25 bucks included some shipping, OK?

Where is your vacation account taking you.... South for the Winter or
North for the Summer? We leave Phoenix (permanent home) during
120degree Summers then return for 80-85degree Winters.
Thanks,
Roland S Geter Sr

Gee, how unusual...ANOTHER person falls victim to Roland Geter's games. The address listed above IS NOT the address of the Maricopa County Sheriff's Office. The actual address of the Sheriff's office is as follows.... Maricopa County Sheriff's Office 102 W. Madison Street Phoenix, AZ. 85003

I'm sure they would be very interested in the above situation about sending the package and not receiving payment. If you want to send a complaint, send it attention Lt. Scott Freeman, Internal Affairs Bureau. I know for a fact he would be interested in your transaction. Good Luck, Piero

Please move this thread off-line so we don't suffer through any more of it in the newsgroups.

It is becoming obvious that Mr. Geter only does business on his own terms - and woe to the person who doesn't understand, or strictly adhere to them. It becomes their "fault" because Mr. Jeter is in denial and now is blaming his "secretary" for not being clairvoyant. Where is his sense of responsibility? I don't expect that people will send me "free" parts - I believe I would attempt to communicate with them (that's what return addresses are for).

(It appears from the comments below that, if you just make up a package and send it "COD Cash Only" to Mr. Geter, his secretary is authorized to pay for it! I know how I am going to clean out my junk box (smile)).

Yeah, I don't know what their
problems are, but with
increasing traffic, it's not

getting better. That's why,
someday, I'm going to use this
computer just for writting and
running programs. I don't use
telephone except here. 73'S
from KD5FES.

Ron, is it hardcover or softcover ?
How about the other one that you'll be shipping me,
Hard or soft ? (I forgot to ask before)

Richard.

    I'm looking to add an early D C Hayes modem to my modem collection.
Would like to buy a Hayes 80-103A S-100 bus Data Communications Adapter, or
D C Hayes Micromodem 100. I would also be interested in any model of
acoustic modem you may still have propping open the door of your shack. Let
me know what you have and we can talk. You can contact me directly at
ChipsNDips@snet.net.

Alan

I listed this item last night, however neglected to mention that it is a
continuous coverage version of this transmitter. Made for Civil Defense,
it operated on amateur bands, and other frequencies as needed.

Hello my name is Ivan - KL0ED. I would like to trade my NEW (purchased from AES on or about 8/15/98)Kenwood TM-742 with 220 and PL ENC/DEC option PLUS a Dimond 1.8-500MHz triplexer network FOR a Yeasu FT-736R base with accessories (if any) in good cond. WHY? I want a base. This is well over $1300 in NEW equipment. I have ALL the manuals scematics and cartons. If interested, drop me a line and we can talk business. You can e-mail me at: kl0ed@gte.net OR ivanbunny@aol.com Thank you and 73.

Would you list the person(s) that say I have purchased their equipment
WITHOUT paying them using my COD CASH ONLY system. I realize 3
complain their shipper messed up which I have taken care of them all
as soon as they call me and produce some minimal documentation they
even sent me anything.

>(It appears from the comments below that, if you just make up a package

You're very, very right Al..... that's why I issue personal PO
numbers that I insist be on the package exterior. Before my PO system
I received over 15 such bogus packages!!!

To Piero,
You know, OM, we are really getting fed up with your problem. We personally feel too sorry for you to complain because maybe you can't help your condition. But you really should seek help, seriously, OM, Good Luck. Roland

To Sid,
Please be patient for remittance until I return to Phoenix in couple weeks and get caught up with items not received COD CASH ONLY, OK? . Yes. you will get your promised 501C TAX CREDIT receipt for the difference you sold me the tubes for and the value you placed on them, OK? The readout tubes are being used to repair older Doppler Radar Units I've donated to Law Enforcement Agencies. Sorry you had to catch the garbage here on the newsgroup but you should have contacted me directly. Sincerely, Roland
